829. A media catastrophe

Ostrzeszów/Poland 01/02/2025

The storm in a teacup, the hypocrisy of politicians, the hypocrisy of the media – we've seen it all for years. Ever since [Elon Musk launched his revolution](#), the media war has been in full swing. Germany's tireless “defender of democracy”, Federal President Frank-Walter Steinmeier, has stated unequivocally that he will not tolerate foreign billionaires interfering in Germany's internal affairs:

“External influence is a danger to democracy. [...] I am firmly against any attempt to exert influence from outside”.
Franz-Walter Steinmeier.

A revolution like this is happening at breakneck speed. The announced meeting between Elon Musk and Alice Weidel has now been officially confirmed. It is expected to take place on January 10. Alice Weidel, the leader of the German AfD party, has also been invited to the celebrations to mark Trump's assumption of the US presidency. Federal Chancellor Olaf Scholz has not received such an invitation.

Despite heavy investment in the Tesla plant near Berlin, Elon Musk will not be coming to Germany. The fate of Telegram owner Durov, who was arrested in Paris, is a clear warning. The German constitutional state functions excellently as long as people do not oppose the “democratic” measures of the Berlin government, which are aimed at economic and social catastrophe.

Musk's discussion with Weidel will certainly be interesting. I have heard many of Alicia Weidel's statements. She is an intelligent and educated person who can back up her words with good arguments. I don't expect an argument between Elon Musk and Alicia Weidel. They have too much in common for that. There are rumors that Donald Trump could also take part in this discussion. It will be a major media event beyond global censorship. A month before the German federal election, many recipients of media propaganda will have the opportunity to see what kind of "Nazi" views the AfD leader preaches.

What happens next in Germany is decisive for Europe's entire future. If Germans finally let go of their World War II guilt complex, it's game over for the globalist powers. Germany is/was their main stronghold. That's why they're having such a meltdown over Musk endorsing AfD. Excerpt from Tucker Carlson's interview with Dutch freedom of expression activist Eve Vlaardingerbroek. [Source.](#)

Unconfirmed news has emerged in the media: it is rumored that [Elon Musk intends to buy the popular US television station ABC.](#) [Source.](#)

Elon Musk, the billionaire entrepreneur behind Tesla, SpaceX and X (formerly Twitter), has once again made headlines around the world with his bold plans to take over the ABC television network. According to reports, Musk intends to appoint Tucker Carlson, a former Fox News host known for his outspoken conservative views, as the new CEO. Musk's alleged motivation? He wants to rid the channel of what he calls "woke ideology" and steer it in a new editorial direction.

Whether he has bought or will buy this television station is less important than the hysterical reaction of the guardians of the only "truth".

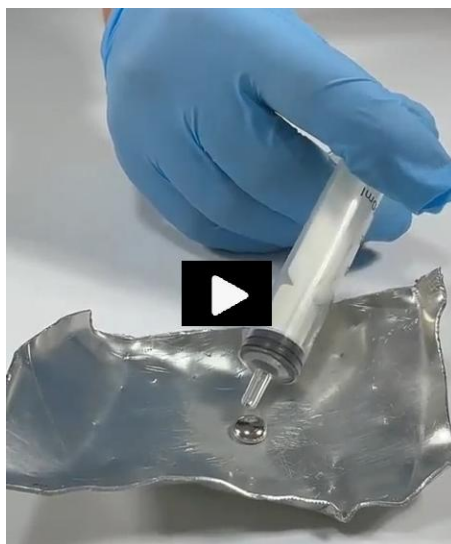

Don't follow the majority, follow the truth!

830. Vaccination illusion

Ostrzeszów/Poland 01/03/2025

If you have a few drops of mercury at home – for example in an old thermometer – and a thick piece of aluminum foil, you can carry out such an experiment yourself:

Source: [Telegram from 12/28/2024. 12:34 pm.](#)

Mercury reacts with aluminum. Both substances are contained in many vaccinations as “boosters”. Mercury is usually declared as thiomersal on the package insert. In addition, the law allows the manufacturer not to declare all ingredients if it is considered a trade secret. But which vaccination believer reads package inserts anyway? They just let the doctor inject them and their children! And then they wonder why their children are constantly ill if they don’t suffer sudden infant death syndrome first. Source: [Telegram from 12/28/2024. 12:34 pm.](#)

Both elements – mercury and aluminum – are highly toxic and easily cross the blood-brain barrier (the boundary between the blood and the central nervous system). I know from personal experience what effects mercury can have when it slowly enters the bloodstream. For more than 40 years I suffered from severe and frequent migraine attacks. This continued until my dentist removed an old amalgam filling. That was six years ago and I haven’t had a single migraine attack since.

Don’t take what they show you for granted.
Look for what they are hiding.

How many made-up stories are told to future doctors by lecturers in medical faculties. These lies, which have been repeated for more than 100 years, have so penetrated the popular consciousness, and not just that of doctors, that they have become unassailable tenets of the pseudo-religion of orthodox medicine.

No matter what vaccination is involved, they are all based on the same theory: vaccination with weakened “pathogens” or “pathogen parts” supposedly produces pathogen-specific antibodies, which supposedly protect against infection. The vaccine manufacturers only have to prove that antibodies are produced by the vaccination. If such proof is available, the vaccination is considered “protective” and approved. Every doctor learns this and many doctors believe it. I quote from [an article](#) on body-effets.com that takes a scientific look at the vaccination myth. [Source.](#)

This is how I react when someone brags about how well he knows politics, but has never heard the name Rothschild.

831. The sky is clearing

Ostrzeszów/Poland 01/05/2025

The title of this article is the title of Eugeniusz Paukszta's book about the Second World War. I read it in 1970 and today I will deal with the turbulent political developments in Austria. It seems that the Austrian sky is just beginning to clear, despite efforts to defend "democracy" by methods that ignore basic democratic principles.

The election to the Austrian parliament will take place on September 29, 2024.

	%	Mandates
 ÖVP	26,3 %	51
 SPÖ	21,1 %	41
 FPÖ	28,8 %	57
 GRÜNE	8,2 %	16
 NEOS	9,1 %	18

Election results September 29, 2024.

The election was won by the Freedom Party (FPÖ), which was still in favor of introducing the lockdown in parliament in March 2020, but also sided with the large anti-Covid demonstrations in 2020. Activists from this party have set themselves the task of analyzing the pandemic fraud in detail. The FPÖ is a sister party of the German AfD.

Austrian President Alexander van der Bellen, who comes from the Green Party and defends democracy, entrusted the task of forming a government to the ÖVP, which came second in the election and lost 11% of the vote compared to the 2019 election. He justified this anti-democratic decision by saying that Herbert Kickl – the leader of the FPÖ – would not find a coalition partner and, in order to save time, gave his consent to form a government to the previously unelected Chancellor Nehammer of the ÖVP.

This is how the globalists see the year 2025!

It took more than three months to “save” the day and the talks between the would-be coalition (ÖVP, SPÖ and NEOS) ended in complete failure and yesterday Chancellor Nehammer announced his long-awaited [resignation as Chancellor and party leader of the ÖVP](#). [Source](#). In the meantime, the popularity of the FPÖ has risen. Recent polls show over 37% support for the Freedom Party.

Lockdown-Nehammer is leaving. This is the news of the day, which was announced at around 7.30 pm. He wants to retire as ÖVP leader and Federal Chancellor in the next few days. The never-elected election loser is finally doing what he should have done a long time ago – he is hopefully making way for someone who is willing and perhaps also able. That would at least be a gain for Austria and a glimmer of hope after the last few lost years. But can it really get any better?

The indignation of the Union of Globalist Unity Parties towards Herbert Kickl should not surprise anyone. I would describe him as the Austrian Trump. Austria is a small country with 9 million inhabitants. Moreover, Kickl is at the head of the MAGA movement (Make Austria Great Again). Austria is too small, so it won't impose tariffs – an ineffective instrument that hurts everyone involved.

On Thursday, January 9 at 19:00 CET, there will be an X-debate between Elon Musk and the leader of the Alternative for Germany (AfD), Alice Weidel.

In some European countries, the skies are indeed brightening. This is noted with dismay by the proponents of the Great Reset from Dawos. Unfortunately, this will not happen in Poland. That's because the majority of Poles are preoccupied with an idiotic fight between thugs and gangsters. You can decide for yourself what you want to call which of the two big parties. It doesn't matter – the only important thing is that both represent the interests of the globalists, betraying the Polish *raison d'état*. Just look at how unanimously they vote for the green and deal in the European Parliament.

A very neglected symbol of green order – it should have been watered better!

832. No more censorship on Facebook

Ostrzeszów/Poland 01/07/2025

Mark Zuckerberg, the CEO of Meta, announced extensive changes to the company's moderation rules on Tuesday. As part of this, Meta, including Facebook and Instagram, will discontinue its previous fact-checking program, which was previously implemented together with external partners. In future, a community-driven solution based on the "Community Notes" from X (formerly Twitter) will be used. He cited the growing importance of freedom of expression and the changes in politics and society as the main motives, reports NBC. Quote from today's article on nius.de: [Facebook kicks out Correctiv and all fact-checkers! Source.](#)

This is a revolutionary announcement to end the restriction of freedom of expression on Facebook, Instagram and WhatsApp. Just like on Elon Musk's X platform. Of course, it is difficult to see Mark Zuckerberg as a hero in the fight for freedom of expression. My blog has also been censored by Facebook several times. To this day, the reach of my posts is kept artificially low by shadow bans. Of course, it's easier to change fronts when the deep state retreats with its tail between its legs than when Elon Musk takes the kitchen sink to Twitter headquarters to rid the company of censors. On the other hand, the Facebook founder's late but nonetheless courageous move to the right side of this war on humanity is commendable given its timid nature.

If there is a platform with freedom of expression, then censorship platforms become increasingly unattractive to users. Mark Zuckerberg, whose Facebook has been eaten away by censorship, has probably also recognized this. Today (January 7), he announced that he wants to end the censorship of "fact checkers": "Fact checkers were simply too politically biased and destroyed all user trust."

Mark Zuckerberg switches to the MAGA side.

The totalitarian system that the globalists want to introduce in the world is only possible if the usurpers of world power have complete control over the views of the gray people. Censorship presupposes a single universal truth imposed by the ideologues in power, and anything that deviates from this pattern is "misinformation".

There is still a long way to go. The year 2025 promises to be very bad for the would-be owners of our world. These changes will not come tomorrow. Zuckerberg will start with the USA. He will leave Europe for last if he changes anything here, for fear of EU sanctions.

833. Conversation across the Atlantic

Vienna 01/10/2025

I watched the conversation between Alice Weidel, the leader of the German AfD party, and Elon Musk on X with great interest yesterday.

Conversation in English. [Source.](#)

Had there not been such protests from the guardians of the previous pseudo-democracy, the conversation between the two would not have become as popular as it eventually was. Elon Musk has created a media balance between the AfD and other parties in Germany. Out of more than 500 talk shows (discussions) on German television, the AfD – Germany’s second strongest party after the CDU – was only invited to a handful of such debates, in which the moderators tried to make factual arguments impossible by confronting party participants with absurd accusations in order to put them on the defensive.

What did the two of them discuss for over an hour? Alice Weidel began by addressing the topic of energy policy in Germany. Both had an almost identical position here, as they did on illegal migration. The AfD leader outlined the situation in Germany, but did not put herself and her party in the role of the attacked victim, although she would have been perfectly entitled to do so. A designated Federal Chancellor should not moan, but rather make suggestions for a way out of a difficult situation, and that is what she did.

The European Union was aware of the importance of this meeting and sent 150 spies to search for so-called disinformation, hate speech and any reason to accuse the interlocutors of anything harmful. The entire conversation was conducted in a friendly tone and both laughed more than once

at the inept efforts of incompetent politicians and media to prevent the conversation from being published.

If you want to hit someone, you can always find a stick. Alice Weidel said that Hitler was a left-wing politician and considered himself a leftist. The NSDAP was a workers' party and a national socialist party at that. At least in name. The first step after Hitler came to power was the introduction of censorship and the only permitted narrative, which is exactly what the ideological unity parties such as the CDU, SPD, FDP, BSW and Greens in Germany currently favor.

Elon Musk has said that if we go by the "eye for an eye" method, everyone will soon be blind. Many of you will probably be outraged by this. Of course there should be penalties for crime. It reminds me of the words – I can't remember who said them – *an eye for an eye, a tooth for a tooth – it's not the wisdom of the cruel and brutal, it's the cunning of the eyeless and toothless.*

I would like to take this opportunity to point out Trump's threat to take over Greenland. Well, he won't succeed that easily: They won't even give up a button!

834. Los Angeles in flames

Vienna 01/11/2025

On the eve of their mortal enemy Donald Trump coming to power in the US, the collapsing globalist conspiracy is resorting to all means to create as much chaos as possible. They have perfectly planned and executed the first step of this conspiracy, namely the plandemic. Obviously, however, their plan did not take into account the catastrophic defeat that the new administration in the White House will surely mean for them. We are just days away from the ceremonial swearing-in of Donald Trump as US President.

There's a fire in the City of Angels, and this time it's not a Hollywood spectacle. As the flames eat their way unchecked through Los Angeles, a frightening picture of mismanagement, misplaced priorities and a city that has neglected its core tasks is revealed. A story of political shortsightedness that now has deadly consequences. [Article on Report24](#). [Source](#).

Today – one month ago.

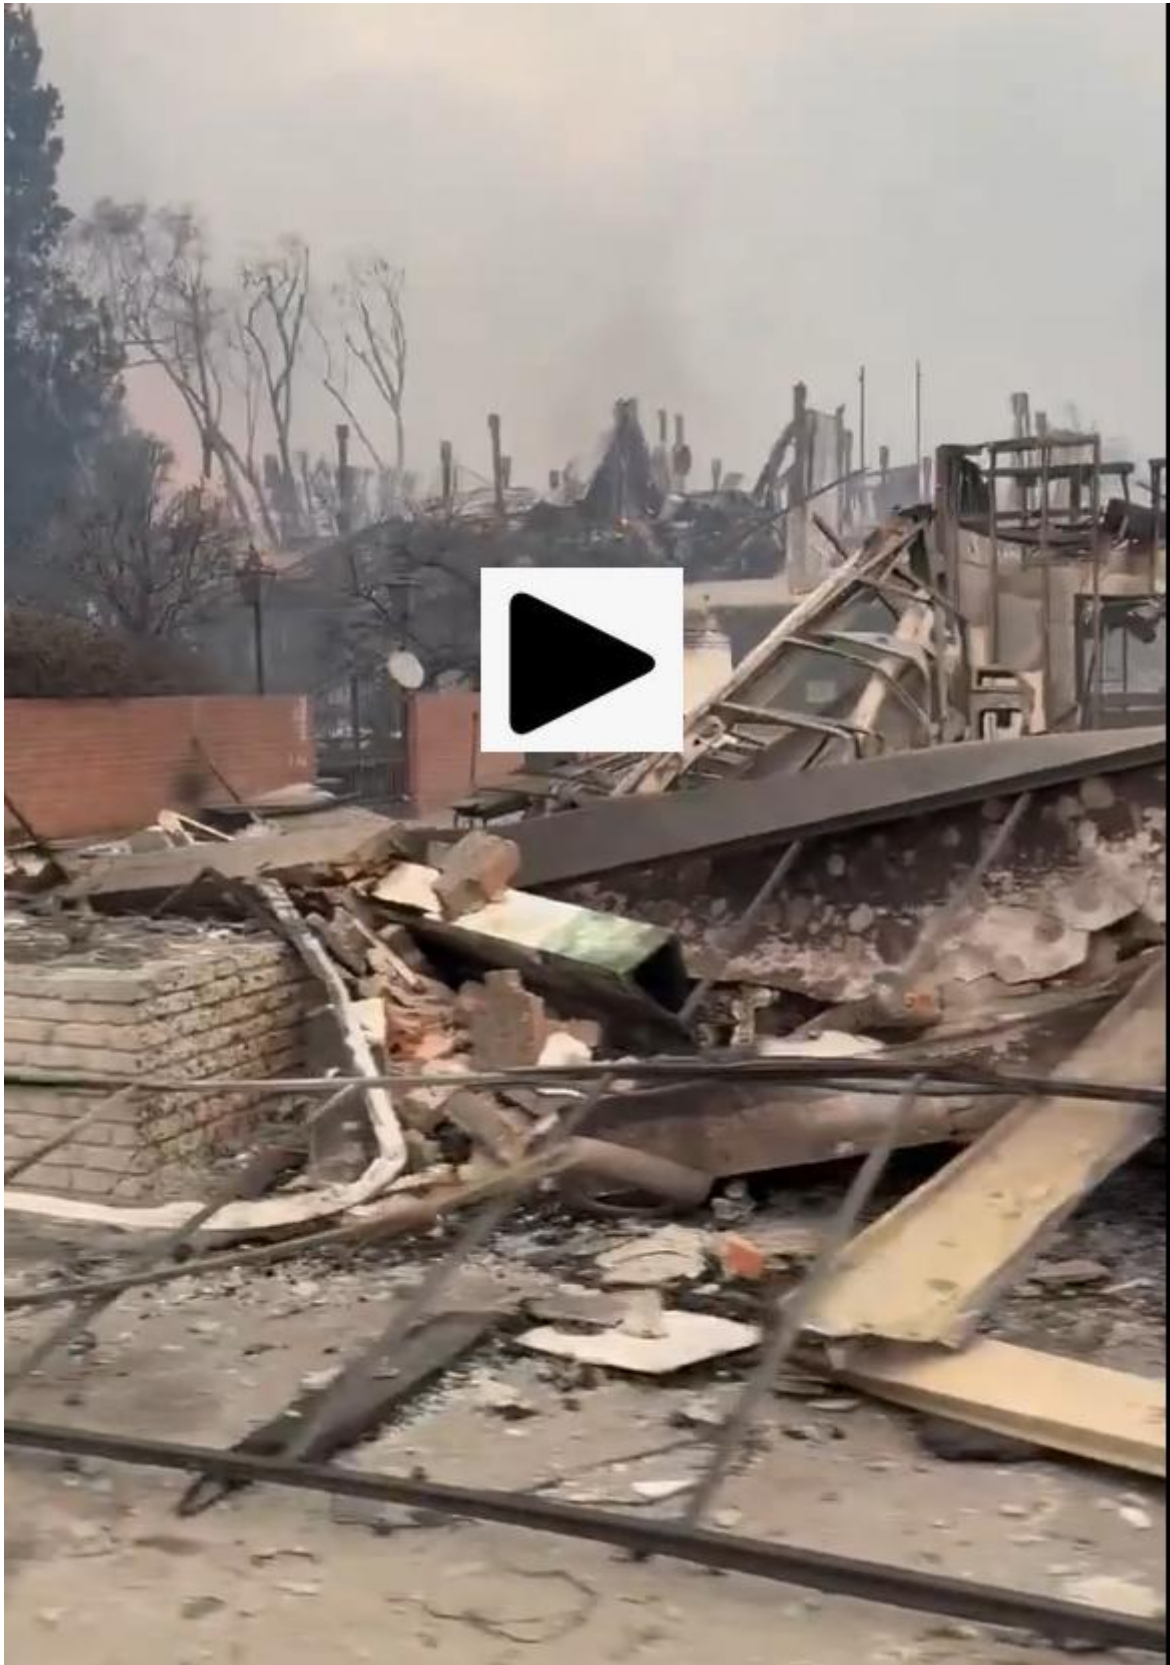

The inhabitants of Maui in Hawaii experienced a [similar disaster](#) a year and a half ago. The difference is that back then the homes of celebrities were spared – today they burn everything down in a panic because the fire disaster itself is their goal.

Satellite images show that all three fires currently raging in Los Angeles broke out at the same time. This could indicate that the fires were started deliberately and is already causing discussion on social media.

835. The EU gives up

Vienna 01/12/2025

Ursula von der Leyen stops the EU censorship proceedings against Musk and X from her hospital bed, where she is currently staying. Is she afraid of Trump's revenge? What is the significance of the European Commission's actions and who actually decides on them?

Shortly before Trump's second inauguration, Ursula von der Leyen is apparently trying to calm the waters in her relationship with the USA. The DSA proceedings against X, Facebook and Apple are currently not being continued. EU laws are proving to be arbitrary instruments that may or may not soon apply. He wrote in yesterday's [Tichys Einblick article](#). [Source](#).

Interview. I see that you are known to the police.
Well, that's right. In 2020 I was reading a book in the park, sitting on a bench....

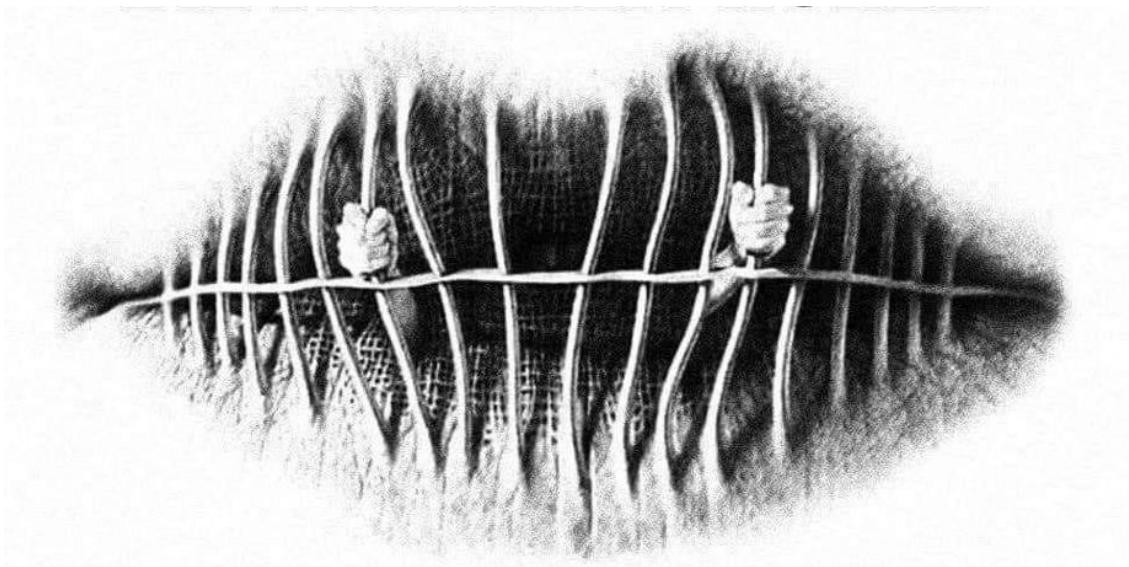

Wherever you look, the new globalist order is collapsing. In Austria, coalition talks are currently taking place between the FPÖ and the ÖVP. FPÖ leader Herbert Kickl, who was to be prevented at all costs, has a good chance of becoming Austria's future chancellor. His party currently has 10% more support, or 39%, than on election day in September 2024, when it became the strongest Austrian party. In Germany, support for the AfD is growing. Currently 22% and rising. Despite the intrusive pro-government propaganda of the mainstream media, fewer and fewer people believe in the promises of the parties of ideological unity, i.e. all but the AfD.

Don't let your mouth be closed!
You are not a radical, just because,
you think differently than someone else.

The European Union is losing ground. It will have no say in the peace negotiations on the war in Ukraine. Neither Trump nor Putin need the Union to decide the future fate of the country over the heads of the Ukrainians. Ukraine will not take part in these negotiations either, because it has no legitimate president who could negotiate.

Not having a say – that is currently the greatest possible punishment for Brussels bureaucrats. The sooner this ossified, anti-democratic structure of European governance collapses, the better for Europe. There is a chance that sensible forces will take over the helm of the Union and restore the original function of this colossus on legs of clay – a community that supports the economies of the member states and at the same time preserves the sovereignty of all EU countries. The curve of European bananas does not need to be regulated and controlled from Brussels.

Most people don't want to hear the truth.
They want to hear confirmation of their misconceptions from your mouth.

Europe only has a chance of surviving the coming financial crisis if it gets rid of the idea that communist-minded bureaucrats control the economy. One example of the implementation of the five-year plan is the success of the rabbit farm from the book *The Stormy Life of Lasik Roitschwantz* by Ilia Erenburg. The Russophobes have probably managed to burn this instructive book.

Elon Musk: China will never be able to replicate our technology.

836. Is Netanyahu a “dark son of a bitch”?

Vienna 01/13/2025

A purely rhetorical question. For some it is too mild a term for a ruthless murderer, for others an insult to the majesty of the modern messiah. The term appeared in a video that Donald Trump published on his [social platform Truth](#) a few days ago. The video shows a speech at the Cambridge Union in which Professor Jeffrey Sachs accuses Israeli Prime Minister Netanyahu of being behind a series of military actions carried out by the US.

Israel's war with Hamas.

Netanyahu: “We are fighting in the name of all humanity ...”

Oh, don't let it come to “humanity” having to pay reparations to the Jews later.

The president-elect posted the clip on Truth Social, featuring economist Jeffrey Sachs, who accuses Netanyahu of manipulating US foreign policy and orchestrating “endless wars” in the Middle East. Quote from an article in The Indian Express: [Trump releases video in which he calls Netanyahu a “son of a bitch”](#).

Netanyahu is still trying to persuade us to fight Iran. He is a son of a bitch, because he has involved us in endless wars.

It goes without saying that the United States bears responsibility for all the wars it has caused in the world. 20 years of bloody war in Afghanistan had little to do with a state in Palestine. Nevertheless, Benjamin Netanyahu's role in starting the wars in Iraq and Syria is worth mentioning. To become the messiah of the Jewish people, he “only” had to destroy Iran.

**The war is not meant to
be won, it is meant to be
continuous.**

GEORGE ORWELL

I am not surprised that the American people do not want to accept that the axis of evil invented by President G. W. Bush is first and foremost the USA. It is not easy to live with the conviction that all my life I have supported murderers and been deceived by them.

For those who are so eager to pigeonhole people and lump them under the “Deep State” label, I have a question: how does Trump’s decision to release this video square with the claim that he is dancing on the strings pulled by Netanyahu? He has received nearly 100 million dollars from [AIPAC](#) for his campaign. Presumably he promised to defend Israel in return. Unfortunately, these are the realities of American politics. Obviously, however, he has not pledged to support the genocide in Gaza.

I repeat once again that the world is not black and white. If you are afraid to see the variety of colors that make up the beautiful life on earth, then at least pay attention to the shades of gray between white and black.

The pigeonholes certainly make it easier to find your way through the jungle of political orientations. However, you will never find two people whose convictions coincide on all points without exception. Exceptions are the rule. It is also a misunderstanding to see this war against the world in terms of left and right. It’s not that the evil left is imposing a mindless, rabid ideology on the world. Mrs. Angela Merkel was the first Green Chancellor – that’s what they call her in Germany. In reality, she was the leader of the CDU, the moderate right. This division has been abolished, and today there are only pro- or anti-globalist parties with shades that are needed to somehow stand out in this mass.

837. Telepathy

Vienna 01/15/2025

Today there will be some metaphysics. You can believe in telepathy or not. I'm not going to convince anyone, because what's the point? Everyone has their own world based on experiences and thoughts.

However, I will mention what happened to me. It was in the fall of 1984 in Wroclaw, Poland. My wife was at university and was due to return home in two hours. I don't know what drove me to do it, but I sat down comfortably in an armchair, closed my eyes and allowed the images in my head, which I only observed. I saw a hand holding onto a vertical red pipe and several people sitting nearby. I recognized that it was a scene on a Berliet bus, which at the time ran alongside the Polish Jelcz buses on the streets of Wroclaw. My wife came in a moment later and was very shocked when I described to her the scene she had seen with her eyes on the bus. Not very spectacular, but it taught me to be more open to previously unexplored phenomena.

German newspaper Süddeutsche Zeitung published an article on May 17, 2010: [Advertisement: "We wanted to have a powerful effect."](#) [Source.](#)

On September 9, 2001, a commercial premiered: An airplane crashes through a skyscraper. Two days later, the makers had a crisis.

Commercial on German television two days before 9/11

Source: [Telegram .01/14/2025 04:34 p.m.](#)

It is unlikely that the German advertising agency Telegate destroyed two skyscrapers in New York. What is likely, however, is that the CIA's computer technicians used this company's know-how to create films showing "home-made" computer airplanes in videos that were broadcast by every television station in the world.

The second plane flew into the other tower of the World Trade Center in front of the world's cameras and Prantner's eyes. And this was suddenly a scene and a camera angle that seemed very familiar to Harald Prantner. "I started to tremble all over, sat there shivering in my bed, didn't want to hear or see anything else, pulled the covers over my head and thought: Please, please don't. Please not our movie now. Just not this." Such mastery of the disaster film is the result of months of work, which is why the US filmmakers who initiated the "war on terror" were happy to draw on Telegate's experience.

Conspiracy theorists are like parents:
At first they piss you off with everything they say and do, then you're left the same way yourself
and suddenly realize they were right.

What does this have to do with telepathy? Probably not much. Advertising companies have been used repeatedly for political manipulation. [The incubator lie](#), for example. In this case, I would rather suspect plagiarism – the US Secret Service simply copied the ad agency's work.

Nothing will change until you change yourself – then everything will change.

838. The practice of global conspiracy

Vienna 01/16/2025

On the day Donald Trump is sworn in as US President, Monday, January 20, the annual meeting of the would-be owners of our world will begin in Davos, lasting until Friday, January 24, 2025. To the dismay of many fans of the new US president, Donald Trump has decided to take part in one of the globalist discussions from afar. They already see the black scenario confirmed, that Trump is a globalist in disguise. I think the opposite of being black is being clairvoyant. Since I couldn't get my hands on a crystal ball, they won't speculate on what Donald Trump will say at this conference. He will certainly capitalize on the interest of proponents of the vision of a world ruled by a powerful clique of billionaires, i.e. the enslavement of the inhabitants of our planet, to say what he thinks of it, as is his way. This is my opinion – I could be wrong. And so we have no choice but to wait for the event.

I am amused by discussions along the lines of: Will Donald Trump change Europe? You only have to look at what changed after his election victory, even before he became president. Elon Musk himself has triggered a virtual revolution in the UK and Germany. The US Senate is currently questioning the nominated ministers and, one by one, is gaining the approval of the majority of the chamber.

Tesla has introduced such an innovation in all new models....

For those interested in the list of globalization enthusiasts, I recommend the [Young Global Leaders](#) page I published in May 2022. Globalism is currently experiencing a global retreat from its unfulfilled plans to subjugate the entire world.

To whom do we owe the fact that Twitter has become a platform where you can literally write anything that is within the law? The great advocate of transhumanism Elon Haldimann (Musk). The cowardly Zuckerberg would certainly not have kicked the fact-manipulators off his platform if Musk had not supported Trump's election campaign with his X platform. It is only a matter of time before the censors of darkness disappear from YouTube too. On X, it is also allowed to criticize the idea of freedom of expression. It will defend itself against the stupidity of the "truth" whisperers.

Anything that is censored, hidden or declared as disinformation is exactly what you should be interested in.

If elections changed anything, they would be banned – so argue the advocates of slavery. After all, nothing changes anyway, so why bother putting crosses on the ballot papers? It is these crosses that have won an unprecedented victory in the fight against globalism. And where? For example in the USA, in Hungary, in Slovakia, in the Netherlands and most recently here in Austria. Nobody promises us that we will win easily, but if we simply surrender, we will certainly not win. I have already quoted Bertold Brecht here: He who fights can lose, he who does not fight has already lost.

“The people who vote for losers, thieves, traitors and cheats are not their victims. They are their accomplices.”
George Orwell

I recommend that you read the article: [Who doesn't fight.](#)

839. Google expels censors

Vienna 01/17/2025

As usual, the sewer media are trying to make us believe that the election of a new US president will have virtually no impact on our world. Trump has not yet been sworn in as head of the White House and Netanyahu has already signed a ceasefire in Gaza. Trump is used to exerting pressure to achieve his goals. The video he released served this purpose – see the article [Is Netanyahu a “dark son of a bitch”?](#)

Donald Trump has and will continue to have a major impact on our world. Admittedly, I do not support his imperial machinations regarding Panama, Greenland or Canada, nor the instigation of an economic and tariff war, but to salve my own conscience, I declare that this is a typical ploy of a great negotiator like Donald Trump. The future will soon show how it really is.

Yesterday an article appeared on axios.com: [Google won’t add fact checks despite new EU law.](#)

Google has told the EU it will not add fact checks to search results and YouTube videos or use them in ranking or removing content, despite the requirements of a new EU law, according to a copy of a letter obtained by Axios.

Another domino topples over.

Another example of the collapse of the NWO – the new world order. This does not necessarily have to be the case. A certain idea of the future world is collapsing, which fortunately we won’t live to see. Our world is changing every day and no one can stop it. Revolutionary changes are on the way. What they will look like depends largely on who will implement and monitor them.

If I had to choose between the powerful, the grey eminences who are sending their people to the globalization conference in Davos and the patriotic movements in the USA and also in other

countries around the world, then my heart and my reason tell me that it is Trump who will decide the future history of our civilization, although and perhaps precisely because Donald Trump will also be speaking at this conference next Thursday.

Readers of my blog know that I am a staunch opponent of a black-and-white view of the world. That's why I don't believe that Trump is an angel and that all his decisions are and will only be right. But when I look at the alternative – the communist views of Kamala Harris, for example – don't be surprised at my enthusiasm after Donald Trump's victory.

“People could learn from their mistakes if they weren't so busy denying them.”

Carl Gustav Jung

Of course, neither Mark Zuckerberg nor Sundar Pichai (head of Google) spontaneously became fighters for freedom of expression. It was forced upon them by a vision of the immediate future under Trump and his sidekick Elon Musk. They can think and they know that they can only save their own skin with this attitude.

I know, I also think they don't deserve it. As Elon Musk said in a conversation with Alice Weidel on January 9th, if we were to apply the “eye for an eye” principle, we would end up in a society of the blind. That's not my sense of justice, and probably not yours either, but the tactic requires it, and our goal is to destroy the gray eminences of the Deep State and the peasants who are not necessarily subservient to them. This is all the more true as these peasants could prove useful in this war.

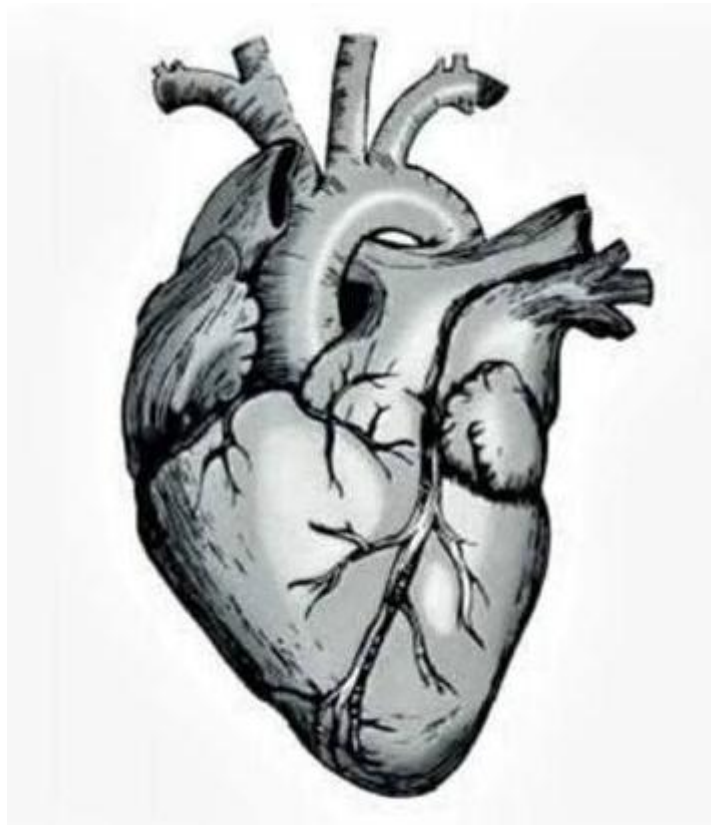

Don't shoot! I'm mentally handicapped!

Prove it!

Mark Zuckerberg now believes in freedom of speech.

A year ago in Davos, Usula von der Leyen declared war on free speech, which she called "disinformation." In a few days we'll find out what tactics the globalists will adopt as they retreat from the Great Reset, which will happen anyway, with their tails tucked – despite the fortunes they use as a substitute for the intelligence they lack. However, it will be a great change unchecked by these creatures.

Perhaps they themselves will submit to the worldwide euthanasia campaign they are promoting?

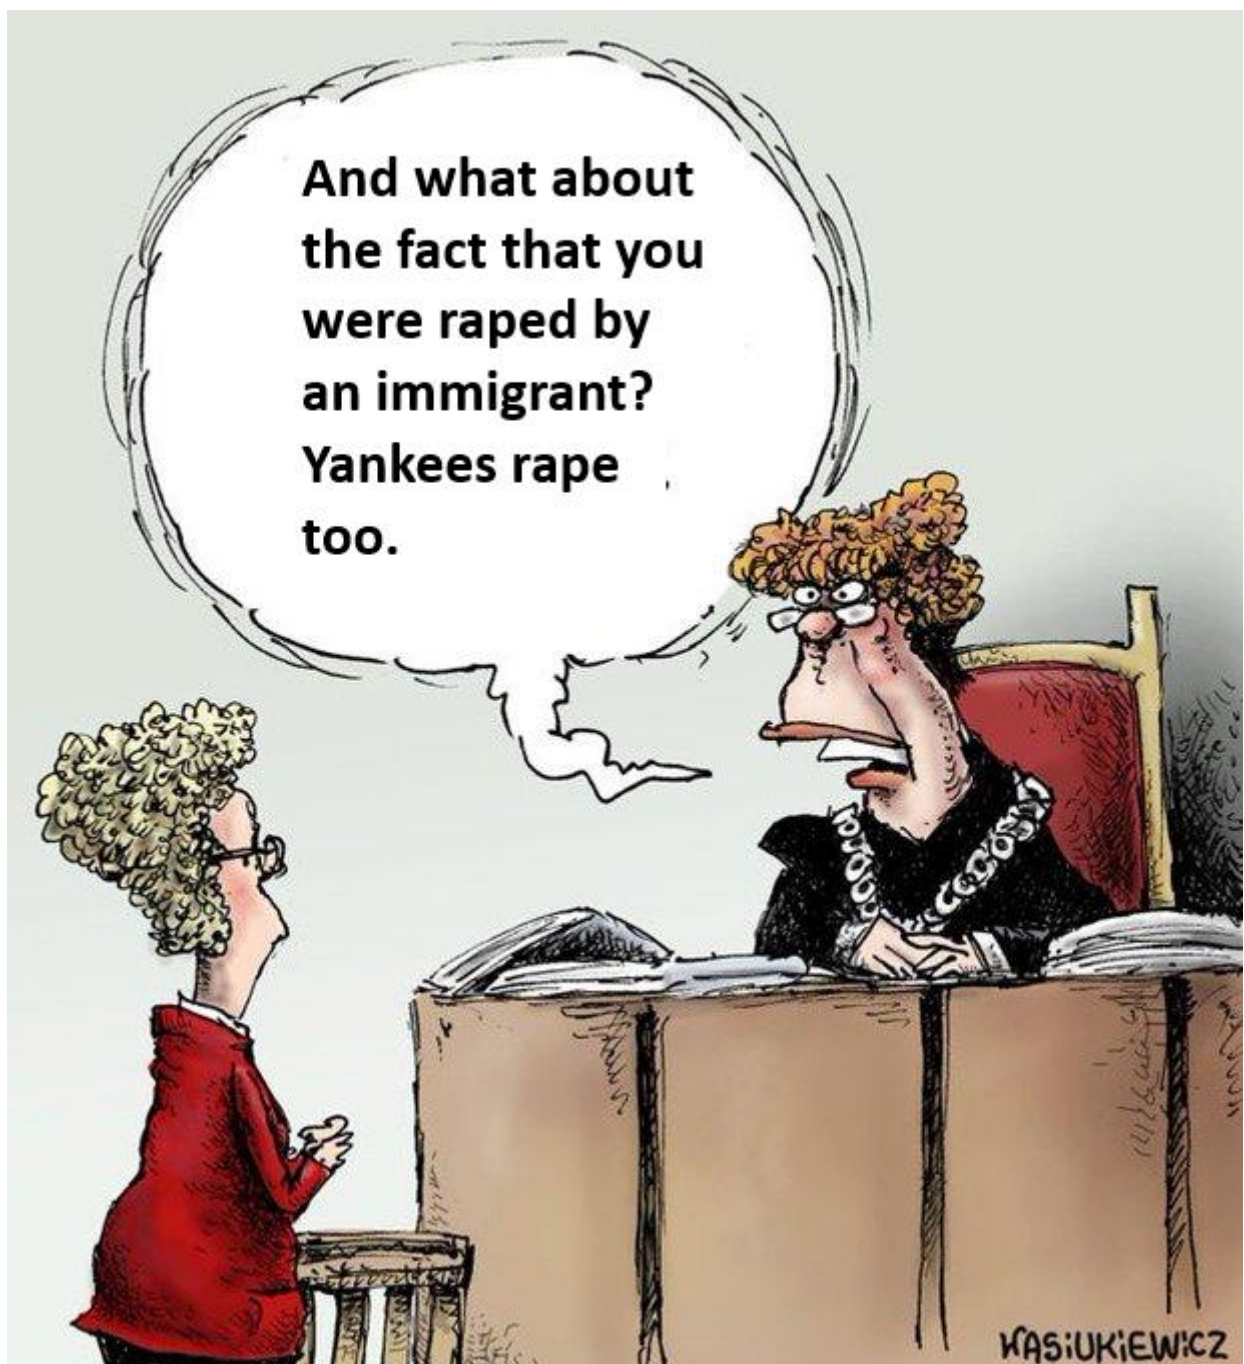

A post-vaccination heart attack is a normal matter and confirms that the vaccine works.

840. Self-deportation

Vienna 01/18/2025

Donald Trump has not yet taken his seat in the White House, and already legions of illegal immigrants are taking the opposite route, as if they had come to the United States.

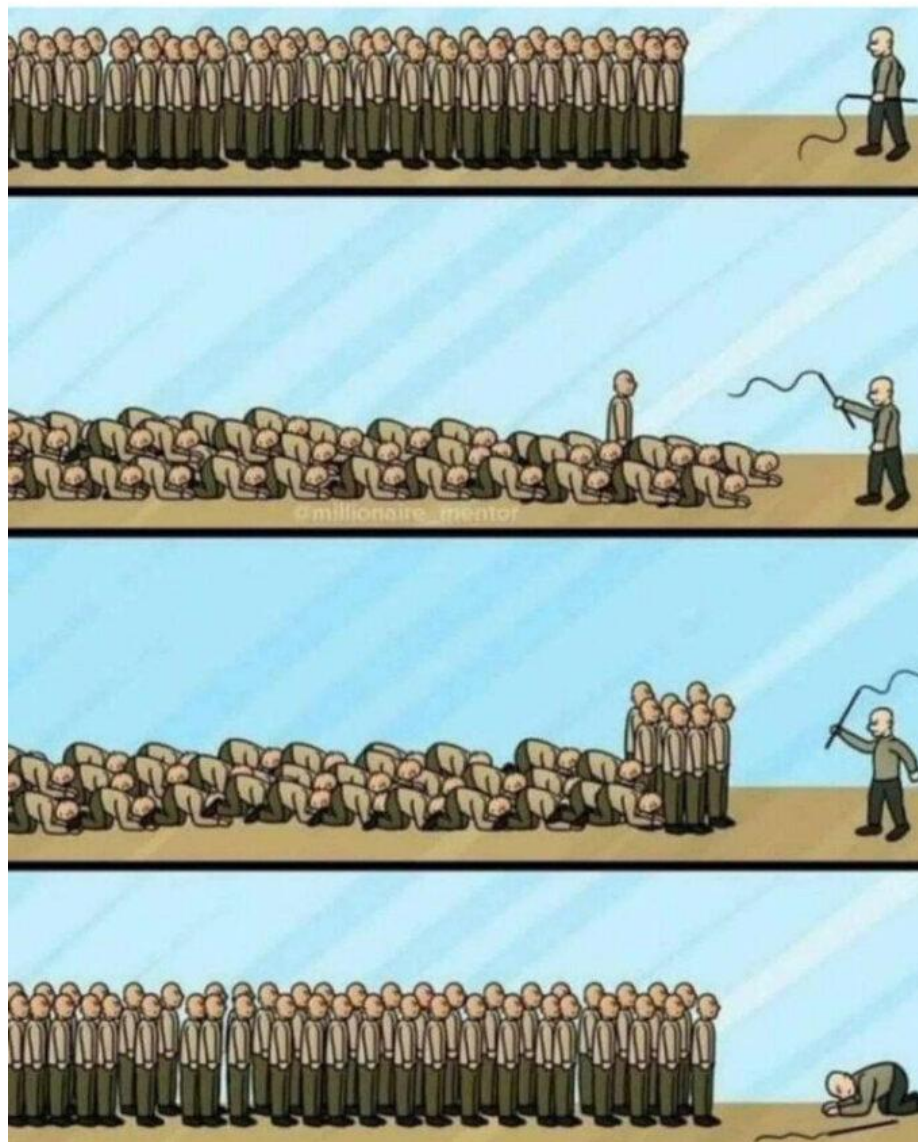

As President-elect Donald Trump prepares to take office, a positive trend is emerging, which is an uptick in self-deportations among illegal immigrants. “Self-deportation helps Trump to achieve his goals without the government having to spend or do anything,” According to an article on [westernjournal.com](#): [Self-Deportations Already Underway as Fear of What Trump Is About to Do Sets In.](#)

The situation that illegal immigration has led to in both the US and Europe is symptomatic of a new kind of warfare. The refugees themselves are merely a tool in the hands of the globalists who are losing this war outright. This massive migration of people was planned and executed as part of the Great Reset and Agenda 2030. These people, coming from countries with a monthly income of only a few dollars, could easily be persuaded to a better life. Not all of them are crooks. By destabilizing previously rich countries, they are reduced to the role of fourth world countries – a world that is proudly taking the direct path to slavery.

It has come to the point where people who are not prepared to fight for their rights are being attacked by refugees who have been accustomed and taught to fight for survival in their own countries.

The war is in full swing and there are many casualties. It is not just the indiscriminate killings at the pre-Christmas market in Magdeburg. The much-vaunted multicultural change is also a victim of this war. The rapprochement of cultures will come to nothing if, instead of a heightened interest in

foreign cultures, the association is made with a bloody machete or a knife. It is difficult to engage in cultural exchange if you are afraid of strangers. Some will say that this fear is justified. I would argue that it is just as justified as the fear of the flu, which was renamed Covid19 in the media five years ago.

A man speaking his mind never threatens democracy. Democracy is only threatened by those who would like to prohibit others from freely expressing their opinion.

841. “Good news – there will be no peace!

Vienna 01/19/2025

It was with great relief that German ZDF television correspondent Elmar Theveßen announced to the world:

The good news is that peace will not break out on day one.

In the program “The new world order after Trump” from January 16, 2025, Maybrit Illner finally drops all decorum in the round of warmongers and explains that Trump must understand that the only acceptable option is for Ukraine to win the war. Elmar Theveßen agrees with the above quote. Human lives and the misery of war are irrelevant. They live in a dream world and are not interested in the fate of the people on both sides of the front line.

Excerpt from the [entire discussion.](#)

In English: The good news is that peace will not break out in the region on day one. Donald Trump himself said it would take 6 months, Keith Kellogg, whom I have already mentioned, spoke of 100 days to resolve the issue. So far, this is good news.

Let's rejoice! People won't stop dying for “Western values” just because Donald Trump wants them to! After all, this war cannot be lost by NATO! And certainly not in ZDF.

As far as I know, Russia and Hungary have their own central banks. However, Panama is missing from this list. [Source.](#)

What do central banks have to do with war? These wars have to be financed somehow. For the banks, it's an opportunity to make big money by providing funds for the war, preferably for all sides of the conflict.

Ukraine lacks soldiers? What is the problem? There are candidates lining up on the street:

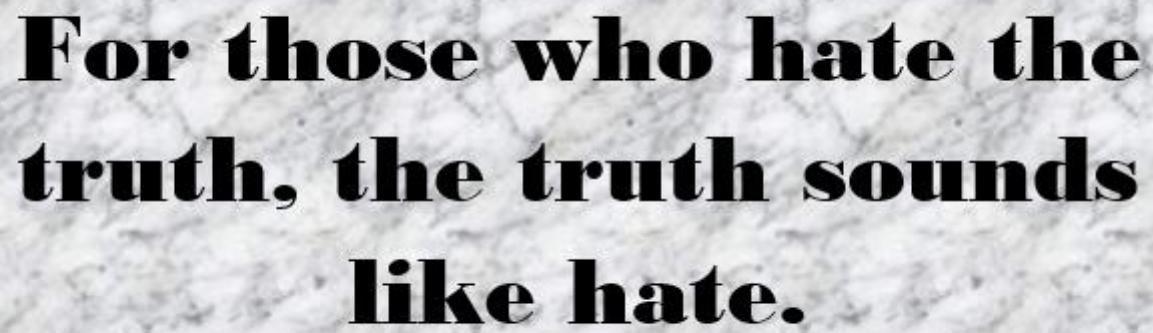

Pick them up and send them to the front. Training? What's the point?

It's too expensive. After all, he won't survive anyway.

Source: [Telegram 03/23/2024. 09:59 p.m.](#)

They kill each other without even knowing who they are killing. If I don't kill him, he will kill me. I will only survive if I kill. That is the dark philosophy of war. Reinforced by the sight of dying colleagues, it supports the business of the warmongers. Let's send the bankers to the front so they can get their money honestly. Let's send the ZDF correspondents to the front so that they can set an example for the heroic fight for Western pseudo-values.

842. Chinese Year of the Snake

Vienna 01/20/2025

The swearing-in ceremony for the new president begins today in the White House. Many political representatives have been invited to the ceremony. Even more important is the long list of those who have not been invited to this inauguration. These include the presidents of Germany, Austria, Poland and other puppet politicians who are of little importance because they are just following orders. In countries like England, for example, there are virtually no politicians in power who are independent of the deep state.

There are rumors that the WHO is working intensively on the definition of a new disease. Its working title is trumpophobia. Allegedly, Pfizer has already received a substantial advance to develop a new vaccine against this dangerous and highly contagious mental illness. The main symptom of trumpophobia is fear – what will happen now! Unfortunately, the vaccine is not yet on the market. However, there are numerous scientific studies whose authors unanimously recommend switching off the television once and for all.

While the US secret service searches in vain for lost Russian nuclear bombs near New Jersey, a similar, non-nuclear problem has been solved in Poland. All it took was a search in an Ikea warehouse to find the lost 240 anti-tank mines, or rather anti-stupidity mines – who knows? The important thing here is that the perpetrators are punished fairly. The unfortunate soldiers who planted the mines in the wrong train car have been brought to justice and face up to five years in prison. The general responsible was punished far more severely – he was dismissed ...

In the meantime, the Middle Kingdom celebrates the Year of the Snake.

China's Bluebeam project is in full swing with a hologram of the New Year celebrations. The dragon is a symbol of the power of evil, i.e. Satan. He commands the forces of darkness that are at war with the forces of good. It is also a symbol of the increased activity of Satan.

Source: [Telegram 01/04/2025. 03:24 p.m.](#)

It is not the dragon – a symbol of evil – that leads the Chinese authorities to completely control their citizens. The reason is a totalitarian system that assumes complete control and leaves the Chinese people an ever smaller space in which to move.

In China, citizens need a biometric digital ID (which is checked using facial recognition cameras) to leave their residential area.

This girl keeps failing the face check, so she can't leave her zone.

You are simply not there because the system has not found your face in the database. So stay where you are and don't protest. For those who still want to protest, the Chinese authorities have squadrons of cyber dogs at their disposal.

The future is here: take a look at China's armed robot dogs
A new video showing China's robot dogs with assault rifles going off from a vehicle has gone viral on social media.

These artificial animals were first spotted in May during the "Golden Dragon 2024" military exercise between China and Cambodia.

The robots can transmit images to command posts in real time, autonomously plan routes, avoid obstacles and head for targets. The batteries and power supply system are located in the "abdominal cavity", allowing them to move back and forth, lie down and jump.

The dogs could be used not only for reconnaissance, but also as a means of destruction, the media reported.

China pursues a liberal foreign policy. They do not impose their ideology on anyone, as the green parties do in the so-called civilized West. How do they treat their own citizens? Just think of the dramatic scenes in Shanghai three years ago, when hundreds of desperate people trapped in high-rise buildings jumped through the windows because they couldn't stand the isolation in the apartments whose doors had been locked as a precaution. I wrote about this in an article: [Consistent implementation of the plan.](#)

843. Revolution of common sense

Vienna 01/21/2025

„Revolution of common sense” – this is how Trump described his plans for the next four years as US President yesterday. Common sense has been sorely lacking in world politics.

- From now on, passport offices in the USA and hopefully worldwide will recognize two genders. Anyone can think they are an ant, a parrot, a hammer or a donkey – that’s up to them – but in offices and in biology lessons in schools, only women and men will be differentiated.

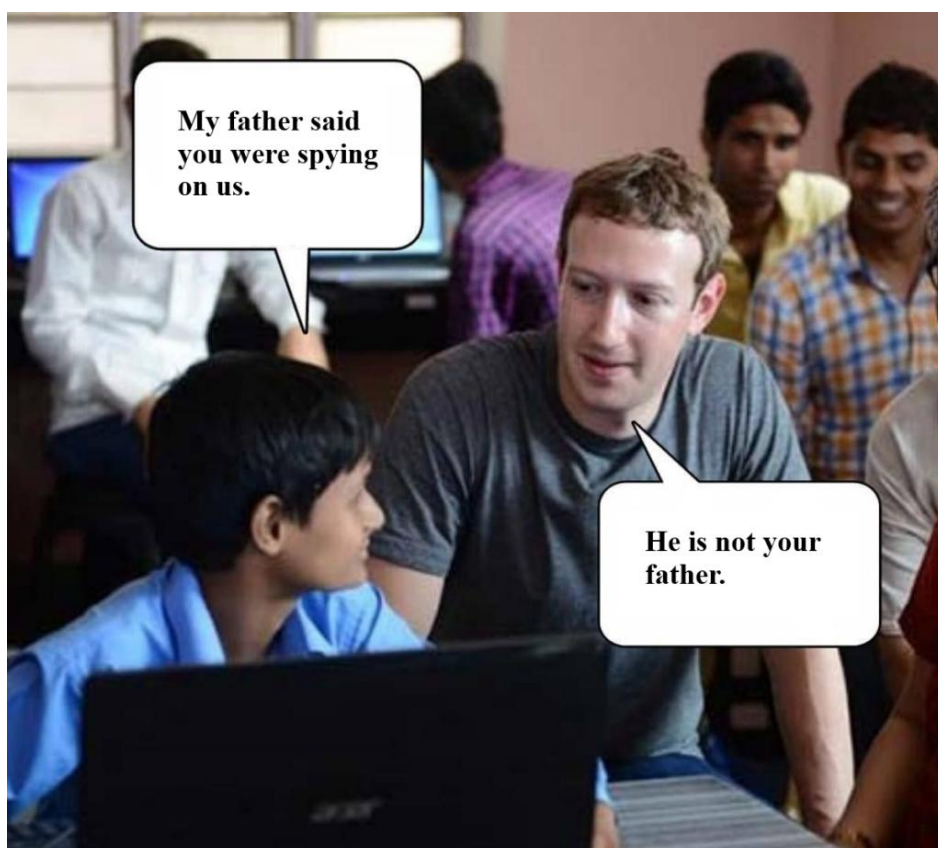

This is how I figuratively explain the existence of only two genders.
Poor chances, but let’s not lose hope.

- Exit WHO – one of the most important demonstrations of common sense.
- Any attempt at censorship will be punished with a prison sentence. If something like this happens worldwide, my blog will no longer be needed. I will probably write from time to time just to entertain you. The plandemic of fear will end and the reckoning with the criminals will begin.
- An end to climate hysteria, an end to the tax on breathing (CO2), an end to the Paris Agreement and the green mess. Comment unnecessary.
- Close the borders to illegal immigration and deport all invaders who have broken the law in the US.

This is just a selection of what I consider to be the most important changes that Trump signed yesterday. It is important to mention the renaming of the Gulf of Mexico to the Gulf of America. No, this change has nothing to do with Donald Trump's imperialist leanings – America is made up of two continents and many countries. This change is related to Biden's executive order banning all oil drilling and production in the Gulf of Mexico. Instead of rescinding this order, Trump has decided to rename the Gulf. Don't buy a new globe or geographical atlas just yet – it remains to be seen what will change in Syria and Ukraine.

We can't complain about a lack of attractions. I am looking forward to the release of the secret CIA files on the assassination of J. F. Kennedy and Martin Luther King. Trump's virtual speech in Davos planned for Thursday will also be interesting.

COMMITTED TO ENSLAVING THE WHOLE WORLD

I am also waiting for Robert Kennedy to become health minister in the USA. In Europe, the media repeat like a mantra that he is spreading conspiracy theories. Obviously they are beginning to realize it. The term "conspiracy theory" was introduced by the CIA immediately after the assassination of his uncle J. F. Kennedy. The truth about this assassination will simultaneously confirm many conspiracy theories.

There are no conspiracy theories about the discovery of America by Columbus on October 12, 1492.

We have conspiracy theories about the moon landing on July 16, 1969.

844. Documentation of the genocide

Vienna 01/23/2025

The response to COVID-19 was NOT a public health response.
It had nothing to do with science or medicine or public health.
It was and is a biological warfare program.
It was and continues to be democide.

The above quote is from an [article by James Roguski](#) published on substack.com on December 30, 2024. You will find hundreds of documents in English that will – hopefully in the near future – be helpful in the trials of criminals accused of murdering millions of people.

The most recent and most visible phase of the program launched in the US in early 2020, under the title Operation Warp Speed, and resulted in global deployment of psychological fraud and control programs including terrorizing propaganda; social isolation; mask mandates; diagnostic tests; manipulated data presentations (i.e. “dashboards”); prohibition on treatments for symptoms; and financial coercion of hospitals and nursing home death protocols (sedatives, ventilators and toxins).

At the end of 2020, death squads emerged, which used syringes to...

For those who are convinced that they have awakened....

On April 1, 2020, I wrote in the article [What's next?](#):

My guess:

somewhere in the world, there are several series production plants in which the vaccine or drug dexamethasone, which is unknown to anyone, is produced at full steam.

In half a year, most countries in the world will spend billions of dollars trying to buy world-saving funds and finally end this nightmare.

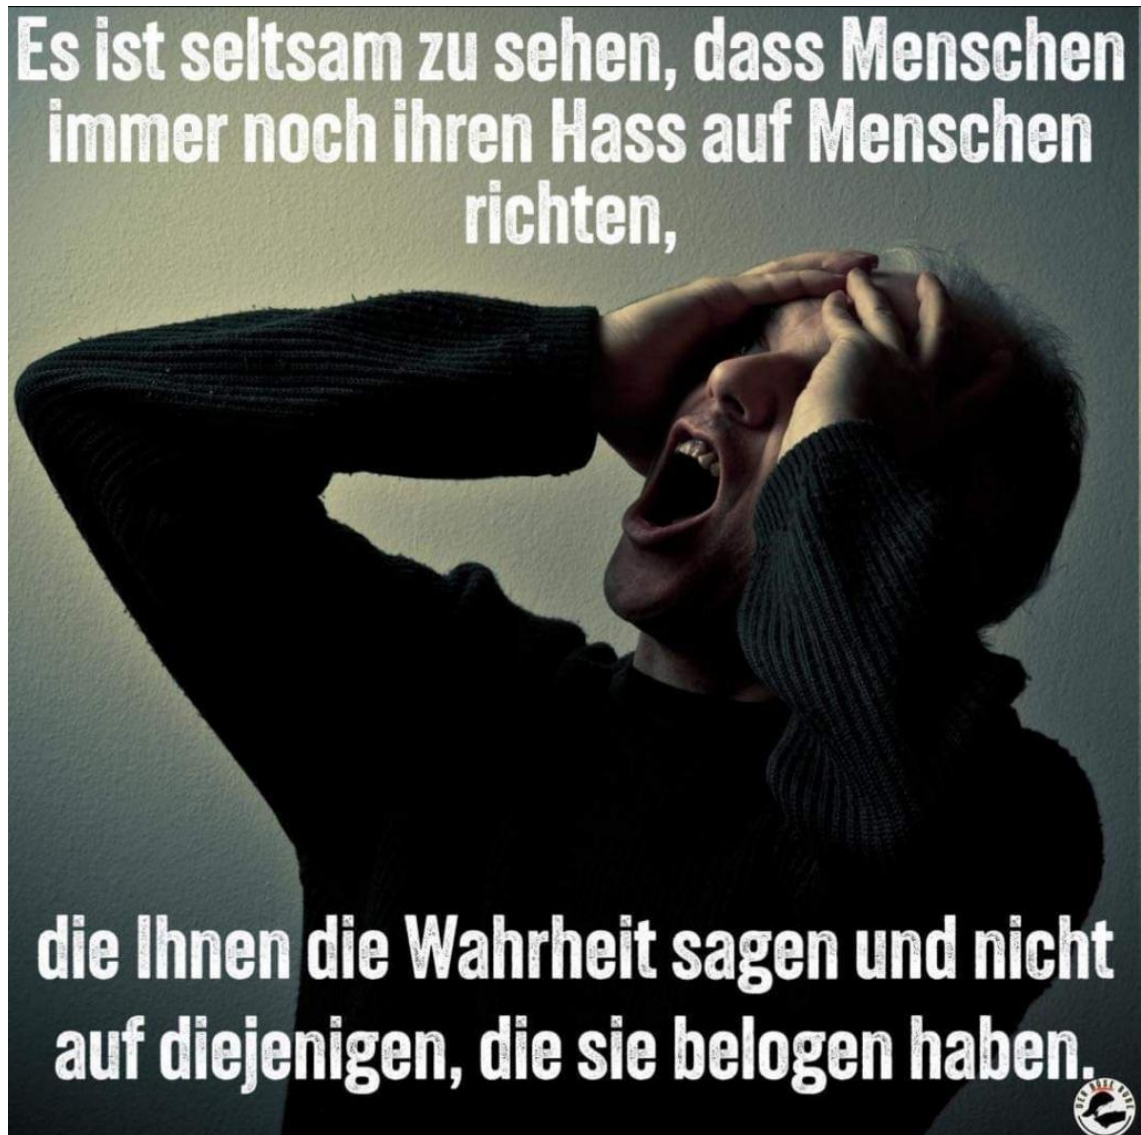

Thanks to the documents collected by courageous people, we now have a complete picture of what really went on back then? Hundreds of contracts and project plans. This is an excellent source for hunting down unscrupulous criminals – the proponents of depopulation.

A

chronicle of the plandemic.

Sometimes I come across vaccine fanatics who don't even look at the documents signed by the US government that show the deliberate plans to kill random people. Of course not all the doses were lethal. That would have come out very quickly. It was a bet on Russian roulette. Some people argue: I've been vaccinated many times and nothing has happened to me. Yes, in Russian roulette there is only one bullet and five blanks. Statistically speaking, it is possible to miss the ball three times ...

The strange thing is that people continue to direct their hatred toward those who tell them the truth, rather than those who have lied to them.

845. Good cop – bad cop

Vienna 01/24/2025

You are probably familiar with the psychological trick “good cop/bad cop”. It aims to get the suspect to confess. It doesn’t matter if he is guilty – the important thing is that he confesses and signs a confession. This increases the chances of promotion for both the police officer and their boss. It’s not just the police who use psychology to convince someone. Politicians and political commentators do it too. I will write about the latter in this article today.

People’s attitudes towards the new US president will run the gamut from absolute euphoria and confidence to total rejection. This means that practically all possible options are on the table. That is the profile that every good politician should have.

This division of roles, seen through the eyes of supporters of Trump’s conspiracy and his full cooperation with the swamp, the globalists or the Deep State (the name is irrelevant – the important thing is that we know who they are talking about), has one drawback: have you ever heard of a “good cop” who, in order to convince a criminal that he is on his side, shoots several other cops?

Donald Trump presented his “Common Sense Revolution” virtually in Davos. He destroyed the myth of a sustainable world with a multi-gender ideology, described the migration of peoples as armed aggression and presented his version of freedom of speech – without censors who look for disinformation in views that deviate from the Davos ideology.

The declaration of a ban on all media censorship alone is the nail in the coffin for toppling the globalists from their pedestal. The significance of Davos has reached an all-time low. The only G7 head of state who personally attended this meeting of globalist epigones, German Chancellor Olaf Scholz, said – and I quote from memory: **In Germany we have full freedom of expression. But we will not allow the free expression of right-wing extremist ideas.** Needless to say, “extreme right-wing ideas” are anything that is not in line with the German government.

In Germany, prices have so skyrocketed that German police have had to replace stun guns with nettle.

Donald Trump wants to keep his election promises. Obviously, things with Ukraine have not gone as he imagined. He probably thought during the election campaign that all he had to do was stop the flow of money to Ukraine and everything would take care of itself. The Ukrainian president is doing what he has always done – he is serving the White House. Even now he is trying to portray himself as a great fighter for peace and emphasize that it is he who has always wanted peace. Putin, on the other hand, who won the war, will not let Trump take this victory away from him. Rumor has it that a summit meeting is planned for 9 May 2025 in Moscow to mark the 80th anniversary of the end of the Second World War.

Trump is a great negotiator. He uses the carrot and the stick. For him, all tricks are permitted as long as they achieve the goal. The ceasefire in the Gaza Strip was a good example of this. All he had to do was [publish a video in his media](#) and Netanyahu swung into action and agreed to Trump's conditions.

Likewise, I see pledges to support an mRNA vaccine against the turbo-cancer epidemic caused by mRNA vaccines. Next week, the nomination of Robert Kennedy for US Secretary of Health and Human Services will be considered in the Senate. From Trump's perspective, it is better to disappoint his supporters for a few days and help push Kennedy through a Senate committee than to fight with an open mind by, for example, arresting a criminal like Anthony Fauci in violation of US law. We'll see how it turns out in a few days. However, I don't think any sane person will believe that Kennedy will accept these criminal vaccines once he is Secretary of Health and Human Services. Let's wait these few days to jump to conclusions.

Yesterday, Donald Trump signed an executive order calling for the release of all previously hidden details of the assassinations of J.F.K. (John Kennedy) and M.L.K. (Martin Luther King). Of course any globalist supporter would do that. Wouldn't they? This is just the beginning of the common sense revolution. I wonder how long Trump's opponents will persist with this nonsensical, inherently pessimistic thesis? They will probably continue to hold it even after the globalists have signed an unconditional surrender along the lines of May 1945.

846. Political blackmail

Vienna 01/27/2025

The Colombian president has refused to allow deportation flights from the USA to land in his country. It took him less than 50 minutes to change his mind and “voluntarily” make his presidential plane available for deportation flights. What did this look like in practice? We can read about it on Truthsocial in Donald Trump’s post ([source](#)):

Donald J. Trump ✓
@realDonaldTrump

I was just informed that two repatriation flights from the United States, with a large number of Illegal Criminals, were not allowed to land in Colombia. This order was given by Colombia’s Socialist President Gustavo Petro, who is already very unpopular amongst his people. Petro’s denial of these flights has jeopardized the National Security and Public Safety of the United States, so I have directed my Administration to immediately take the following urgent and decisive retaliatory measures:

- Emergency 25% tariffs on all goods coming into the United States. In one week, the 25% tariffs will be raised to 50%.
- A Travel Ban and immediate Visa Revocations on the Colombian Government Officials, and all Allies and Supporters.
- Visa Sanctions on all Party Members, Family Members, and Supporters of the Colombian Government.
- Enhanced Customs and Border Protection Inspections of all Colombian Nationals and Cargo on national security grounds.
- IEEPA Treasury, Banking and Financial Sanctions to be fully imposed.

These measures are just the beginning. We will not allow the Colombian Government to violate its legal obligations with regard to the acceptance and return of the Criminals they forced into the United States!

Colombian President Gustavo Petro will certainly not become another Che Guevara, not even a replacement for Fidel Castro. The revolutionary spirit left him immediately when he realized how much he stood to lose. Political blackmail has often been used by Trump. I have no intention of defending such methods of exerting pressure. But I do understand the motives behind such actions. Does the end justify the means? That is the question! It doesn't justify them – it explains the reasons behind the behavior. So we are not going to resolve this dilemma here.

1974 test of courage: Jumping from a 10-meter trampoline into a swimming pool.
Year 2025 test of courage: entering the pool.

The removal of millions of illegal immigrants cannot be handled with kid gloves. The vast majority of them certainly don't have a bloody knife in their pocket. They were organized to stay in the States and are now threatened with deportation. Who organized this for them? The ideologues of depopulation – the globalists. These migrants are a weapon directed against the US. Since Israel can murder civilians in Gaza, it is certainly not inhumane to deport migrants. This is warfare – the defense of one's territory without killing enemy combatants.

Both live in poverty. The daughter sees her father as a king, he sees no world outside of her.
That's something no amount of money can buy. And bombs are falling next door.

847. Replacement Migration

Vienna 01/28/2025

Sustainable development – the euphemism that the creators of the UN 2030 Agenda like to use – also applies to demographic issues. How can you present an unpopular concept in such a way that it is widely accepted? Positive-sounding words are used to replace reality with “no alternative” solutions.

In the summer of 1976, Poland was hit by a wave of strikes. At that time I had the opportunity to listen to a speech by a subordinate party leader. **We are on the only right path, and unfortunately nothing can be done!** Obviously, he too wanted a change! The situation was, as the German Chancellor Angela Merkel used to say later, without alternative. The same lady who issued the slogan: We can do it! and opened the borders to an avalanche of refugees into Europe in 2015.

The best way to control and completely dominate people is to gradually take away their freedoms and reduce their rights through minor, practically imperceptible restrictions.

In this way, the public will not realize that their freedom and rights are being taken away until the changes are so far advanced that there is NO GOING BACK.

Adolf Hitler

Who is the creator of this criminal work called replacement migration? The answer is simple and unmistakable. They are the authors of the Great Reset. The authors openly admit it. You can [read it in a document](#) published on the UN website in March 2020.

Some still remember the mathematical models from five years ago that predicted an exponential rise in infections with an invented viral threat. The mathematical models themselves were correct – it was the assumptions and unrealistic coefficients that were wrong. An unlimited, unrealistic increase in infections could quickly lead to a paranoid situation where, with 8 billion people on the planet, we would have 800 billion severely contaminated victims. Similarly ridiculous assumptions about demographics can be found in the UN document mentioned above.

he potential support ratio at its 1995 value of 5.2 persons aged 15-64 for each person aged 65 or older. In order to keep the potential support ratio constant at that level, it would be necessary to have 593 million immigrants from 1995 to 2050, an average of 10.8 million per year. By 2050, out of a United States total population of 1.1 billion, 775 million, or 73 per cent, would be post- 1995 immigrants or their descendants.

There are currently around 340 million people living in the United States. The whole debate revolves around the ageing population and the fact that in the near future there will no longer be enough working people to support the number of pensioners, which is growing year on year. It is therefore essential to bring refugees into the country.

The example from Sweden shows how pointless this way of thinking is: immigration from countries with a low level of education – especially from Muslim non-EU countries – is a key factor in this development. Around 54 percent of new arrivals in Sweden can neither read nor write. [Source in German.](#) The UN's analysis also does not address the problem of unemployment that will accompany the introduction of artificial intelligence. The demand for labor – whether skilled or not – will simply decrease.

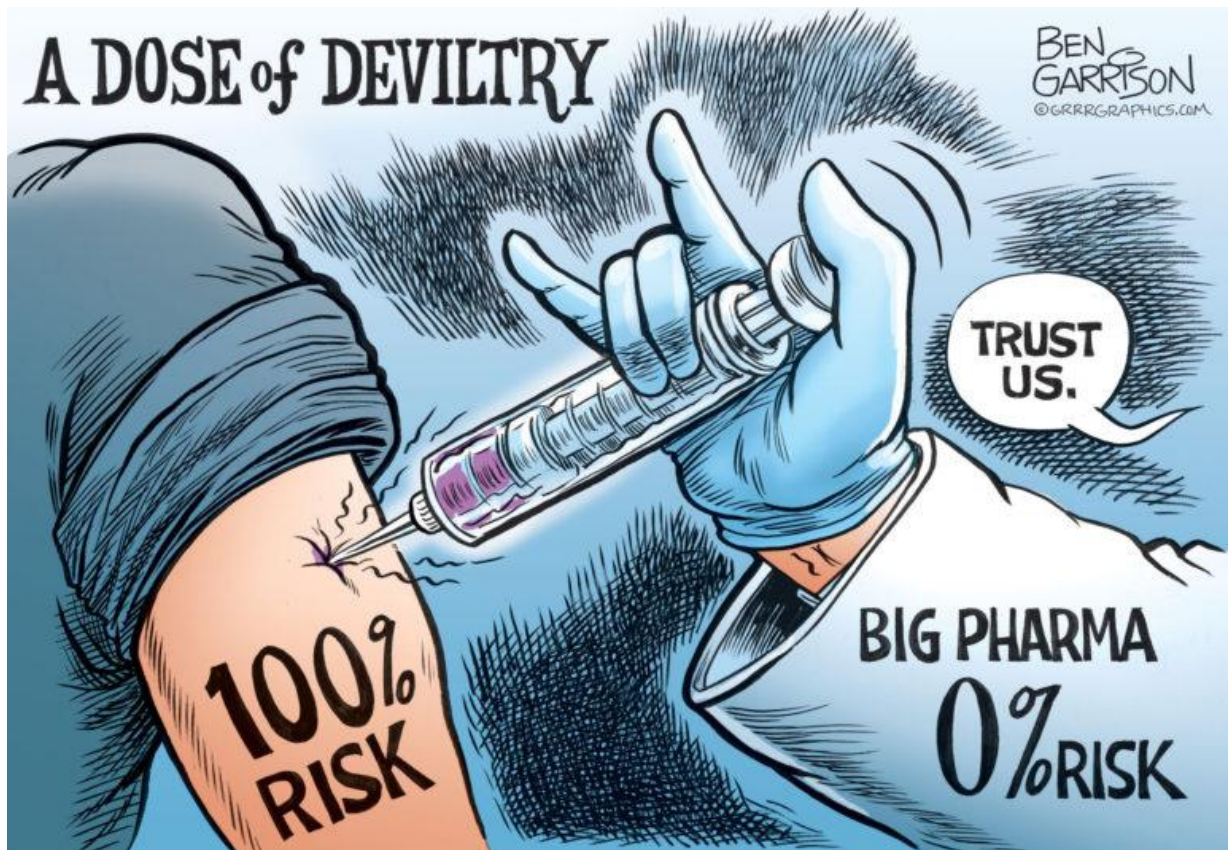

The problems associated with refugees, both in the countries where these people appear and in their own countries, are not mentioned in the report on replacement migration.

848. Higher risk

Vienna 01/29/2025

Today, Robert Kennedy Jr. will appear before a Senate committee to confirm his nomination for US Secretary of Health and Human Services. The organized crime organization, also known as the pharmaceutical mafia or drug cartel, will do everything in their power to prevent Robert F. Kennedy from getting this key position in the US government for their business.

An article appeared Monday on childrenshealthdefense.org: [‘Jaw-dropping’ Study Finds Vaccinated Children Have 170% Higher Risk of Autism.](#)

A total of 47,155 9-year-olds in Florida were surveyed. For readers who prefer concrete figures:

- The relative risk of developing a neurodevelopmental disorder grew as the number of doctor’s visits that included vaccinations increased. Children with just one vaccination visit were 1.7 times more likely to have been diagnosed with autism compared to those who were unvaccinated.
- Children with 11 or more vaccination visits were 340% more likely to be diagnosed with autism compared to unvaccinated children and 89% more likely to be diagnosed with autism compared to children with one vaccination visit.
- Vaccinated children who were born preterm were 258% more likely to be diagnosed with at least one neurodevelopmental disorder, compared to children born preterm who remained unvaccinated. Nearly 40% of vaccinated preterm children were diagnosed with such a disorder, compared to 15.7% of those who were unvaccinated.
- Vaccinated children were 419% more likely to be diagnosed with encephalopathy (brain inflammation), 525% more likely to develop tic disorders and 581% times more likely to have a learning disability, compared to unvaccinated children.

- Among children born preterm who were subsequently vaccinated, the risk of brain inflammation and learning disabilities grew by 612% and 884%, respectively.

The supporters of the theory – health through vaccines – need not fear that Kennedy will hinder their further “treatment options”. He has no such plans. As health minister, he wants to abolish compulsory vaccination and introduce hefty fines for the fraudulent advertising of these pseudo-medicines. Unlike most of you, he will not tell anyone how to promote their own health.

The only widely known, healthy form of vaccination.

849. Disgruntled billionaire

Vienna 01/39/2025

Psychopaths should be treated by specialists for this type of illness. This prescription is completely useless if the psychopath has managed to acquire a fortune and political influence. I know many people for whom Mr. Gates is undoubtedly a psychopath. Probably most of my readers have a similar opinion.

This psychopath's plan was to multiply his fortune and become the world's greatest philanthropist in the process. Side effects of this plan such as depopulation fit perfectly with his family's entrenched obsession with eugenics. Bill Gates' recipe for saving the world includes reducing the total population of the earth to about 500 million obedient slaves. What about the remaining 7.5 billion 'useless bread eaters'? *I'll take care of that*, said the philanthropist and energetically set about implementing these plans. *Vaccines will save the planet!*

Here you can see how Bill Gates is funding the manufacturers of SARS-COV2 to profit from the vaccines he invested in before the pandemic, while empowering the WHO and Gavi – in which he has also invested heavily – to sell these vaccines worldwide.

Mr. Philanthropist himself, even if he had raised more money, would not have been able to accomplish this work of destruction throughout the world. For this he needed subordinate governments around the world, the media and the silent enslavement of candidates for disposal who are used to passivity.

Subordinate governments? That's what Klaus Schwab has been doing in Davos for 30 years. He has trained thousands of politicians, and obstacles such as elections do not stand in his way, as practically every major party is dominated by his people.

And the media? It's just a question of money, and they will all piss together under the dictates of the globalists.

The consent of the majority of people is not a problem either, as the queues outside vaccination centers around the world have shown. All it took was a bit of scaremongering and the promise of bratwursts as a reward for accepting the preparation, and that too was successfully fobbed off.

Who wouldn't reach for world power under such conditions? Probably only a pervert who believes that people are only men and women.

That was the case five years ago, but time moves on and virtually all of these favorable conditions have changed dramatically.

Governments have emerged in many countries that have escaped the control of the globalists. Some of them, like the USA, are waging open war against the ideology and influence of Davos. They were able to save Romania, but here too it is unclear how long this will last.

Until five years ago, the power of the media was unassailable. Due to the notorious repetition of lies, the ratings of these one-sided harbingers of the only truth have fallen dramatically. Some of them are threatened with bankruptcy and are only being held back by donations from panicked globalists. Strong online competition has emerged. This blog is one of thousands that operate in a similar way. This month, the number of visitors to world-scram.com once again exceeded 200,000 page views. That's not much compared to the hundreds of millions of X users, but every article on a blog like this prevents global disinformation censorship.

The silent support of the silent sheep has turned into loud protests from more and more people around the world who have seen through this ocean of falsehoods presented to them as the great truth.

When I saw this picture, I started to think for myself....

What will our great philanthropist say? He has just been [outraged by an evil US billionaire who publicly supports the wrong political forces in Europe. Source.](#)

One may now ask which of the billionaires is more interested in “saving lives” – **the one who promoted experimental gene therapeutics in the fight against a flu-like disease and considers child-raping Pakistani gangs negligible**, or the one who, in addition to all his activities and projects, also finds time to denounce grievances such as life-destroying migrant crime and the ignorance of the authorities. In any case, Gates sees himself as a good person who is portrayed as the anti-Christ for wanting to help. It is probably a matter of definition as to what “helps” and what does not.

850. Deep state in deep panic

Vienna 01/31/2025

After the first blow against the 51 lying spies on the day of his inauguration on Monday, January 20, Trump's second, far more painful blow against the Deep State followed a few days later. On the night of Friday, January 24, Trump caused a veritable political bloodbath among exponents of the "deep state" with the immediate dismissal of the inspectors of important US federal agencies and ministries, thus reaching a new dimension, as can be seen from the reactions of the US Congress. Quote from an article on apolut.net: [Trump is driving the Deep State to panic. Source.](#)

The proponents of the theory that Donald Trump is a puppet of the Deep State don't even bother to read the article that is served to them on a platter. That could be dangerous! Better to hide in a mouse hole and wait, maybe then I won't have to admit to myself that I was wrong? The most factual argument I received from them: **hahahahahahahahahahaha !!!!!**

The best place for politicians is the election poster.
It is bearable, quiet and easy to remove.

Trump will change nothing – scream the opponents of every election. Stay at home and don't be fooled by democracy! Don't make crosses or they'll make crosses over you! Safe – sit still and keep your head down. It's safer that way. The Yanks elected Trump and now they have theirs!

After all, he's not changing anything – he's obeying those he just fired and preparing them for trial for treason. A little more and we will have new emigrants in Europe – this time from the United States. They will be politically persecuted former officials of the FBI, the Department of Defense, the CIA and various other three-letter organizations.

As usual, when we laugh – somewhere in the world a problem dies.

At a time when Donald Trump is destroying the European Union and reducing its role to non-existence by banning all contact with this globalist entity and preferring bilateral meetings with representatives of the states of this totalitarian conglomerate, the Union has one thing in common with the United States: The pervasive corruption has a common name: the lobby, which is legal.

I fear that now that all 200 planned decrees against the Deep State have been issued and this politically malignant cancer no longer has any geopolitical relevance, voices will continue to be raised that this is all just happening to lull our vigilance – the Deep State cannot be defeated, after all. Victory will certainly not be followed by an era of eternal happiness, but we as humanity will be rid of one of the most dangerous misfortunes, namely the Deep State with its gray eminences.

851. The drowning man reaches for the needle

Vienna 02/01/2025

The puppets of the European Commission know that the days of their “brilliant” careers are numbered. Neither the EU nor Ukraine will have any influence on the imminent end of the war. So much money, so many sacrifices, so many efforts have been made to make this war last as long as possible. And here the two powers that actually waged this war are getting along behind each other’s backs. The Union has lost all meaning in international politics and will be forced to limit its actions to the economic sphere. The dream of a United States of Europe has been shattered with the departure of sleepy Joe Biden. Is it all the fault of that evil Trump? No, the Americans are to blame – they have not yet grown up with democracy in the sense of the EU and have elected the wrong man as president.

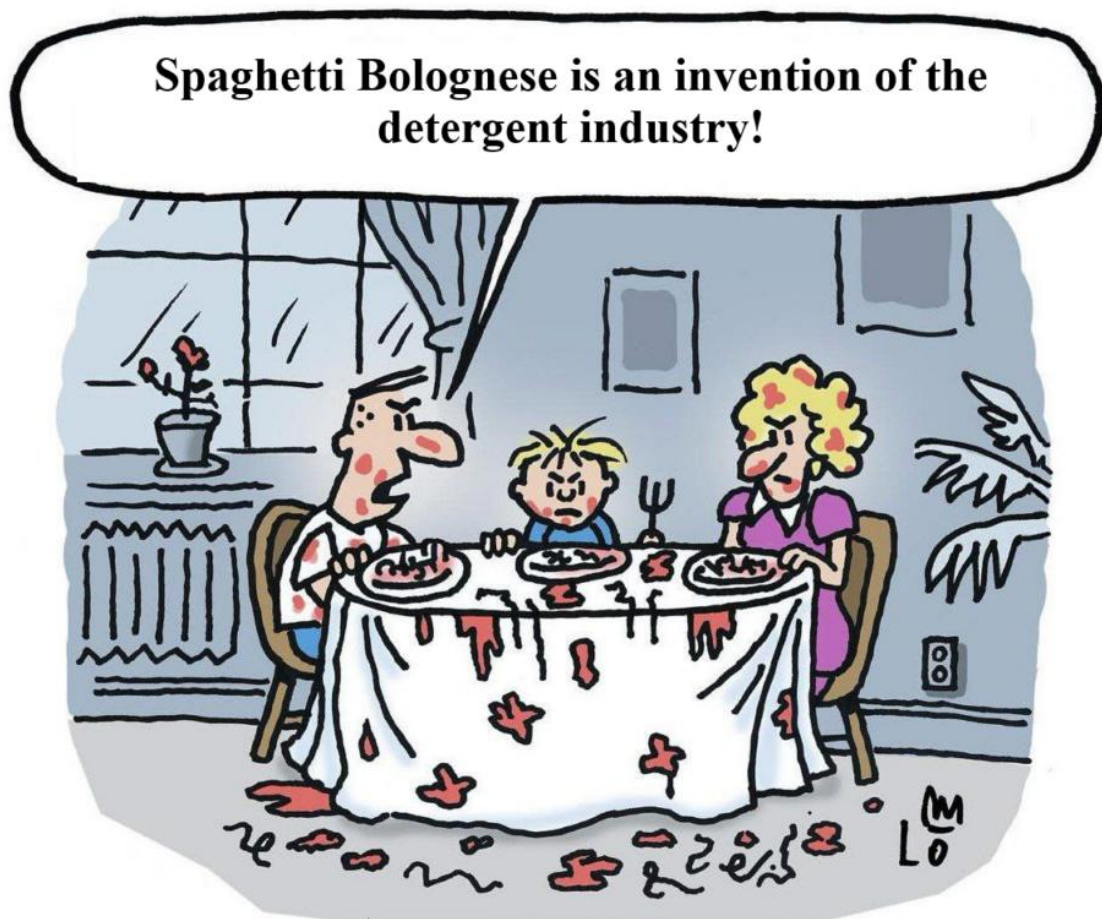

Game over – the tow rope breaks!

The drowning man grasps at straws – in this case, needles. The not-so-serious Commission has decided to go down the beaten path and buy nearly 150 million doses of Moderna's proven depopulation pseudo-disease vaccine to say goodbye to its underlings. See article for details: [Commission signs joint procurement contract for COVID-19 vaccines.](#)

The European Commission's Health Emergency Preparedness and Response Authority (HERA) has signed on behalf of 17 participating countries, including 15 EU Member States, a joint procurement framework contract with the pharmaceutical company Moderna. The participating countries will be able to order up to 146 million doses of the **mRNA COVID-19 vaccine**, as needed depending on national context and with no minimum amount of doses to be bought. The contract will run for a period of up to four years.

Austria, Bulgaria, the Czech Republic, Germany, Hungary, Italy, Latvia, Lithuania, Malta, Portugal, Romania and Slovakia are missing from the list of countries that are satisfied with this purchase. It should come as no surprise to anyone that Italy is also included – after all, it is the land of conspiracy theorists:

Conspiracy theorist family at lunch.

The extent of the division in the Eurocolkhos is shown by the 12 out of 27 countries that refused to spend money on bioweapons products already condemned to recycling. As before, Ms. Ula tacitly agreed a price with Moderna. Probably so as not to frighten her subordinates. After all, the Union has never spread fear of the Covid, of Putin and of the climate, which is best removed entirely from its influence on us through taxes.

852. Legal corruption

Vienna 02/02/2025

Corruption and bribery are very ugly words and any such activity should be prosecuted to the fullest extent of the law. However, it is enough to use another term such as lobby and the same activity is portrayed as correctly as possible, even though it means exactly the same thing.

However, there is a slight difference: if a man with a middle income goes to a government office and donates a few hundred euros to speed up a decision that will allow him to build a barn in his own backyard, this is undoubtedly bribery. In another case, if a representative of a commercial enterprise turns up at an office to get permission to build a supermarket in a national park and supports such an “application” with a certain sum in the millions, then we are dealing with a lobby. Of course I was exaggerating – I just wanted to make the difference clear. But maybe that’s not an exaggeration at all and it’s what really happens in our “just” world?

Dad, what is corruption?

I’ll tell you, but first you have to bring me 20 euros from your mother’s wallet, I want to buy vodka.

But mom said the other day that it’s time to stop wasting the family budget on alcohol!

And I’ll buy you sweets with the rest.

In the article [how much does a senator cost](#), you can find out what amount of dollars is enough to buy the vote of a US senator. In this article I also made a suggestion on how to effectively influence the decisions of the US Senate to support Polish national interests. This is not so unrealistic – [AIPAC](#) does this on a much larger scale.

Hearings were held in the US Senate for the nominee for US Secretary of Health and Human Services, Robert F. Kennedy, Jr. Those interested can watch a video of the first day of hearings in Polish.

Robert F. Kennedy, Jr. Senate Confirmation Hearing to be Secretary of Health & Human Services

The hostility toward Robert Kennedy Jr that surfaced at his hearing was directly proportional to the amount of pharma money each senator received. In fact, each of them simply repeated the same attacks we just saw in the mainstream media (all of which were brazen lies). Quote from article: [How Big Pharma funds politicians. Source.](#)

I chose this article for its language because you can learn from it how many dollars individual senators received to be so “angry” at Kennedy. There was no corruption here – not at all! – It was legitimate lobbying. At this point, I would like to paraphrase Karl Marx’s famous saying: A dollar determines consciousness....

Some see him as the devil incarnate, others as a liberator. He is simply fulfilling his election promises in his own way.

An interesting vote is coming up in the US Senate on the appointment of the new Secretary of Health and Human Services (HHS). We'll find out who is involved in corrupting – sorry, Lobbying – of respected senators more effectively.

853. Conspiracy theorists lead 37:0

Ostrzeszów/Poland 02/04/2025

The hearings of the candidates for the US government in the Senate have not yet been concluded. Amusingly, Louisiana Senator John Kennedy (who is not related to the assassinated Kennedy family members) questioned FBI chief nominee Kash Patel.

[Source.](#)

Senator John Kennedy: Sounds to me like we need some new conspiracy theories, because the old ones have all turned out to be true. Republican Senator John Kennedy, one of the funniest politicians in Washington, defends Kash Patel against accusations that he's a conspiracy theorist. He concludes: Conspiracy theorists lead about 37 to zero.

**There is nothing more disgusting than a
policeman who beats people,
than a soldier who shoots innocent people,
a journalist who lies, knowing full well that he is
lying,
and a citizen who defends the system instead of
fighting it.**

Kash Patel wrote an article in the Wall Street Journal on Wednesday: [How to restore the public's trust in the FBI](#). Source: [Telegram 30.01.2025 15:41](#) He has also promised that when he becomes head of the FBI, he will release Epstein's list that has remained hidden from us until now – i.e. everyone who visited the center for erotic orgies and child torture. Epstein himself committed "suicide" in prison. By a strange coincidence, the camera surveillance was interrupted at that very moment. Many still influential bastards are afraid to publish this list. Probably some senators too ...

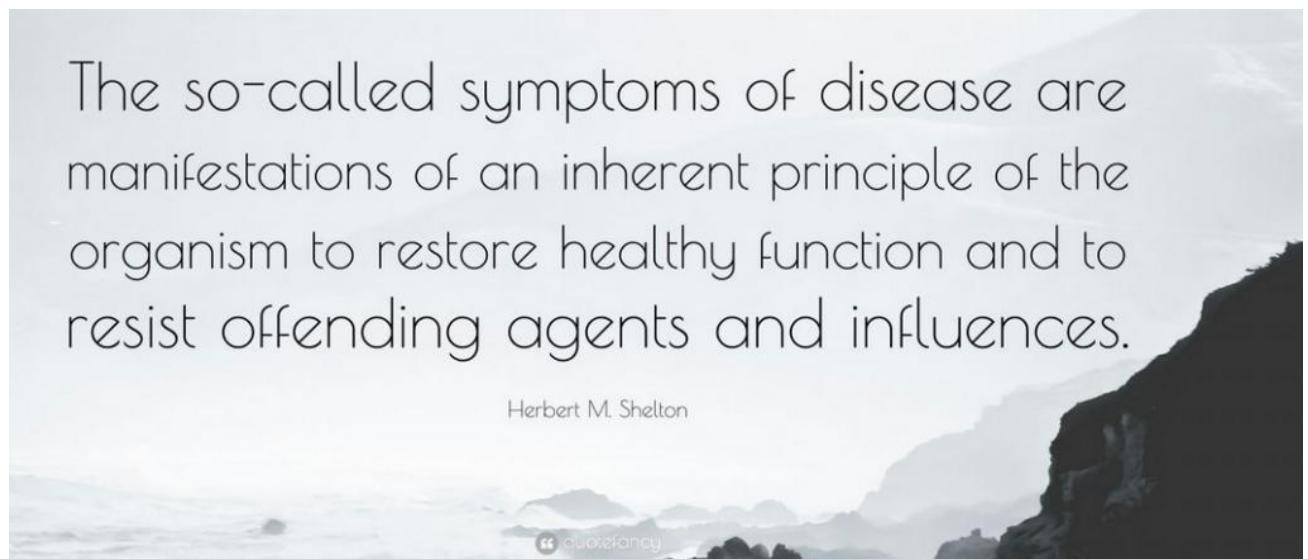

Now a new list is being drawn up. A list of refugees from the United States of Donald Trump's repressive pedophilia policy. It was such a close call when the pro-globalist forces tried to bring pedophilia into the living rooms of the world. And now comes the kicker: the supposed "heroes" of child conquest are becoming what they have always been in reality – unscrupulous criminals who exploit the powerlessness of children.

854. USAID created COVID-19

Ostrzeszów/Poland 02/05/2025

In [yesterday's article](#) on Report24.news – [the source](#) – we read: Elon Musk, the world's richest man and one of US President Donald Trump's most influential advisors, publicly announced on February 2: "Did you know that USAID used YOUR tax dollars to fund bioweapons research, including COVID-19, that killed millions of people?" The silence of the left-wing mainstream media worldwide is deafening.

The laboratories have been and are working on developing a more dangerous virus that can be controlled to a certain extent. The program to produce biological weapons is being implemented worldwide. On the other hand, it is unrealistic to rely on the unproven virus theory. It has never been seriously confirmed by science that the substances that virologists find between the cells of humans and animals, which they call viruses, are the cause of the diseases attributed to them. What we have is lip service to claims that are not supported by any solid scientific research. For more than 60 years, such viral slogans have been thrown around in medical studies and in the media. This has been enough for most doctors to repeat the formula they learned in medical school: flu is a viral disease.

FLU – is a natural process of removing excess toxins from cells.
There is no cure for the flu – the flu is the cure.

I know – the so-called fact-checkers, who are paid by USAID and others, have long since dismissed Dr. Shelton's theories as false. In doing so, they have relied on [unscientific principles](#) of virology. They might as well have relied on television reports.

The nomination of Robert Kennedy Jr. passed the Senate Finance Committee yesterday and was narrowly approved by a vote of 14-13. Once approved by the committee, the nomination will now go to the full Senate for consideration. Tulsi Gabbard also passed the Senate Finance Committee. As National Intelligence Director, Gabbard will have overall oversight of the 18 US intelligence agencies. Both appointments have yet to be voted on in the Senate.

The same people who claim that the earth is overpopulated want to save lives with new vaccines.

855. Argentina leaves the WHO

Ostrzeszów/Poland 02/06/2025

The year 2025 promises to be a year of radical change, under the banner of fighting the globalist threat to enslave the world under a global government. Yesterday, Argentinian President Javier Milei announced that Argentina will join the US in withdrawing from the WHO's Sanitary Slavery Organization.

City of Buenos Aires, February 5, 2025.- The Office of the President informs that President Javier Milei has made the decision to withdraw the Argentine Republic from the World Health Organization (WHO). Beginning of the [message by Javier Milei](#), published on [thegatewayapundit.com](#).

Today the evidence indicates that the WHO's prescriptions do not work because they are the result of political influence, not based on science. It has also confirmed its inflexibility to change its approach and, far from admitting mistakes, it chooses to continue assuming powers that do not correspond to it and limiting the sovereignty of countries.

Pale fear has descended on the former [terrorist](#) head of the WHO. Not only the lack of funds for the sanitary enslavement of the world, but also the beginning of an avalanche of resignations from this criminal organization hangs like a sword of Damocles over Tedros Adhanom Ghebreyesus and his followers. That sounds nice and pleasant, but behind it is the work of thousands of courageous and intelligent people who are fighting against the WHO treaty and lawlessness. Without their work, the crimes committed by the WHO would not be widely known.

We are on the verge of more countries leaving the WHO whose authorities have the courage to stand up for their own citizens. In my opinion, Hungary and Slovakia are such candidates in Europe. Italy is also considering the option of leaving this false path to universal health. In the end, only

China (not the Chinese) – whose candidate for WHO chief is the current criminal – will remain a loyal and probably the only member of this failed organization.

[Candace Owens](#) – Wikipedia’s biased opinion is a guarantee that Candace Owens is correct. She is able to respond with vigor and humor to the conspiracy theorist’s much-quoted, much-abused claim:

Meat unhealthy, fat unhealthy, smoke harmful, only GMOs healthy....

856. Giant construction of lies

Ostrzeszów/Poland 02/08/2025

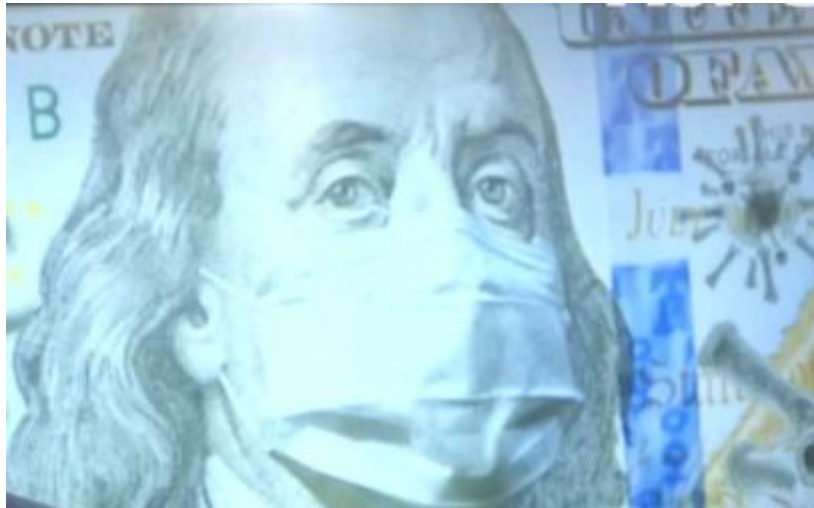

More than 100 years ago, scientists tried unsuccessfully to find out how diseases such as influenza are transmitted. Properly conducted scientific studies with a control group were unable to detect influenza infection, starting with healthy people living with a sick person, through all the intermediate steps to injecting healthy volunteers with the blood serum of infected people. I have described these studies in the article [Spanish flu](#).

Of course, infectious diseases are transmitted in some way, but the droplet method, which is so widely advertised, is neither the actual nor the only method by which people are actually infected.

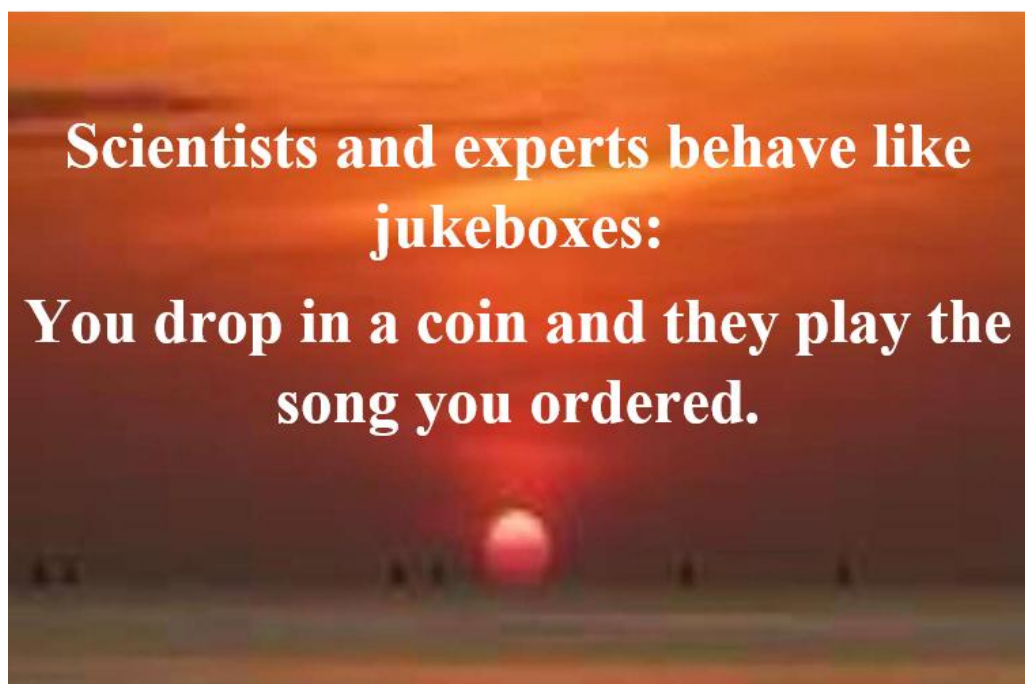

Introduction to the article: [The big lie about viruses being the cause of disease](#) – [Source](#). The fact that viruses are the cause of infectious diseases has been suggestively etched deep into people's consciousness and is taken for granted by science. This theory has been used to stir up fear and panic and artificially create the appearance of a pandemic, in which those in power believed they could largely override the current attempt at democracy in a totalitarian coup d'état from above. Enlightenment is therefore of the utmost importance, not only medically but also socio-politically. It is part of the still desperately denied public reappraisal of the unprecedented totalitarian monstrosities of the coronavirus crisis.

Lies are known to have short legs and lead to many contradictions. This also applies to viro lies. It is long overdue to recognize that other concepts are needed to plausibly explain infectious diseases. Any theory without significant involvement of the immune system of the diseased organism is misleading.

Despite the lack of any evidence, the virus – this pseudoscientific fairy tale instilled over decades – is not only spread via the media among medical laypeople, but also among unsuspecting and uncritical doctors and medical professors. The naïve belief in lies does not explain the administration of antibiotics or substances classified as antiviral by the pharmaceutical mafia industry to the detriment of the patient.

When Napoleon promoted the smallpox vaccination of his soldiers because he hoped it would give him an advantage over an enemy who did not use such “modern” measures, he had no idea that it would contribute to the decimation of his army. The uncritical approach to the idea of vaccination as a biological weapon – both to attack the enemy and to protect his own people – was the cause of the Spanish flu, which claimed more than 20 million lives 100 years ago. The First World War cost the lives of more than 14 million people.

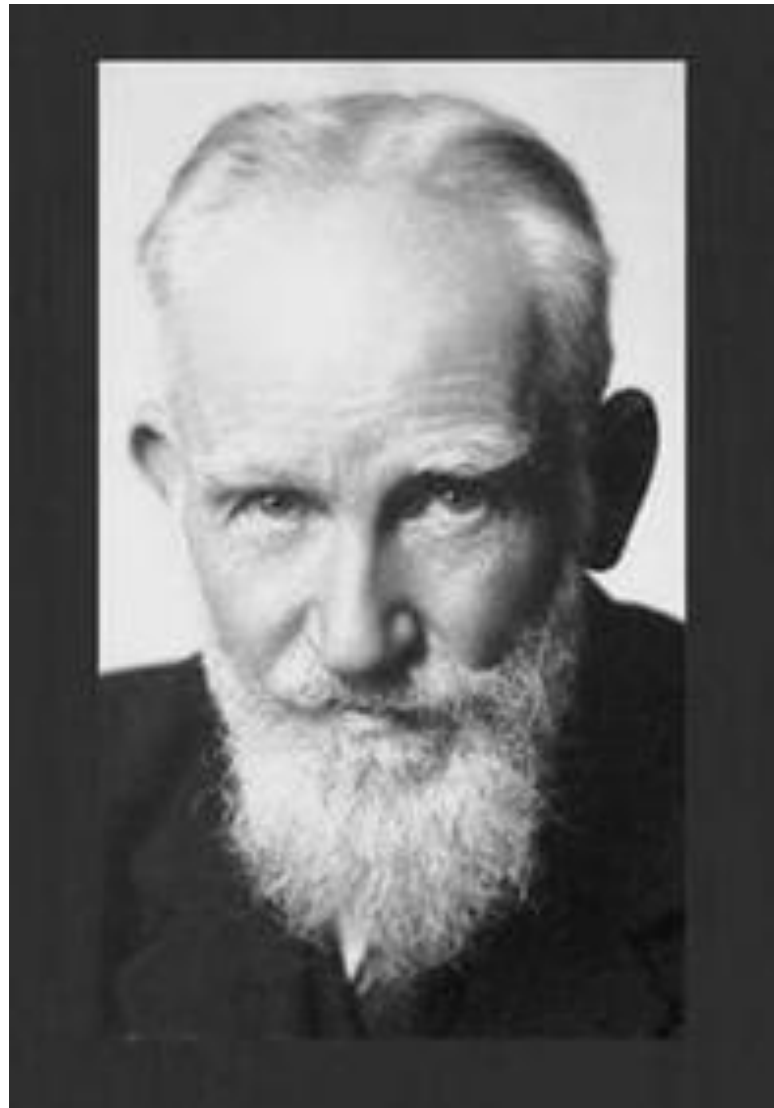

Today, it is difficult to prove that this was a deliberate depopulation of the world. Instead, there is clear evidence that the war against the world under the “crown” of the globalists was to combat the overabundance of people in the world. The documented death toll from pseudo-vaccines has long exceeded the casualty figures of the First World War. When you consider that this was just the prelude to mass genocide, it’s easier to believe in the real threat to humanity posed by Mr. Gates’ “philanthropy”. Guess why the world’s largest vaccine manufacturer needs the largest agricultural

land in the US? Perhaps the mention of famines ravaging humanity and decimating the population makes it easier to find the answer?

Between 1876 and 1878, the so-called Great Indian Famine claimed up to 10 million lives. Today it is sometimes referred to as a deliberate genocide by the British or even a “Victorian Holocaust”.

[Source.](#)

It is estimated that the Irish population fell by 2.5 million people during the famine of 1845-1851. In 1841, there were over 8.1 million people living in Ireland. It is estimated that these figures would have been 9 million under normal circumstances. Instead, there were 2.5 million fewer after the famine – 6,552,000. [source.](#)

857. Global civil war

Ostrzesów/Poland 02/09/2025

What is going on in US now it is real civil war. Nobody shoots, but the war is here. Yesterday attack of Musk's DOGE squad on headquarters of USAID is historic raid against the extremely powerful enemy and take over of it. That is incredible. But that is not only American Civil War. It is global civil war because USAID is center of global power with its ramifications in all countries of the world. Dems coming to defend USAID on the streets are just branch of the network of color revolutions. Alexander Dugin wrote in an article on Wednesday: [The Deep State Exposed: USAID's Secret Archives](#).

In this short article, Alexander Dugin describes the war of global forces against humanity that has been raging for several years. We are currently witnessing a battle between the Donald Trump administration and the largest "army" in the hands of the USAID globalists. This is that war. This blog is dedicated to aspects of that war. Hence its name: fraud on a global scale. First and foremost, it is a war against our way of thinking about the world. That's why we hear the outcry from the suddenly bereft organizations that manipulate public opinion after Trump's strike against the overarching organization that distributes these funds.

The media argue with his call for the restoration of media resources: USAID saves lives.

I will support Trump as long as he fights our greatest enemy. We can call it the Deep State, the globalists, the swamp – the name is irrelevant. These are the people who are gripped by the delusion of ruling the world by their rules. Of course I am against the USA taking over Canada, Panama or Greenland. I also believe that a tariff war is not a good way to improve a country's economic situation. But what I am most opposed to is Trump's idea of solving the Palestinian problem by deporting their entire population from the land they have lived in for thousands of years.

But did these threats come true? The tariffs on Canada and Mexico only lasted a few hours. The reaction of the markets forced Trump to withdraw the idea. Greenland, Canada and Mexico have not been overrun by the US military. I am confident that Trump's threats will change as soon as the new ministers in his administration are sworn in. Bill Gates can threaten himself with the dreaded pandemic – he doesn't get money for health propaganda from USAID anyway.

The surprised look on Israeli Prime Minister Netanyahu's face when he learned that the US would take control of the Gaza Strip was amusing.

This really is a global civil war. Influential and wealthy people – wrongly called elites – have planned the entire course of this war down to the smallest detail. What they didn't plan, however, was that their assassination attempt on Trump would end in hopeless defeat. We should not make them into all-powerful gods, because they are not. To claim that everything is a matrix planned by them misses the truth. They are fallible and powerless in many ways. They are also undecided about how to react to Donald Trump's anti-globalization policies.

This Eternal Helmet was given to Donald Trump by the Japanese Prime Minister, who probably hoped that he would really give it to the last samurai.

A win-win situation. Now Trump has the helmet and Japan has no tariffs.

858. The cruel everyday reality of depopulation

Ostrzeszów/Poland 02/10/2025

A contribution of a paramedic on X causes a stir and goes viral. In the explosive text, he describes what he and his colleagues see in daily use: an alarming accumulation of unexpected emergencies – including sudden cardiac arrests, strokes and mysterious blood clots, often shortly after an mRNA vaccination. You see these tragedies every day and you are not allowed to talk about it. Lifeguard's account in Friday's [Uncut-news article](#). [Source](#).

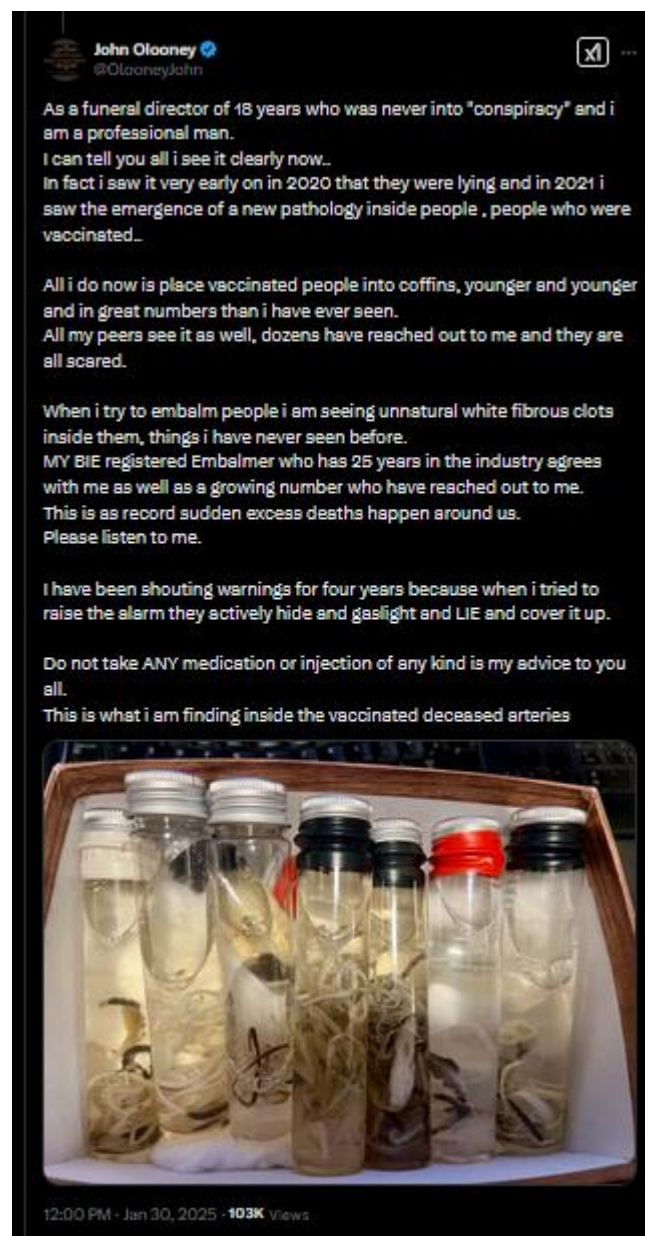

It is better to be alone than to join the herd.

Soon all of us will know someone who has died of corona – threatened the then Austrian Chancellor in the media five years ago. [Source](#). Today, everyone knows someone who has died as a result of a coronavirus vaccination. Supporters of vaccination are outraged: how can natural deaths be blamed on vaccines that save lives? After all, it is natural for a five-year-old child to die of a heart attack or thrombosis a week after being vaccinated. Just as natural is the epidemic of an extremely malignant tumor, previously unknown to doctors, commonly referred to as turbo cancer. And what about the fact that 2021 is the first in a series of years with excess mortality – after all, the vaccines saved us from a flu-like virus with a crown on its hypocritical head.

John Olooney, a mortician, sounds the alarm:

As a funeral director of 18 years who was never into “conspiracy” and i am a professional man. I can tell you all i see it clearly now.. In fact i saw it very early on in 2020 that they were lying and in 2021 i saw the emergence of a new pathology inside people , people who were vaccinated..

There are revelations in the media – including the anti-system media: Donald Trump has signed an executive order to purchase 2 million doses of mRNA vaccines. News that is as much a reality as setting up an emergency fund is a purchase. At a time when the fate of the future Secretary of Health and Human Services in the US is being decided, this kind of “news” could help convince senators who are supporters of the miracle elixir administered with a needle to vote for Kennedy. I agree – that’s not fair! Trump is a pragmatist and can call [Netanyahu a son of a bitch](#) to accomplish a goal. At least the bombing of Gaza has been suspended. What a ceasefire – it is, but let’s consider the fact that Netanyahu is exactly as Trump described him.

We have no choice but to turn on our own lie detectors by reading or watching the non-mainstream media. Perhaps it would be good to have such a bullshit detector, although I think it would do the same thing as propaganda – it would allow us to delegate the task of thinking for ourselves and checking the accuracy of information to someone or something else.

There are groups/channels where you won’t find information about Plandemi and Sprites, oil on the brain, the grassroots movement and many others – think about it.

859. 30 years of lies about the Middle East

Ostrzeszów/Poland 02/11/2025

Not all journalists have sold out to USAID. Jonathan Cook is an award-winning British journalist. He lived in Nazareth, Israel, for 20 years. He returned to the UK in 2021. On Thursday he published an article on antiwar.com: [Thirty years of lies about the Middle East keep getting back at US](#). An excellent source to expand our knowledge of the authentic mechanisms of Middle East politics.

Many of you probably believe that Israel has occupied the Palestinian territories since 1948. And that is indeed the case. However, the situation in the Middle East is much more complex. You don't have to study Middle East politics to find out important, reliable information about the policies of Israel and its allies behind the scenes. However, such a study in no way guarantees that one will learn the truth about these policies. However, taking 15 minutes to read this article is enough to refresh your knowledge of the history of the last three decades, a history that concerns a state located in occupied Palestine.

The story: *Did you believe it in 2003 when they told you that there were weapons of mass destruction in Iraq that could destroy Europe in minutes? That Iraq's leader, Saddam Hussein, was the new Hitler, and that he had allied with al-Qaeda to destroy the Twin Towers? And that for those reasons the US and UK had no choice but to invade Iraq pre-emptively, even if the United Nations refused to authorize the attack.*

The reality: For years, Iraq had been under severe sanctions following Saddam Hussein's foolhardy decision to invade Kuwait, and upset the regional order in the Gulf designed to keep the oil flowing to the West. The US responded with its own show of military force, decimating the Iraqi army. The policy through the 1990s had been one of containment, including a sanctions regime estimated to have killed at least half a million Iraqi children – a price the then-US secretary of state Madeline Albright famously said was "worth it".

The majority of the population does not understand what is really going on.
And they don't even have a clue that they don't understand.
Noam Chomsky.

It's not that the media has been lying to us for the last five years – they always have. In the last five years, they have synchronized these lies to speak with one and only one real voice. They've been preparing for this for two hundred years – since the beginning of spreading opinions with a little addition of well-chosen information that appears in the headlines as sensational news.

This “statesman” seized the opportunity and “lost” 100 billion dollars – to the glory of the fatherland!

Proponents of a holocaust for the Palestinians use the argument that Israel has the right to defend itself against Hamas terror! The problem is not the right to defend itself – the problem is that Israel invited Hamas to do so, enabled the attack, [fired on its own civilian population](#) and financed the operation. In retaliation, the occupying state of Palestine is implementing Third Reich-style plans to exterminate the Palestinian people who stand in the way of Israel's “freedom” in the occupied territories. Why are civilians being killed and Hamas not weakened at all? Because Hamas is a tool for Israel to support this holocaust.

Israeli military aircraft generally bring death. However, there are exceptions – a dead Palestinian is brought back to life at the sound of an anti-aircraft siren.

Working in the propaganda industry can be dangerous!

I showed this last movie – even though it contradicts what I wrote – to demonstrate that all sides in this conflict use lies to achieve their goals. We don't need artificial non-combatants to demonstrate the Holocaust – there are plenty of real ones. It's just the laziness of journalists that sometimes leads to comical results.

860. A climate betrayed

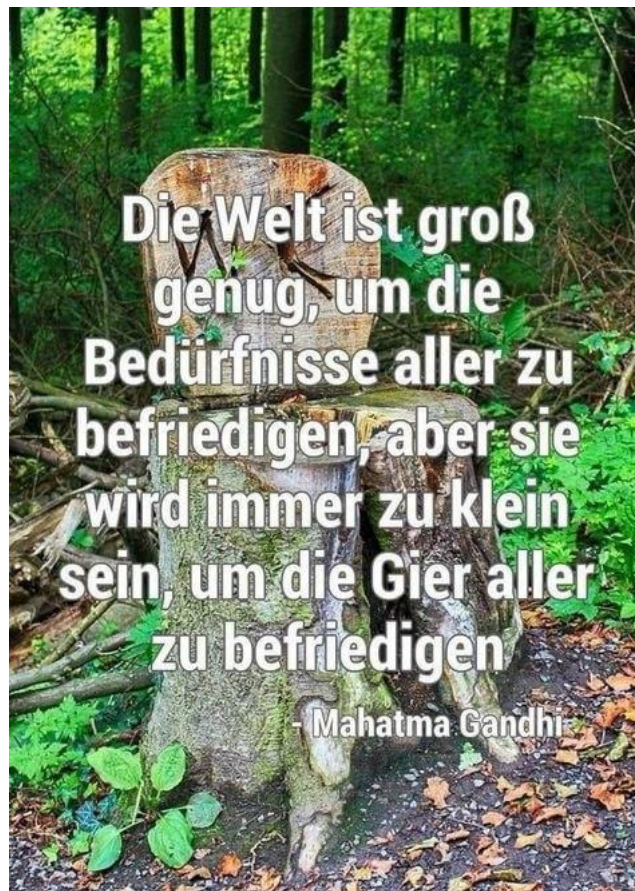

Ostrzeszów/Poland 02/12/2025

The U.S. shift away from climate madness has set in motion a global process of a new narrative that has taken the Black Peter curse off carbon dioxide.

Indonesia also wants to withdraw from the controversial Paris Climate Agreement. The costs of the associated energy transition are simply too high for the developing Southeast Asian country. A global trend reversal is emerging, while the EU continues to cling to its disastrous “Green Deal” – We read in an [article by Report24](#).

Betray the last generation of deluded narcissists blocking traffic, once dangerous for the environment and no longer. I see a certain similarity here when 3 years ago Putin defeated a virtual virus with a real war.

Drill baby drill! – Donald Trump’s slogan to promote drilling for fossil fuels. Even BlackRock – the globalist treasure trove – picked up the gauntlet and also abandoned the climate crisis mantra. The European Union was obviously caught off guard by this development, as it is still logistically stuck in the earlier era of the CO2 war. No wonder, as Ms. Ursula has once again ordered non-compliant mRNA pseudo-vaccines with our money.

The world is big enough to meet the needs of all people,

861. Approved by the US Senate

Ostrzeszów/Poland 02/13/2025

Nevertheless, yesterday – not so long ago still active supporters of the Democratic Party – were confirmed by the Senate for key positions in Donald Trump's Republican administration.

Both Tulsi Gabbard, nominated for the post of Director of National Intelligence (DNI), and Robert Kennedy, nominated as US Secretary of Health and Human Services, were confirmed by the United States Senate on Wednesday. The Senate, made up of 53 Republican and 47 Democratic politicians, voted 52 to 48 in favor of Gabbard and 53 to 47 in favor of Kennedy. Both had previously been members of the Democratic Party. The politicians nominated by US President Donald Trump were the subject of extensive public debate and hearings in the relevant Senate committees. With their confirmation by the Senate, Gabbard and Kennedy have cleared the final formal hurdle for their respective inauguration. German Multipolar writes, in yesterday's article: [US Senate Approves Gabbard and Kennedy. Source.](#)

The magazine [Multipolar](#) became famous because it won a case in a German court against the Robert Koch Institute forcing the institute to publish [internal transcripts of discussions](#) about decision-making in the fight against the pandemic. This is one of the world's most important documents about the Covidien scam. It shows unequivocally that the decisions on countermeasures were imposed by politicians and not supported by scientific research.

The world belongs to those who have the courage to think differently.

Tulsi Gabbard will act as the contact person and will process and transmit the most important messages coming from the secret service. These reports will be received by the President and all employees of the administration who have a right of access to such information.

Tulsi Gabbard is sworn in as Director of National Intelligence.

The new US Secretary of Health and Human Services will not ban the distribution of all vaccines. Unfortunately, he won't. In my opinion, that would be the best step to restore the health of Americans. He won't do it because there are still a large number of people who would panic if they couldn't inject another dose of a drug called a vaccine. I am confident that he will abolish all laws requiring vaccinations, including those for children. Parents will now take responsibility for the health of their charges as well as their own. We know from experience that not everyone is told the truth about the harms and lack of benefits, not least in relation to vaccinations.

If I were Robert F. Kennedy, I would initiate a series of studies on so-called drugs and vaccines, especially those that frequently cause deaths or serious complications. I would also ensure that these studies were carried out by researchers who were truly independent of the pharmaceutical mafia and funded by the state. Any attempt to bribe such researchers must be punished with a penalty many times higher than the bribe itself, and the penalty would only apply to those who give bribes as long as the bribe recipient reports the attempted bribe. I would even put up for discussion the right of the reporting party to withhold such a bribe. It is not denunciation if it is an attempt to commit mass murder with harmful substances. If such a scientist is offered a bribe, it shows that the results of his research are extremely important for the health of patients.

I'm sure Kennedy has thought about ways to heal healthcare more than once. He's talked about it more than once. He will also have the FDA – the government organization that approves medical products as well as food – under him. Modern medicine, which is the third leading cause of death in the world after heart disease and cancer, has been shaped by the Rockefeller clan for more than 100 years. The new US Secretary of Health and Human Services will have a very difficult, but not impossible, task. It will be easier in a situation where virtually all government departments are supporting the restoration of a healthy America.

862. The new head of the FBI

Ostrzeszów/Poland 02/14/2025

Kashyap “Kash” Pramod Patel, son of Indian immigrants and US lawyer, passed a Senate committee on Thursday and has a good chance of being appointed head of the FBI soon.

We’re going to go out and find the conspirators – not just in the government, but in the media ... we’re going to hunt down the people in the media who lied about American citizens, who helped Joe Biden rig the presidential election ... We’re going to hunt you down. Criminally or civilly, we’re going to find out. But yes, we’re bringing this to all of your attention, and Steve [Bannon], this is why they hate us. That’s the reason we’re bullying. That’s why we’re dictators ... Because we’re actually going to use the Constitution to prosecute them for crimes that they say we’ve always committed, but we never have. [Source.](#)

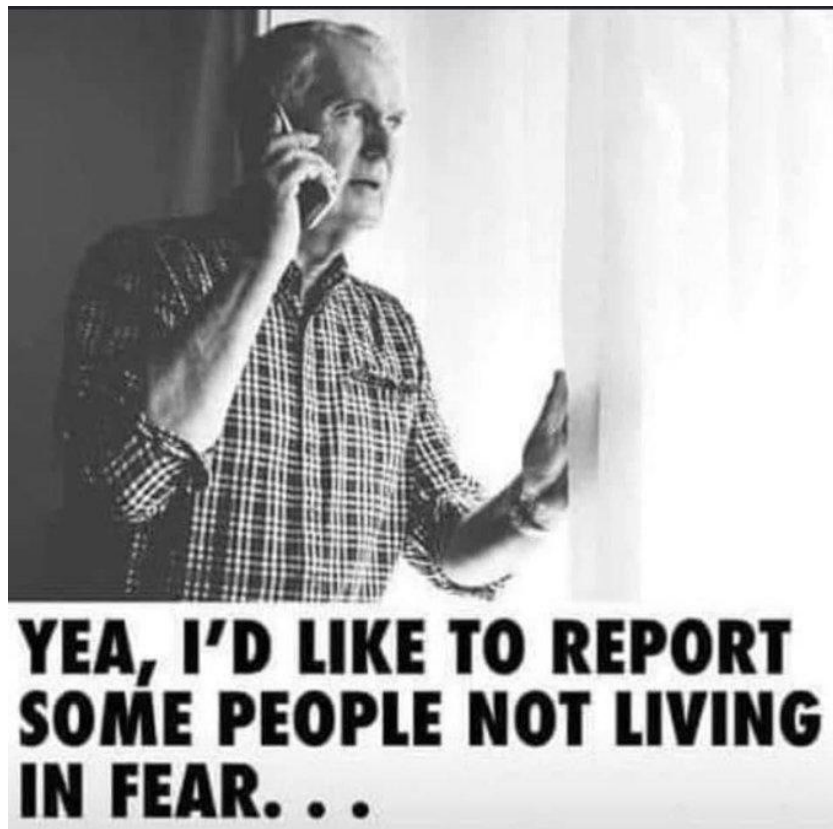

No wonder the conspirators using the January 6, 2021 protest and the election fraudsters are in trouble. They probably believed their own lies and are now convinced that the new head of the FBI will run the same scams they did. Such people are incapable of imagining that they can still be prosecuted by legitimate legal means.

His enemies are powerless! There is no point in using the hackneyed term “conspiracy theorist” to describe Patel. It is much more appropriate: conspiracy investigator. Isn’t detecting conspiracies one of the important tasks of the federal police? With people like Kash Patel, it will be possible to get rid of the Deep State – the boil on the butt of all previous White House administrations. Even during

Donald Trump's previous presidency, Anthony Fauci style crooks advised the president and created situations that could not be responded to otherwise without risking a crisis of power.

It's time for them to start being afraid.

We will not forget the cruelties of the sanitized era. We will not forget the eyes of the children who were forced to be examined and wear a rag that prevented them from breathing. We will not forget the forced loneliness of the elderly who are isolated from their loved ones.

Never forget what they did to us!

It is not time to take revenge, it is time to make this time of contempt, fear and humiliation fair. This is only possible if we hold to account those who are responsible for decisions that divide people into the vaccinated and the unvaccinated, the “solidarians” and the unsolidarians, the thinkers and the unthinkers who repeat the television lies.

The purpose of propaganda is to make one group of people forget that other groups are people too.

863. The defeat of the European illusion

Ostrzeszów/Poland 15.02.2025

With the signature of the current US President, the European Union has been abolished as a diplomatic partner. From now on, the US will only hold bilateral talks with each of the 27 countries in this bureaucratic conglomerate. The importance of the Brussels Eurocrats is reduced to a function bordering on the ridiculous as puppets watching their own demise.

Olaf Scholz at the Munich Security Conference.

The European Commission's role in the warmongering in Ukraine is well known. Today, the outgoing German puppet chancellor Olaf Scholz announced in a speech at the Munich Security Conference that Germany will not recognize any peace talks between Washington and Moscow on the war in Ukraine. Peace is to be signed in May of this year at the latest, and neither Germany nor the Colchos Union will have any say in the matter. And that is what hurts these bureaucrats the most – an exit into the dustbin of shameful history.

“If American democracy can survive ten years of Greta Thunberg, then you can survive a few months with Elon Musk,” explains JD Vance in Munich, settling accounts with German politics. Migration is the most burning issue – in a democracy there is “no room for firewalls”. In yesterday's Apollo News article we read: [In Munich, Vance demonstrates Germany's political class.](#) [Source.](#)

Germany is seething like a beehive. The hypocrisy of German politicians is reaching its peak. They have contributed significantly to the failure of the coalition negotiations in Austria and are even accusing American politicians of interfering in Germany's internal affairs during the election campaign. Elections will be held in Germany next Sunday, and the representatives of homogeneous parties from the extreme left to the pseudo-conservative CDU-CSU will experience a nightmare when they are confronted with the growing popularity of the only party in Germany seeking real reform – the AfD.

864. DOGE on the trail...

Vienna 02/17/2025

The pale fear has spread to the employees of the deep state in Washington. These are the same people who have tried to intimidate us with a made-up virus, an ecological hell on earth and the wars they have caused. Things are coming to light that should be hidden from us forever.

Department of Government Efficiency (DOGE) – has already saved more than 100 billion dollars.

Elon Musk explores the truth with the power of a chainsaw, and DOGE reports on X (only part of it below). US taxpayer money was supposed to be spent on the following projects, all of which were canceled ([source](#)):

- USD 10 million for the "voluntary medical circumcision of men in Mozambique";
- USD 9.7 million to UC Berkeley for the development of "a cohort of Cambodian youth with entrepreneurial skills";

865. Where is Germany heading?

Vienna 02/18/2025

Next Sunday, what I consider to be the most important federal election in German post-war history will take place in Germany. I will not be making the often manipulated predictions here, nor will I be recommending a vote for the Germans. If you are taking part in this election and reading this article, you know very well that only one party is taking part in the election that has a chance of changing the suicidal course of current German politics.

Serious consequences for Europe! “Germany is being ruined. – But there is silence about the causes!” Germany is being systematically deindustrialized. The USA is launching a huge attack on the EU and its strongest state. But what role are German politicians playing in this and who is acting in the background? Will Merz usher in an economic turnaround as future Chancellor? Or are they all acting like contract killers for German industry? KLa.TV reveals that this is not a conspiracy theory at all, but proven reality. But: There is legitimate hope! Because it is not the upcoming federal election that will decide Germany’s or the EU’s future, but ... [Source.](#)

The best Germany that ever existed – that’s what current German President Steinmeier called his country, applying repressions that would not have been ashamed of the German authorities at the time, the creation of the thousand-year Reich. On Sundays, cbcnews.com published an article: [Posting hateful speech online could lead to police raiding your home in this European country.](#)

The reaction of German prosecutors, who specialize in combating hate speech, to the question: How do people react when their phone is taken away from them?

If you've ever dared to read the comments on a social media post, you might start to wonder if civilized discourse is just a myth. Aggressive threats, lies, and harassment have unfortunately become the norm online, where anonymity has emboldened some users to push the limits of civility. In the United States, most of what anyone says, sends, or streams online — even if it's hate-filled or toxic — is protected by the First Amendment as free speech. But Germany is trying to bring some civility to the world wide web by policing it in a way most Americans could never imagine. In an effort, it says, to protect discourse, German authorities have started prosecuting online trolls. And as we saw, it often begins with a pre-dawn wake-up call from the police.

Such an article criticizing Germany's subservient globalist government on CBS would not have appeared in the era of the previous US president. I would hope that it is not a shift from a merely correct narrative to a similar one, only that it is in the direction of Trump's policies. Rather, I would guess that the sold-out media knows the role it has played in recent years and wants to somehow save its own skin in the new reality. We'll soon see how it turns out. You only have to look at what these media are currently living on. Advertising revenue, especially from pharmaceutical products, is likely to be severely curtailed by Kennedy. Only products that have proven themselves will be allowed to be advertised.

After the speech: German special forces stand behind J.D. Vance! A symbolic group photo with a symbolic before departure.

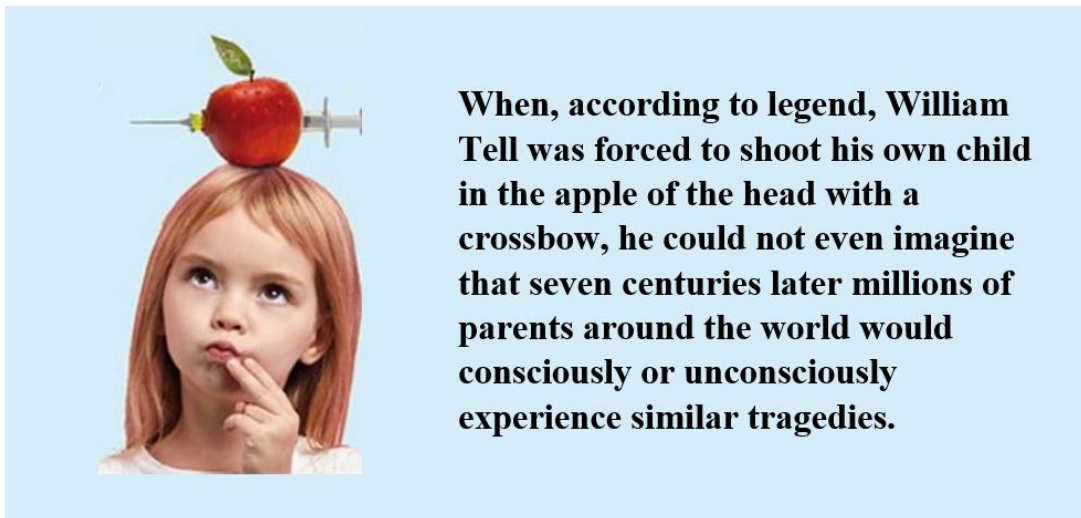

It's an open secret that the police in particular want law, order and return migration.

866. How much longer?

Vienna 02/19/2025

For more than four years, we have been subjected to widespread indoctrination telling us that the new mRNA “vaccines” are effective, safe, prevent infections and even bring benefits in the form of a scooter (Poland), a bratwurst (Germany) and the “freedom” to travel (virtually all airlines in the world). All for the sole purpose of introducing substances into your body that drastically affect your body’s cells. Today we know that they are neither effective nor prevent infections, and that they are very dangerous.

“Please continue to vaccinate against COVID-19 and influenza! In view of the upcoming infection season, immunizations are crucial to protect patients and relieve the burden on the healthcare system.” The Brandenburg Association of Statutory Health Insurance Physicians made this appeal to its members in the monthly newsletter [“KV intern”](#) (issue 11/24, p. 32). Dr. Heinrich Fiechtner and the MWGFD board wrote an [open letter](#) on the subject, which was sent to medical associations and medical associations. [Source.](#)

867. Ban on mRNA vaccination in the USA

Vienna 02/20/2025

The Trump administration apparently wants to withdraw approval for the Covid mRNA vaccination. This is because the vaccination does more harm than good and is probably responsible for excess mortality worldwide, according to key members of the administration – reported tkp.at in an article yesterday: [USA plans to withdraw approval for Covid vaccination. Source.](#)

The main component of these pseudo-vaccines is graphene oxide. According to an analysis of Pfizer's elixir of happiness, graphene oxide makes up 99.99103% of the total amount. I have described the details of this study in the article: [Graphene Oxide.](#)

I found an interesting video showing the effect of electromagnetic waves – including those generated by the 5G cellular system – on graphene oxide.

Source: [Telegram 02.02.2025 16.02.2025. 16:34.](#)

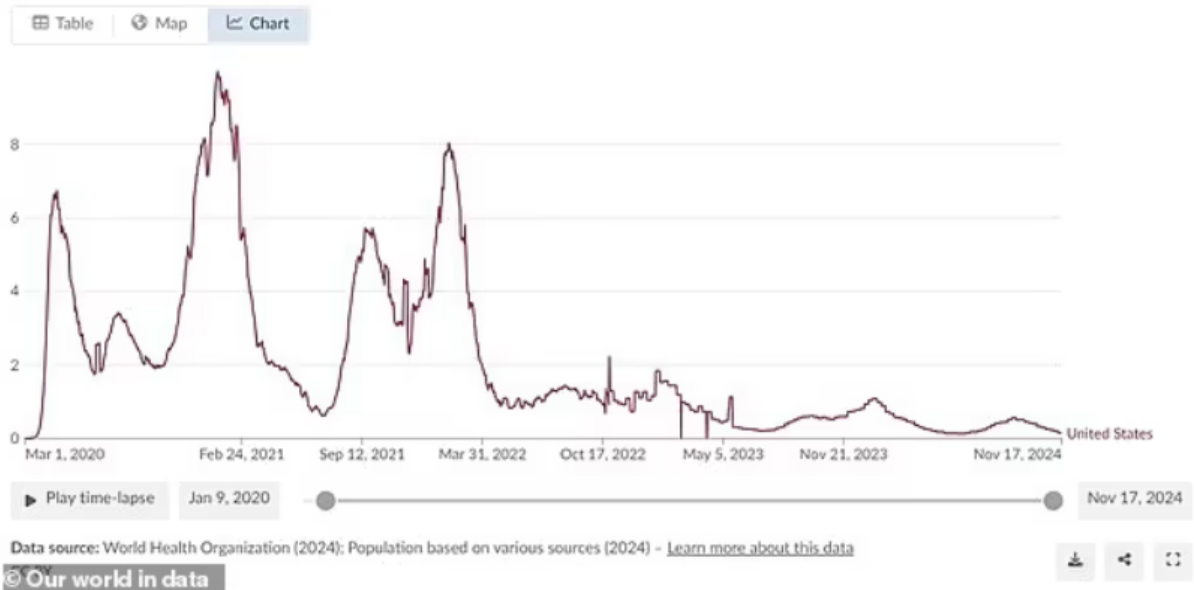

The behavior of graphene oxide under the influence of radio waves shown in the video could well explain the strange phenomena of mass health disorders described in the article: [When the air runs out.](#) After all, every weapon has to be tested.

Believers in the sacred vaccine will always find an explanation for why people die after the shot: after all, it's just a temporary deterioration that proves the healing process has only just begun. It is difficult to expect logical thinking from people who blindly believe all the nonsense spread by the media and the textbooks of great professors who reproduce lies based only on the profits of the pharmaceutical mafia.

Daily new confirmed COVID-19 deaths per million people

7-day rolling average. Due to varying protocols and challenges in the attribution of the cause of death, the number of confirmed deaths may not accurately represent the true number of deaths caused by COVID-19.

Our World in Data

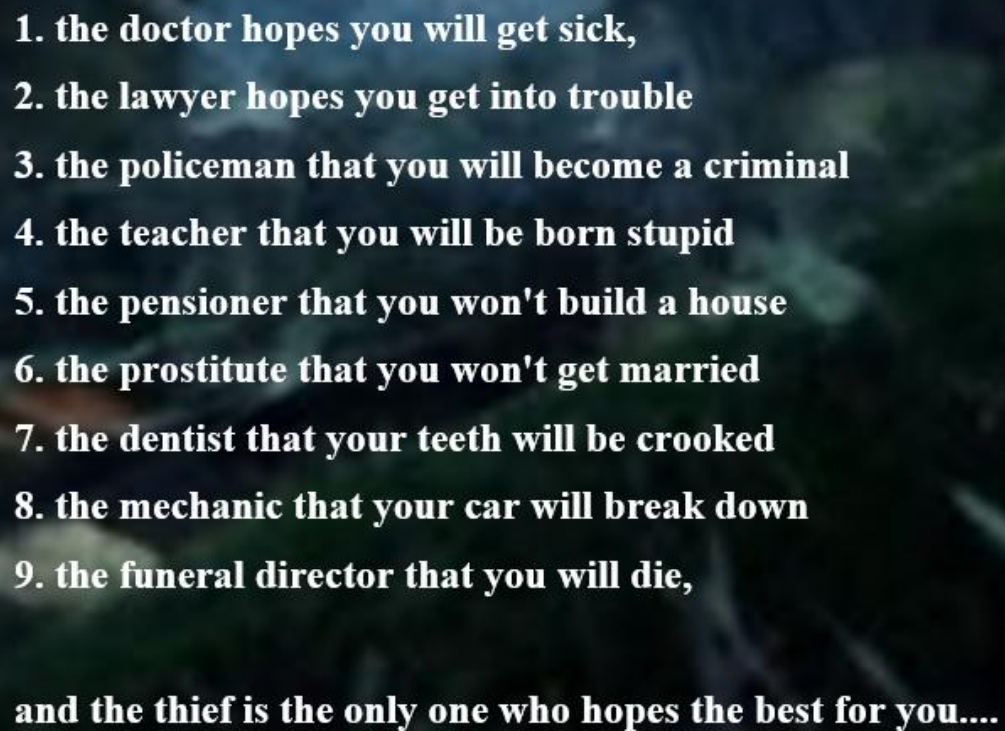

As a reminder, between 2020 and 2022, anyone who died was considered a victim of COVID-19, regardless of the actual cause of death. The only criterion was the result of a PCR test, which could just as easily diagnose the pharaoh's revenge. The plandemic was ended by Putin's "military operation" in Ukraine.

Putin only won the war in Ukraine because he infiltrated secret devices in the West

The end of this war, which only the arms companies need, creates a vacuum in the plandemic of fear. We are slowly running out of reasons – what else is there to fear? As always, the globalists are to blame: despite meticulously planning all possible scenarios, the globalists have not come up with the idea that they could run out of ideas....

- 1. the doctor hopes you will get sick,**
 - 2. the lawyer hopes you get into trouble**
 - 3. the policeman that you will become a criminal**

868. Help – peace is coming!

Vienna 02/21/2025

Now, Trump wants to end the war. Yet, instead of celebrating, the Eurocrats and progressive media cried out as if their wallets had been stolen in the middle of Rue de la Loi. They tell us this is a capitulation, that it is unfair to Ukraine, that all the blood spilled has been in vain. As if anyone had believed this it would end any other way. So if this war were not the result of a Cold War poorly closed in 1990, whose cracks burst open a quarter of a century later. As if Biden hadn't fueled the war machine without ever offering real guarantees to Putin, without ever proposing a viable political solution. Quote from an article on gatewayhispanic.com: [Trump will sign the peace, and the EU will weep for its irrelevance.](#)

Of course, Ukraine was merely an obedient tool of the USA against Russia. You may agree with Trump that the Ukrainian ex-president Zelenski started the war, but he did so at the behest of Biden. This actor has deluded himself into believing that he can influence everything as an extremely expensive puppet of Washington. We are currently experiencing a repeat of the Yalta scenario, except that not even the British will be involved.

Outraged puppets of the European Commission together with a miserable comedian scream: Nothing about us without us! Trump go home! After all, Ukraine is in Europe – so it's our business. Yes, it is. It's in ruins – thanks to your help. You could have done something for peace for three years. And yes, they did – they sent it packing, whose image for them is Putin.

To save the war, they convened a crisis summit in Paris. And what did they decide there? They decided that they couldn't get along.

Because of Trump: Macron has convened a war conference of the big chiefs of the non-aligned countries in the game.

It is reminiscent of the situation when a journalist asked Stalin what he thought of the Pope's last statement? Stalin – the sunshine of nations – replied: and how many armored divisions does this Pope have? They had no choice but to threaten NATO to bomb Washington or at least the White House. I would not be surprised if such an absurd idea came from Mrs. Ursula v. d. L.

The US is finally planning to restore diplomatic relations with Russia. Donald Trump needs cheap gas. So that Europe can tick off the next sanctions against Russia, Trump has announced the lifting of all these restrictions. I wonder who will get away with it? The same applies to censorship. If we have access to US news, no DSA will restrict access to news unwanted by Brussels bureaucrats. After all, we have the Voice of America in online form.

In Ukraine, immediately after the verbal war between Zelenskiy and Trump broke out, access to Truth Social – Trump's platform where Ukrainians could learn that Zelenskiy has only 4% support in his own country – was blocked.

People could learn from their mistakes if they weren't so busy denying them.
Carl Gustav Jung.

869. The looted treasures of the Pentagon

“The ‘terrorists’ knew exactly which target they had to program the missile for in order to destroy evidence in the relevant Pentagon department. Missile? Well, the best pilot, even one who can land between the skyscrapers of Hong Kong, would not have been able to steer a passenger plane to hit the relatively low Pentagon building a few meters above the ground. Defense Secretary Donald Rumsfeld, who had reported the day before, on 10.09.2001, with disarming openness about the [2.3 billion dollars](#) that had just “disappeared” from the Pentagon, also knew this. They disappear for themselves and nobody knows how it happened!

Although the Pentagon is trying to defend itself, Trump, as supreme commander, is likely to put his foot down. What will the Department of Defense bring to light? So begins yesterday’s article on Report24.news: [Pentagon in sight: Musk’s DOGE team chases billions in waste. Source.](#)

They have shrouded themselves in secrecy so as not to jeopardize the defense of the United States. They have disguised the accounting so deeply that they themselves do not know what they are spending money on. And all for the glory of the fatherland....

During the Cold War, the Pentagon trained the best possible spy and sent him to the provinces of the USSR to wait for orders as a collective farm worker. The spy spoke Russian without a foreign accent, knew Russian literature, history and all the customs of the time. The KGB stopped him on the very first day after his arrival. Surprised, he asked: "How did it come about that I got in? He heard the answer: "Because there are no black collective farm workers in our country.

870. Radical cut with “disease detectives“

Vienna 02/23/2025

The newly confirmed Minister of Health and Social Affairs President Donald Trump released almost half of the highly acclaimed team of “disease detectives” on his first working day and thus set the course for a streamlining of the department in the future – published on Tuesday the Austrian platform tkp.at in an article: [RFK on the first day as Minister of Health – radical cut with “disease detectives“](#). The CDC is a US federal health protection organization headed by Anthony Fauci, who has been instrumental in spreading fear of a plandemic and inventing unscientific social distancing and lockdown-style measures to justify it.

We can't cure fools – we can only inoculate them.

During the Senate hearing, Committee Chairman Bernie Sanders asked Kennedy the question:

Will you guarantee access to health care for all Americans?

Kennedy answered, among other things:

Bernie, you know the problem of corruption is not just in federal agencies, it's in Congress. All members of this body accept millions of dollars from the pharmaceutical industry, including you! In 2020, you were the biggest beneficiary of pharmaceutical company money.

Believe it or not, in the United States we are experiencing a revolution the likes of which the world has never seen. It's not a matter of faith at all, no matter what the malcontents think about it, the steamroller of change has begun and it won't be easy to stop it. Even if Trump were to set up a giant guillotine at the foot of the Capitol along the lines of the French Revolution and cut off Fauci's head first, we'd still hear that this was just theater for the gullible and that the Deep State sacrificed a retiree it no longer needed in order to convince us that Trump is fighting it.

Every next move by the new administration in the White House will be interpreted as collaboration with the globalists. And why? Because these people make up the stupidest theories just so they don't have to admit they're wrong. There is a second reason: occupational therapy. It is necessary to divert our attention from more important things like the impending bankruptcy of the USA. Currently, in order to have money for day-to-day expenses, the US government is borrowing money from the postal workers' pension fund.

871. Golden Theater

Vienna 02/24/2025

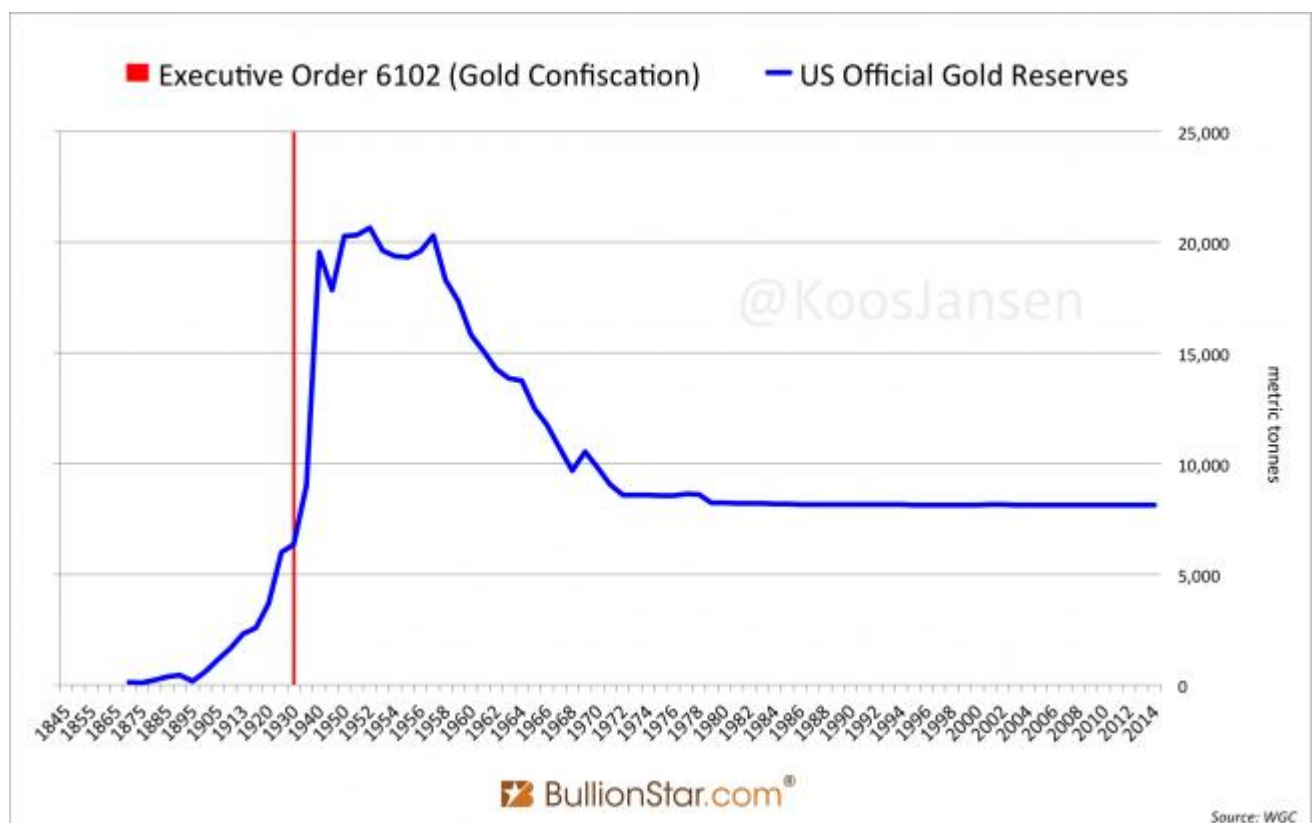

A legend from the Rocky Mountain region:

Gold in Bear Valley! A tramp shouted and stormed into the pub.

Everyone, including the barman, jumped up and rode off to fetch the precious ore. The muffled sound of the horses moving away could still be heard. After an hour they returned to the pub, where the tramp was sipping his “free” whisky contentedly.

Hey you, where the hell is Bear Valley?

That’s how we react when we hear about the tons of gold in Fort Knox. The glitter of the precious metal blinds the remnants of common sense we have left. When Donald Trump announced that he wanted to review all gold reserves in the USA, we thought: At last the truth is coming out about whether the dollar has any backing at all – because there can be no question of backing – in gold.

The official and therefore probably incorrect amount of US gold reserves. [Source.](#)

Less than 100 years ago, the world plunged into the biggest economic recession to date. On April 5, 1933, the then President of the United States, Franklin Delano Roosevelt, issued an executive order banning the hoarding of gold coins, bullion in other forms and gold certificates in the continental United States by individuals, corporations, associations and entities.

POSTMASTER: PLEASE POST IN A CONSPICUOUS PLACE.—JAMES A. FARLEY, Postmaster General

UNDER EXECUTIVE ORDER OF THE PRESIDENT

issued April 5, 1933

all persons are required to deliver

ON OR BEFORE MAY 1, 1933

**all GOLD COIN, GOLD BULLION, AND
GOLD CERTIFICATES** now owned by them to
a Federal Reserve Bank, branch or agency, or to
any member bank of the Federal Reserve System.

Executive Order

FORBIDDING THE HOARDING OF GOLD COIN, GOLD BULLION
AND GOLD CERTIFICATES.

By virtue of the authority vested in me by Section 5(b) of the Act of October 6, 1917, as amended by Section 2 of the Act of March 3, 1933, entitled "An Act to provide relief in the existing national emergency in banking, and for other purposes", in which amendatory Act Congress declared that a serious emergency exists, I, Franklin D. Roosevelt, President of the United States of America, do declare that said national emergency still continues to exist and pursuant to said section do hereby prohibit the hoarding of gold coin, gold bullion, and gold certificates within the continental United States by individuals, partnerships, associations and corporations and hereby prescribe the following regulations for carrying out the purposes of this order:

Section 1. For the purposes of this regulation, the term "hoarding" means the withdrawal and withholding of gold coin, gold bullion or gold certificates from the recognized and customary channels of trade. The term "person" means any individual, partnership, association or corporation.

Section 2. All persons are hereby required to deliver on or before May 1, 1933, to a Federal reserve bank or a branch or agency thereof or to any member bank of the Federal Reserve System all gold coin, gold bullion and gold certificates now owned by them or coming into their ownership on or before April 28, 1933, except the following:

(a) Such amount of gold as may be required for legitimate and customary use in industry, profession or art within a reasonable limit, including gold prior to refining and stocks of gold in reasonable amounts for the usual trade requirements of miners, mining and refining such gold.

(b) Gold coin and gold certificates in an amount not exceeding in the aggregate \$100.00 belonging to any one person; and gold coins having a recognized special value to collectors of rare and unusual coins.

(c) Gold coin and bullion earmarked or held in trust for a recognized foreign government or foreign central bank or the Bank for International Settlements.

(d) Gold coin and bullion licensed for other proper transactions (not involving hoarding) including gold coin and bullion imported for reshipment or held pending action on applications for export licenses.

Section 3. Until otherwise ordered, any person becoming the owner of any gold coin, gold bullion, or gold certificates after April 28, 1933, shall, within three days after receipt thereof, deliver the same in the manner prescribed in Section 2; unless such gold coin, gold bullion or gold certificates are held for any of the purposes specified in paragraphs (a), (b) or (c) of Section 2; or unless such gold coin or gold bullion is held for purposes specified in paragraph (d) of Section 2 and the person holding it is, with respect to such gold coin or bullion, a licensee or applicant for license pending action thereon.

Section 4. Upon receipt of gold coin, gold bullion or gold certificates delivered to it in accordance with Sections 2 or 3, the Federal reserve bank or member bank will pay therefor an equivalent amount of any other form of coin or currency coined or issued under the laws of the United States.

Section 5. Member banks shall deliver all gold coin, gold bullion and gold certificates owned or received by them (other than as exempted under the provisions of Section 2) to the Federal reserve banks of their respective districts and receive credit or payments therefor.

Section 6. The Secretary of the Treasury, out of the sum made available to the President by Section 501 of the Act of March 3, 1933, will in all proper cases pay the reasonable costs of transportation of gold coin, gold bullion or gold certificates delivered to a member bank or Federal reserve bank in accordance with Sections 2, 3, or 5 hereof, including the cost of insurance, protection, and such other incidental costs as may be necessary, upon production of satisfactory evidence of such costs. Voucher forms for this purpose may be procured from Federal reserve banks.

Section 7. In cases where the delivery of gold coin, gold bullion or gold certificates by the owners thereof within the time set forth above will involve extraordinary hardship or difficulty, the Secretary of the Treasury may, in his discretion, extend the time within which such delivery must be made. Applications for such extensions must be made in writing under oath, addressed to the Secretary of the Treasury and filed with a Federal reserve bank. Each application must state the date to which the extension is desired, the amount and location of the gold coin, gold bullion and gold certificates in respect of which such application is made and the facts showing extension to be necessary to avoid extraordinary hardship or difficulty.

Section 8. The Secretary of the Treasury is hereby authorized and empowered to issue such further regulations as he may deem necessary to carry out the purposes of this order and to issue licenses thereunder, through such officers or agencies as he may designate, including licenses permitting the Federal reserve banks and member banks of the Federal Reserve System, in return for an equivalent amount of other coin, currency or credit, to deliver, earmark or hold in trust gold coin and bullion to or for persons showing the need for the same for any of the purposes specified in paragraphs (a), (b), (c) and (d) of Section 2 of these regulations.

Section 9. Whoever willfully violates any provision of this Executive Order or of these regulations or of any rule, regulation or license issued thereunder may be fined not more than \$10,000, or, if a natural person, may be imprisoned for not more than ten years, or both; and any officer, director, or agent of any corporation who knowingly participates in any such violation may be punished by a like fine, imprisonment, or both.

This order and those regulations may be modified or revoked at any time.

A third of citizens trusted the government and handed in their gold, receiving 20.67 dollars per ounce in return. They had one month to do so, after which the state devalued the dollar. A new gold price of 35.00 dollars per ounce was set. Nobody was punished at that time, there were no searches of private homes, no ripping up mattresses and no digging in the garden. The mere threat was enough. What does that remind us of?

Let's return to the present. From now on, I will give my interpretation of recent events. When the Federal Reserve heard the news of a planned audit, it decided to save the myth of gold reserves.

Step one:

The existing “gold” stocks had to make way for fortresses such as Fort Knox to make room for real gold.

Step two: removing the onion smell from Fort Knox so that no suspicion falls on the nation that loves this healthy vegetable;

Step three: printing a sufficient amount of paper, called dollars, to provide security for banks such as the Bank of England;

Step four: handing over these bills as a guarantee for borrowed real gold, including to the Bank of England;

Step five: Transport this treasure – many thousands of tons of gold – on the Titanic 2 to the US vaults;

Step six: verification of the quantity and authenticity of the gold “reserves” by the DOGE;

Step seven: Once Elon Musk has confirmed that the gold is in the US, send the gold back to the UK on the Titanic 3 and bring the onion back to Fort Knox.

How can you tell the validity of such an analysis? The Bank of England's problems with timely delivery of gold to customers other than the US government, the Fed's 100+ years of experience with deceiving both the American people (not just the US) and, if necessary, the US President.

Why did I use the name Titanic for the means of transportation for gold? Because if it had hit an iceberg on the way, we would be back to square one – see the legend of the gold in Bear Valley. Imagine these thousands of bathyscaphes

If you're wondering where the gold from Fort Knox has gone ...

872. Homo Trumpus

Vienna 02/25/2025

Another entry in the Homo series... Today is a day in the life of a Donald Trump supporter.

As I do every day at dawn, I was awakened by the loud sound of the alarm clock playing [YMCA](#). I love this song! There's so much positive energy in it, it's a pleasure just to get out of bed. Since Trump's election victory last November, the world has become beautiful again after the bleak years of Biden madness.

Four years ago, in January 2021, when we came to the Capitol to support Trump after a rigged election, congressional security opened the doors to the building and even invited us in. So we went in. Then thousands of us were locked up because of the coup. I was lucky I didn't fall into the eye of a camera lens. Some were not so lucky and served four years for nothing.

01/06/2021 r. Armed to the teeth with smartphones, the coup plotters have taken over the Congress building.

Even I – perhaps the biggest MAGA supporter – was surprised by the massive attack on the stinking corruption swamp immediately after Trump was sworn in. I know it's not nice to gloat when someone cries, but somehow I have no sympathy for these mindless Deep State accomplices.

Last steps on US territory.

Hooray! We only have two genders again: men and women. And nothing else. There are still a handful of mentally disturbed people who feel like a dog, a radiator or a pair of scissors. The psychiatrists will have no shortage of work.

The climate hysteria promoted by US Vice President (1993 – 2001) Al Gore is over. Trump has put together an excellent cabinet of people he can finally trust. The USA is the first country in the world to withdraw twice from the criminal WHO organization.

Regardless of the unfounded but probably sincere wishes of the puppets of the European Union, the war in Ukraine is about to end, and these fools have no say in the matter.

This is how Macron and Starmer's visit to Donald Trump ended, as the Times reports.

I went to work today in such a good mood. My office where I work is located near the Ronald Reagan building where USAID used to be headquartered. After the obligatory morning coffee, I start my work by reading my e-mails. Among the emails, I find one sent by DOGE.

What did you do last week? – If you don't reply, you will be dismissed from your post.

ME??? That's impossible. I am the most ardent supporter of MAGA. After all, they can't just sack me because I struggle to remember who and what topic I discussed with last week! However, it is necessary to sit down with colleagues and find out what we 'worked on' in the office.

Steve L. in the next room has already read Musk's email. He is a staunch Democrat. He voted for Kamala Harris and it didn't work out. Now, like me, he's sweating with anxiety and wondering how he's going to pay his mortgage?

Hey Steve – we have to come up with something to make this ultimatum a credible write off – I said.

You? You're their (the Republican's) plug in our office, after all.

They can fire me too, so instead of arguing, it would be better for both of us if we responded to this email in a similar fashion. We can argue later if we managed to save ourselves from being fired.

I learned how to negotiate by looking at Trump's methods. And so we came to an agreement. About what? I won't tell you, I still want to work here after all.

873. Autism plandemic

Vienna 02/26/2025

A sunny Wednesday afternoon in the Spring of 2009: a mother sits in a doctor's office, a chubby-cheeked one year old on her lap. The family doctor looks at his notes and asks Mam to confirm the birth date of the wriggling baby boy. Mam replies. "Happy Birthday little man!" the doctor beams. "Now, if you'll just roll up his sleeve, we can let him get back to his birthday cake." Mam complies and the MMR vaccine is injected. To the surprise of mother and doctor, the child laughs.

Evening: birthday cake is brought to the birthday boy. He recoils, crying.

Ten days later: the tot wakes in the night, sobbing. His temperature is a little high so Mam administers paracetamol and cwatches (Welsh cuddles – our greatest export).

Age two years and four months: the boy, centre of his Mammy and Daddy's world, is diagnosed as severely autistic. [Source.](#)

According to the Centers for Disease Control and Prevention (CDC), the prevalence of autism has increased from 1 in 1,000 children in the 1990s to [1 in 36 children](#) today. In the United States, nearly 3% of vaccinated children have autism!

"And all of them were children who had been adopted by the Amish after receiving their immunizations. They couldn't find any from the Amish in general."

Genocide is not asymptomatic like Covid-19. It is introduced gradually and slowly according to a plan. Autism is just one of those symptoms. To help those affected by the turbo-cancer-causing mRNA pseudo-vaccines, new curative mRNA “vaccines” have been developed that will cause more diseases to which Big Pharma will respond with new “vaccines”.

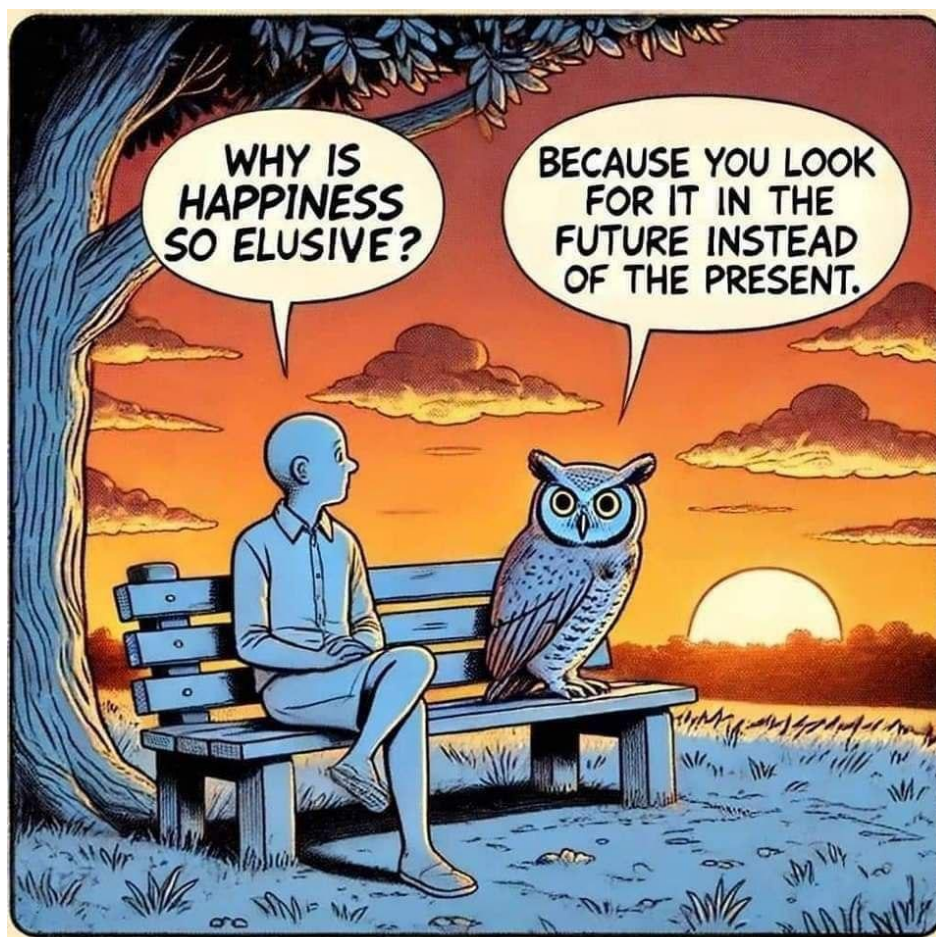

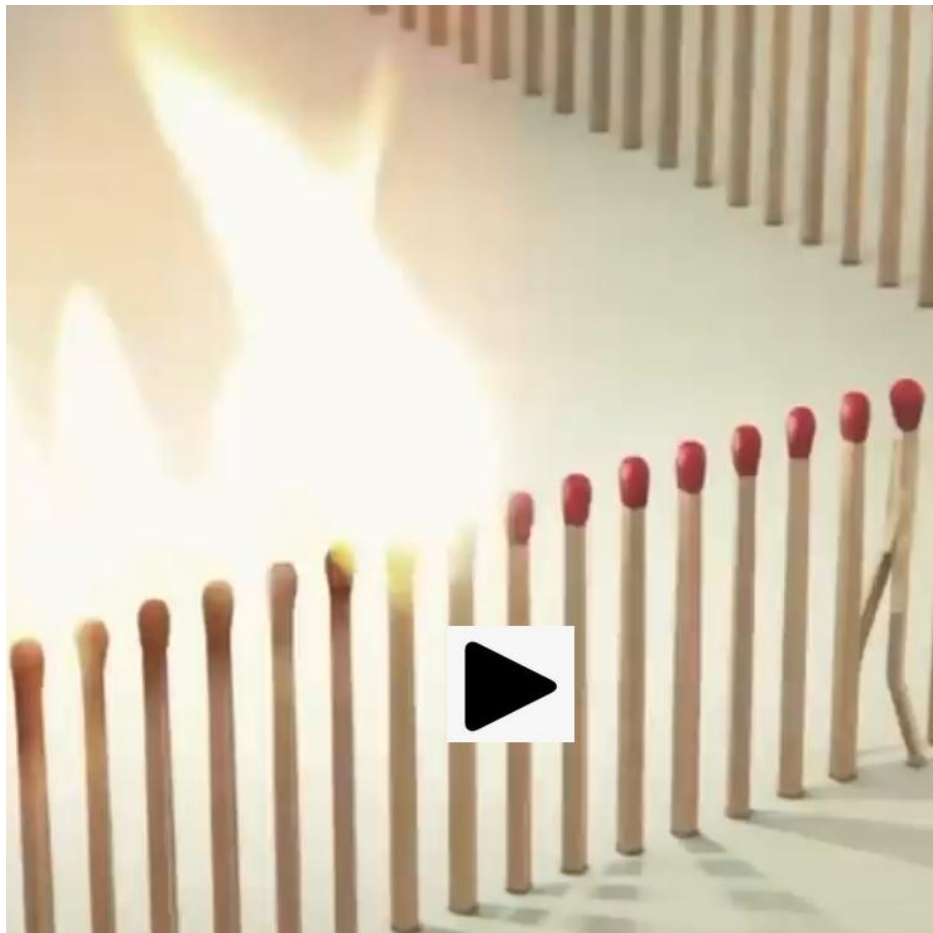

Few people pay attention to the “flavor enhancer” content on the packaging of the food they buy at the store. Even fewer parents – if they have the opportunity to do so – read the package leaflet about the side effects of the products they inject into their children.

Leaflet for the measles/MMR vaccine, printed on normal letter size larger than the child to be vaccinated...

The effects will take care of themselves. The lifelong care of a child who has become a victim not only of greedy corporations, but also of the ignorance of parents who should always protect children.

And what can I do about the power of the authorities myself? This is probably the most common excuse used by the mindless whingers on the TV news. But there is another way.

Vienna 02/27/2025

Hugo Wegener's book "The Graveyard of Vaccination", published in 1912, is a historical document that describes the methods used to introduce vaccinations – including forced vaccinations – in the period before [John Rockefeller took over the medical business.](#)

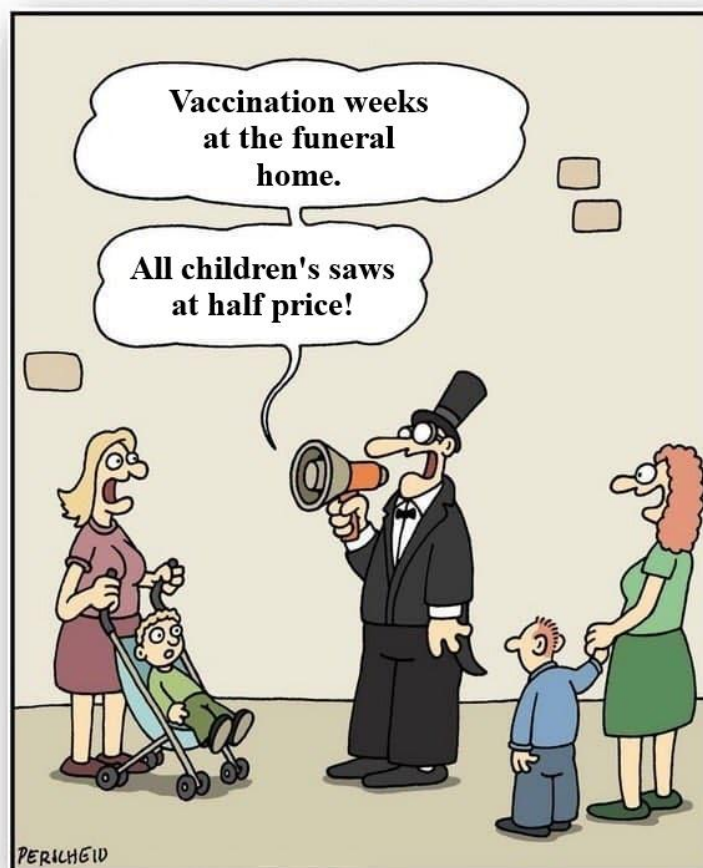

This book describes more than 36,000 vaccination injuries, dozens of deaths and 139 illustrations! The book in German (Gothic script!) is available [here.](#)

One of the cases described in this book: **Albert Guta Knapp**, son of the healthy master baker **Gottlieb Knapp** in Berghausen, was born on Nov. 7, 1910 and was completely healthy until the vaccination. District physician Dr. Gauer vaccinated the child on 7. 6. 1911. The arm worsened and 8 days after the vaccination diarrhea and vomiting were added.

The nurse and the coroner said that the vaccination was to blame for the death on June 22, 1911. The vomiting stopped about 5 days before death, so that the parents believed that things were getting better.

First the coroner admitted the case and afterwards he admitted an illness from which the child had not been ill at all in recent times.

BAVARIA: Of the 30,742 smallpox patients in 1871, 29,429 were vaccinated. Vaccination has been compulsory in Bavaria since 1809.

For those who do not know German or have difficulty reading Gothic script, I found [a good description of this book](#). [Source](#).

Unfortunately, the PCR test that can fool the whole of humanity today did not exist back then. It would have been very useful for them back then. For whom? Because it was still the time before patents on the biology of life were introduced. The introduction of vaccines is attributed to Napoleon, who wanted to gain a military advantage over his opponents in this way. This triggered an immediate reaction from his opponents. This can be clearly seen in the example of Bavaria: 1809 – introduction of compulsory vaccination against smallpox. Although this was not the beginning of the use of biological weapons – even in the Middle Ages, snakes or strong-smelling substances were hurled into defending fortresses with catapults – it ushered in an era of vaccination deception that continues to this day.

England had

1857-1860 – 14,244 deaths from smallpox,

1863-1865 – 20,059 deaths from smallpox, during the most severe forced vaccination,

1870-1872 – 44,840 deaths from smallpox.

Sanitation, nutrition, better living and working conditions are what made it less deadly and drove it out. Next time you hear about small pox being eradicated by vaccines from your doctor or other people just show them this: Source [Rhea Ann Kitowski, FB 14.07.2019.](#)

875. A new (brave?) world is emerging

Vienna 02/28/2025

It is difficult to say what specifically most triggered the catatonic European breakdown: Was it the fear of the U.S. and Russia joining together as a major power nexus – thus stripping Europe from ever again being able glide along on the back of American power, through the specious notion that any European state must have exceptional access to the Washington ‘ear’? From an article published Wednesday on strategic-culture.eu: [America as Republic, not as Empire – Europe’s “sound and fury” after jaw-dropping pivots in U.S. policy.](#)

European politicians are stuck in ossified policies from the last century. That is why they did not recognize the “threat” to Europe’s freedom posed by the previous sovereign from overseas. It was unimaginable for them! After all, we had so politely submitted to every suggestion from Washington, even casually thrown in. They had learned nothing from history. They will end up as all friends of the US have ended up: killed or abandoned to their fate. Vietnam, Afghanistan, Iraq, Somalia, Yemen, Libya, Syria. You can endlessly list all the leaders of countries that have been betrayed by the USA. Suffice it to mention the fate of Osama bin Laden, who was hired by the CIA and sacrificed in the “fight against terrorism”.

Kim Jong-un is concerned about restrictions on freedom of expression in Europe.

It is now Ukraine's turn. **Ukraine is not America's war**, says the current administration in the White House. Could it be that Ukraine organized the 2014 Maydan color revolution? The evidence, however, [points to the US](#).

I can already hear the Trump supporters screaming: What are you talking about, you write so nicely about the Trump revolution, and now comes such an accusation! Yes, I support Trump's fight against the Deep State – against the greatest enemy not only of the USA, but of humanity as a whole. This fight is described very well in the article above.

The fact that it was the previous US administration that promised all kinds of help to the Kiev comedian just to weaken Russia does not explain that Trump is using the situation to colonize Ukraine. This is reckless, especially for the ordinary people, of whom there is a majority after all, who along with the resources deep in Ukrainian soil are being sold like slaves by an illegitimate Ukrainian president who is trying to maintain access to the trough for the next few months and take as much as he can for himself and his oligarch buddies.

The “weakening” of Russia has strengthened it economically and militarily. Russia is the undisputed winner of the war instigated by Maydan. Trump has recognized this victory and has become a traitor to European politicians because he has accepted the obvious facts on the Ukrainian front.

Europe is courageously defending its incontestable principles.

Clinging to the long-disproved political myths of the European Union's elites can only lead to the collapse of this backward colossus based on bureaucratic instructions to fix the world through bans, restrictions on economic invention and, above all, censorship.

Communism – different times, same ideas....

The European Commission is not in a position to recover from its failure. Its role in shaping Europe is in serious decline and continuing to insist on lies that no one believes is the best way to self-destruct. This is perhaps the only aspect of the Eurocrat's activities that is worth supporting.

876. Tragifarce in the Oval Office

Vienna 03/01/2025

What would we expect from a lousy actor appearing in such or even worse shows?

How this man stole billions from all of us will be the subject of an in-depth analysis for future generations....

It seems that this illegitimate Ukrainian president, pushed by the European warmongers, is the only obstacle to ending this unnecessary and cruel war. Yesterday's meeting between Trump and Zelensky in Washington began on a friendly note.

“You really dressed up today,” Trump said, teasing Selenskyj about his inappropriate attire.

[Source.](#)

The journalists were invited to the interview...

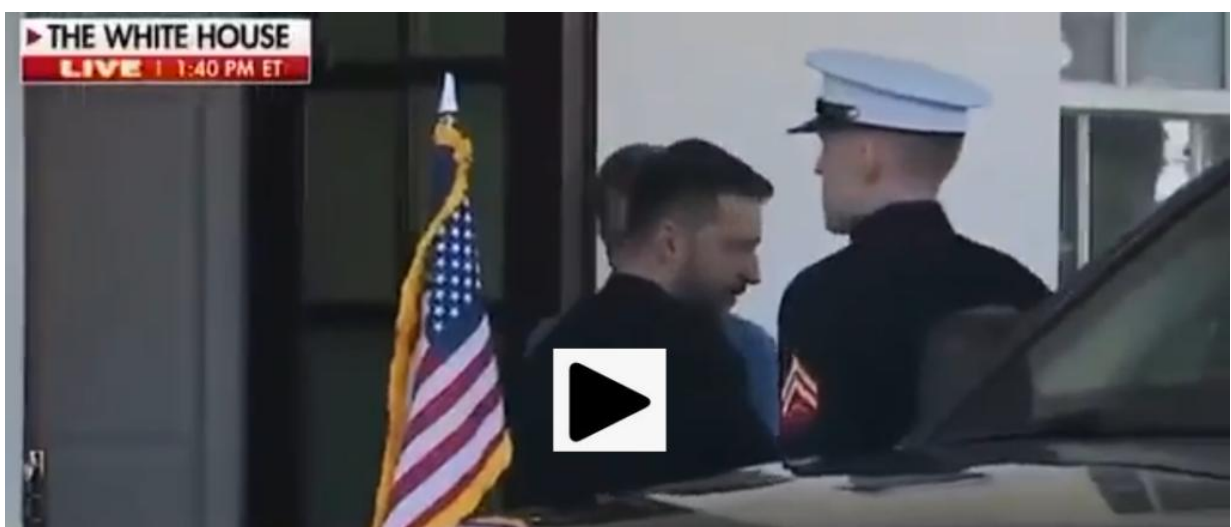

Selensky destroys himself in front of the cameras. He is then thrown out of the White House. “You can come back if you want peace,” Trump said.

Presenting the lies of his own propaganda as arguments in a high-profile discussion? That doesn’t exactly speak to the intelligence level of this self-important comedian who believes in a great mission. He left the White House without saying goodbye to Trump, without a press conference – like a mutt thrown out of the house for bad behavior.

Details of the conflict between Trump and Selenskyj:

- Selenskyj: May I say something, Mr. President?
- Trump: No, you’ve already said too much!
- Complete Transcript of Trump’s confrontation with Selenskyj: How it came about.
- Wiceprezydent Vance said that to end the war, we have to talk to both sides. Including Putin.

- Selenskyj responded with a speech in which he said that Putin could not be trusted and that he could not be negotiated with at all.
- Vance replied that Ukraine had big problems on the front, not enough people and that the war had to end.
- Selenskyj responded rather rudely by saying that Vance had not been to Ukraine and therefore could not know what was there and what was not.
- Thereupon Trump took the floor and again began to summarize the issue, stating that the war must end as soon as possible and also expressing the opinion that Ukraine has problems with the current state of affairs on the front.
- But Selenskyj interrupted him: “Everyone has problems with the war. If you have a sea, it fends you off. But you will feel ... —Trump: You can’t know that. Don’t tell us how we’re going to feel. We’re trying to solve your problem. There’s no need to impose your point of view on us.
- Selenskyj: We are not imposing anything on you.
- Trump: You have no right to dictate how we should feel. We’re going to be good. We’re going to be good. We’re going to be strong. We’re going to be powerful. You are not in a strong position now, you have not been successful since the beginning of the war. You are not in a position to create the right conditions. You do not have the right cards in your hand.
- Selenskyj: I’m not playing any cards here.
- Trump: I’m speaking reasonably. Millions of people are in danger. We are on the brink of World War III. You can’t play with that. You’re showing disrespect for our country. You can’t tell us what to do. We have given you 350 billion dollars – for weapons and equipment. Without our weapons and equipment, this war would have been over in two weeks.
- Selenskyj: I heard from Putin for about three days, now it’s been two weeks.
- At this point, Trump in particular spoke out. He reiterated that the course of the war is not favorable for Ukraine. Therefore, Zelenskyi should not be against the ceasefire, but on the contrary be happy that the US is helping to stop the fire. And be grateful in general.
- And At the end, he said the decisive sentence: “Either we sign the agreement or we leave”.
- The wording can be clearly interpreted: If Zelenskyi is not willing to sign the ceasefire agreement, the US will stop all support for Kiev.
- Worst Case for Kiev: The war continues and there is no US support.
- Selenskyj and Trump continued to communicate without the press. But the topic of conversation apparently won’t change. Trump will explain to Zelensky why he has no choice but to conclude a ceasefire, writes ‘Strana’. Source: [Telegram 02/28/2025 07:19 p.m.](#)

By the way, they didn’t sign the treaty.

It was not a successful visit.

A Statement from President Donald J. Trump

"We had a very meaningful meeting in the White House today. Much was learned that could never be understood without conversation under such fire and pressure. It's amazing what comes out through emotion, and I have determined that President Zelenskyy is not ready for Peace if America is involved, because he feels our involvement gives him a big advantage in negotiations. I don't want advantage, I want PEACE. He disrespected the United States of America in its cherished Oval Office. He can come back when he is ready for Peace."

877. Quo fugis, Europa?

Vienna 03/03/2025

Where are you going, Europe?

The European Union, much less NATO, is not Europe! Everyone agrees on that, except the handful of globalists who have subjugated and bureaucratized these instruments of oppression for a Europe of many nations. It was these globalists who actually triggered a plandemic of fear in the world five years ago.

It sounds like a paradox,
but in a sense people commit suicide out of fear of death.

Having exhausted the possibilities of sanitary coercion, they brought about the war in Ukraine, which is now coming to an end. The same people have also forced climate hysteria on the world instead of environmental protection. They have also destabilized nation states by organizing mass migration. All in line with a plan they have been preparing for centuries to take over the world.

The climate hysteria has made most people forget that there are millions of “machines” on earth that suck carbon dioxide out of the air and convert it into oxygen, cost nothing and take care of the right amount and functioning of these machines themselves.

This machine is called a tree.

Today's situation in kolkhoz-administered Europe is best illustrated by the following picture:

In yesterday's article on ZeroHedge [Europe Unveils Rival Ukraine Peace Plan Backed By 'Boots On The Ground & Planes In The Air'](#) we read:

After essentially being kicked out of the White House on Friday, Ukrainian President Volodymyr Zelensky went to London where British Prime Minister Keir Starmer immediately offered a warm embrace: 'we stand with you' – was the message after the major public clash with President Trump and Vice President Vance in the Oval Office.

It is paradoxical that "500 million Europeans are asking 300 million Americans to defend them against 140 million Russians", as someone rightly remarked. The 1.4 billion Chinese look at all this and ask themselves: when will everyone stop pretending that they can do something and that they have a say?

Leszek Miller
Former Prime Minister of Poland

The European puppets are desperate to prove that they are not puppets and pretend to influence the fate of the world. Typical sham business. The creation of a European army has been planned for years. The only problem is that when the bureaucrats finally agree, we will have to wait at least 10 years for such a creation to take on concrete form and strength. By then, the situation in Europe will certainly have changed and Europeans will have experienced first-hand that the threat from Russia is nothing more than a figment of the imagination of those who scare us with all sorts of things.

The Eurocrats will have changed nothing, because Russia and the USA will have managed without their "peaceful" plan to escalate the war. If the US leaves NATO, which is very likely, this aggressive organization will probably change its name to EUTO or better yet EU-Bomb.

878. Vaccination absolution?

Vienna 03/04/2025

I was very moved by Sunday's article on the Austrian platform tkp.at: [Sacred absolution of vaccinations. Source.](#)

I unknowingly entered this “theater of war” against humanity and mankind: “Vaccination is our weapon”! “Vaccination is charity”! “Even Jesus would vaccinate”! “Vaccination is a Christian duty”! Cathedral priest Toni Faber, deeply enlightened by mercy and solidarity, not only closed the gates of the church, but also many hearts. As a result, many people, including me, left the church!

When you know little, you believe things.
Henning Mankell

The truth is that people will believe anything if it is fed to them in the form of a massive media attack. The deliberately maintained artificial division between the vaccinated and the unvaccinated is reinforced by ourselves. When I hear in a discussion that the vaccinated are to blame because they are stupid, I lose the will to discuss things objectively. I know that this is a sign of insecurity and a need for self-esteem, but it is a clearly harmful opinion that undermines the chances of coming to terms with this global crime.

The development of the means of war.

I belong to the group of unvaccinated people, but that doesn't make me a hero by any means. I definitely had it easier than most of you. As a pensioner, I was not in danger of losing my job – one of the main reasons why people gave in to this blackmail. The other, not insignificant, reason is that I haven't watched TV in over 20 years. The viral fear ads got to me too, but not until I became interested in what these extremely "credible" media outlets were writing myself. The widespread media dissemination of fear was the reason I started writing this blog five years ago.

Pensioners receive no benefits from the state, only the return of their own money!

Restrictions on air travel, especially in connection with vacation travel, were no reason to risk one's own life and health. After all, every pandemic, whether real or not, has to end at some point. There are so many beautiful places in our country....

Let's not allow ourselves to be divided. Let's not treat those who think differently as enemies – they are an enrichment for us. It's like competition, which is threatening to lose our market and at the same time is the cause of our development. Without competition and criticism, we would not need to develop further. Without them, there would be no progress.

The vaccine debate really isn't complicated.

Either you think the government should have full control over what you and your children are injected with, or you don't.

There are many other things we can talk about, but the heart of the matter is medical tyranny versus medical freedom.

879. A bumpy road to Romanian democracy

Vienna 03/05/2025

Situated on the Black Sea and the Carpathian Mountains, beautiful and historic Romania has attracted worldwide attention due to the authorities' new understanding of democracy in Bucharest. The turbulent history of this country can be traced back to 106 AD, when present-day Romania was incorporated into the Roman Empire.

On November 24, 2024, the conservative candidate Calin Georgescu unexpectedly won the first round of elections with 23% of the vote. According to the polls, he was expected to receive only 6% of the vote. Due to his stance on the war in Ukraine, the mainstream press dubbed him the Romanian Orban and labeled him "pro-Russian". At the beginning of December, the Romanian Constitutional Court declared the results of the first round of elections invalid, justifying the decision with the alleged "result of organized manipulation from outside the country".

Georgescu was against the Covid vaccine and the restrictions

During the Covid vaccination, he made a promotional video in which he bathed in a lake in the middle of the mountains in winter and called for the natural strengthening of the immune system

He claims that the COVID "pandemic" was a hoax.

No wonder they want to get rid of him at all costs!

Source: [Telegram 03.03.2025 11:30.](#)

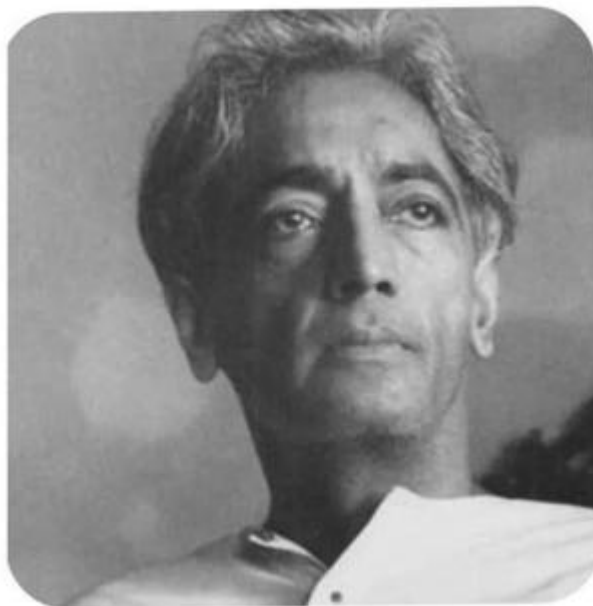

After the investigative medium [snoop.ro](#) revealed that the alleged TikTok campaign that led to the annulment of the presidential elections was actually paid for by the ruling National Liberal Party (PNL), the same party that had called for the annulment of the elections, a wave of protests swept the country.

Romania: A huge army of Georgescu supporters has come to reclaim their land
Bucharest experienced a true popular uprising. Thousands of Romanians responded to the call of
deposed Romanian President Calin Georgescu!
The demonstrators are demanding the reconquest of their country! “We demand the resumption of
the second round of elections, an end to arrests and political persecution and an end to EU and
NATO interference! Georgescu is our president!”

Source: [Telegram 01.03.2025 17:18.](#)

This is what a modern democracy looks like: If the people vote for the wrong candidate, they are arrested, the election is annulled and power remains in truly “democratic” hands. This is the future electoral model for Europe and the rest of the world. The founders of Athenian democracy would have been amazed at what their idea of people power has become.

Being well-adjusted to a deeply ill society is not a sign of mental health.
Jiddu Krishnamurti

The war waged by some EU bureaucrats against Donald Trump's revolution in the US is coming to an end – a humiliating defeat for the warmongers. Their most important asset, the Ukrainian president, has just surrendered to Trump and accepted his leadership in the peace talks with Russia.

Donnie, stop it, calm down!

At the last minute: Putin has offered to mediate in the dispute between Trump and the European Union.

880. A repeat of Maidan

Vienna 03/06/2025

It has recently been 11 years since the uprising in Ukraine, which was named Maidan after the square in Kiev. The US secret service was behind it. You can find evidence in this article: [How do you become Prime Minister?](#) The overheard conversation between Viktoria Nuland and the US ambassador in Kiev shown here clearly demonstrates this. Ms. Nuland was also named yesterday by US General Flynn in connection with plans to assassinate Donald Trump last July:

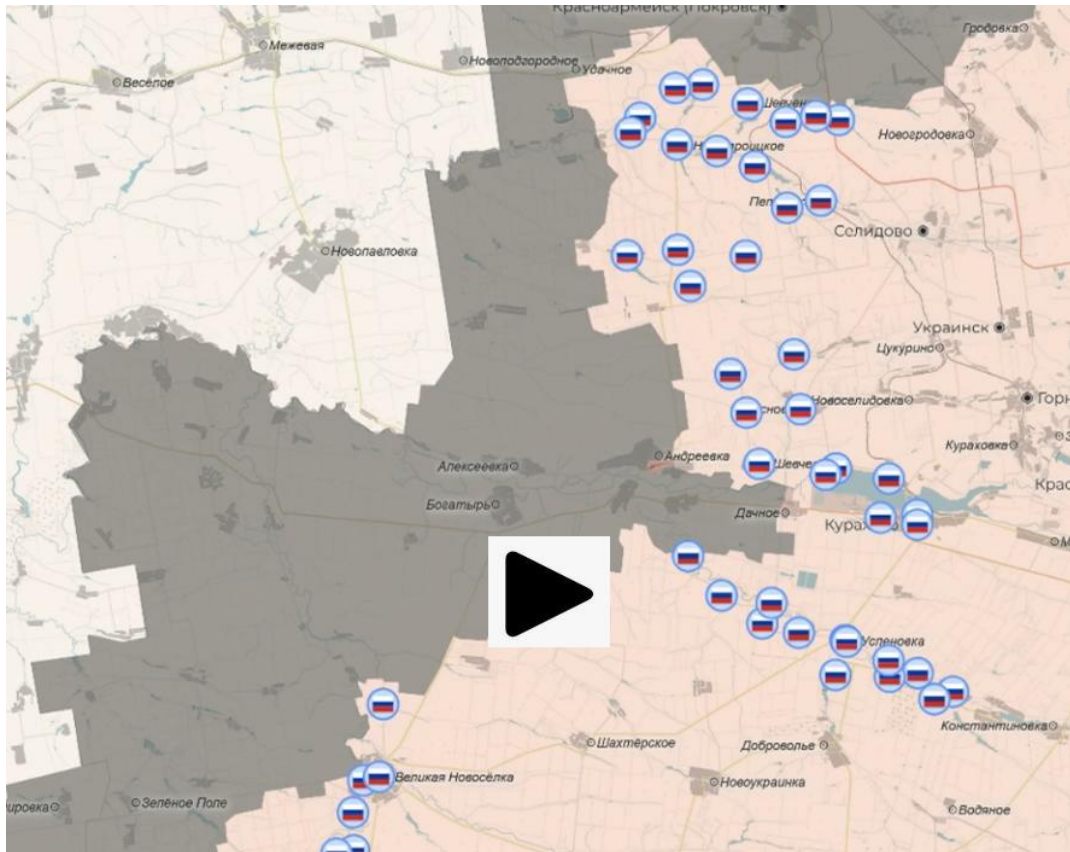

I mentioned the story of Maidan, the evil attempts on the president's life, but what about the eponymous replay of Maidan? Well, based on years of experience gained by the CIA in numerous countries, the current White House administration, without interfering in the internal affairs of Ukraine – as Trump claims – is preparing a successor to the embattled president in Kiev. The funny thing about the whole thing is that in 2014 the Americans elevated a pro-American politician to the Kiev throne, but this time the US is talking to a pro-Russian candidate and encouraging him to run for Kiev president. Fortunately, there are no plans to shoot from rooftops into crowds and police officers, as was the case 11 years ago.

The mainstream newspaper Politico reported on this in an article today: [Top Trump allies hold secret talks with Zelenskyy's Ukrainian opponents.](#)

In a poll conducted by British pollster Survation this week after the blow-up at the White House, 44 percent said they would back Zelenskyy for the presidency. His nearest rival, trailing him by more than 20 percentage points, is Valery Zaluzhny, a former army commander who is now Ukraine's ambassador to Britain. Only 10 percent backed Poroshenko, who is known as the Chocolate King due to his confectionary empire. Tymoshenko garnered just 5.7 percent support.

The British poll cited by Politico must be remarkably reliable, considering that Mr. Zelenski gets 44% of the vote in it, while London's protégé Zaluzhny gets 20% more, or 64%. So both "favorites" together have 108% of the vote in this poll.

How has the front line changed in the last three months? A total of 62 villages have been liberated, including Kurakhovo, Velikaya Novosilka and Toreck.

While hard-line European politicians see the only way out of the tragic situation in supplying arms to Ukraine and avoiding peace talks at all costs, this only leads to new graveyards. This is a terrible price to pay for defending the West's hypocritical values.

Source: [Telegram 05.03.2025. 03:19 p.m.](https://t.me/05.03.2025.03:19.p.m)

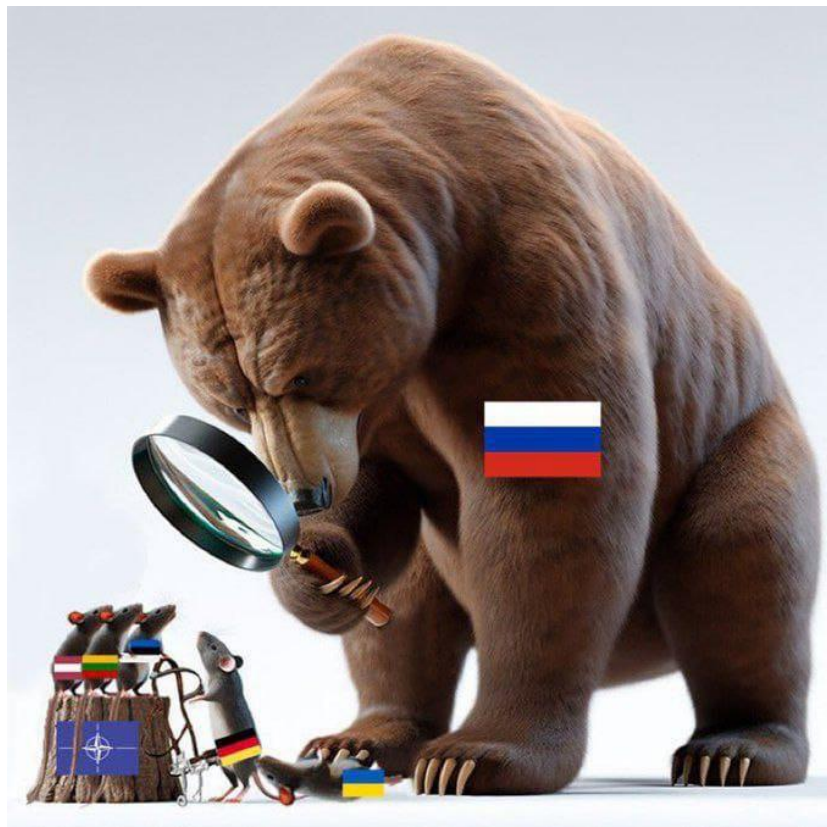

The USA has stopped the supply of weapons to Ukraine and the information support provided by spy satellites. Pushed to the wall, Zelenski is crawling back from his brazen lies and has announced improvements. Why was he so insistent on continuing this war? Because of his “friends” – the Azov troops – who have long since announced that he will hang from the nearest lamppost if he enters into negotiations with Russia. An irrefutable argument.

The European army will certainly defeat Putin.

Macron intends to announce the mobilization of the army.

881. Dystopian digital prison

Vienna 03/08/2025

The power of CDBC's is so extraordinary that even the worst dictators could only dream of it – this is how German professor Richard Werner describes the idea of a CDBC – a digital central bank currency. Prof. Richard Werner is an economist and works in the field of finance. He is also on the alumni list of the WEF Global Leader for Tomorrow 2003 – (since 2004 [Young Global Leaders](#)).

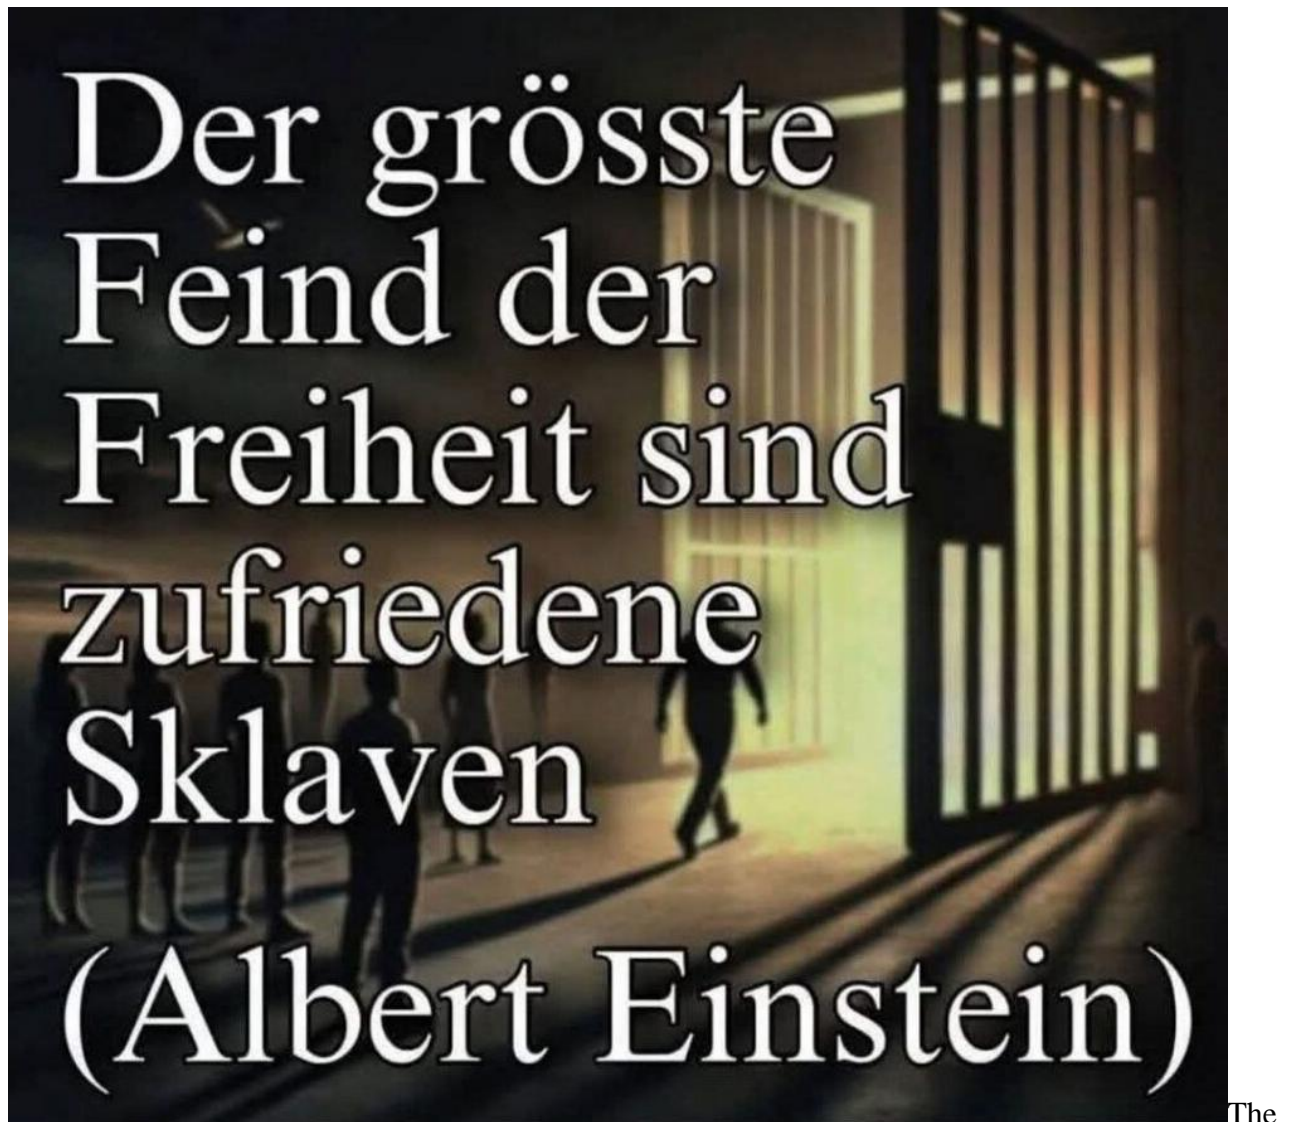

Like Viktor Orban, Professor Werner has retained basic human reflexes despite globalist brainwashing. However, in the ruthless world of finance, where economic laws mercilessly rule over human feelings, there are those for whom the aspirations of a handful of madmen to rule the whole world represent the greatest threat to humanity.

Excerpt from an interview with Professor Werner.

Stalin and others could only dream of the enormous power that central bank digital currencies give to central planners.

Imagine a world where there is no cash. You can only pay digitally. You have money in your account, but you have already exceeded the limit for the meat you have bought, and the system blocks you if you want to continue spending your money on animal products. Vegetarians will certainly be happy about this, but it's not just the purchase of meat that is subject to such restrictions. When traveling, for example, refueling can be made dependent on your vaccination status. Digital chain: you are not allowed to pay if you travel more than a few kilometers from your home. Now imagine what you will buy, even if you have not exceeded any imposed limits, if an emergency occurs and there is no electricity for a while?

greatest enemy of freedom is contented slaves.
Albert Einstein.

No, I am not writing this to scare you. It's not digital money we need to be afraid of, it's the people who want to use it as a tool to enslave us all. US President Donald Trump signed an executive order a month ago officially banning work on central bank digital currencies (CBDCs). Trump has his motives: CBDC is a major threat to the dwindling position of the US dollar.

We can do something too. For example, use cash instead of plastic in stores. An attempt to introduce a digital currency in Nigeria in 2020 failed. And why? Because of huge public resistance. A black market emerged that the authorities were unable to control despite strong repression.

2023 : THIS IS CASH
You can spend it where you want,
when you want and how you want.

2030 : THIS IS DIGITAL CURRENCY
You can spend it where they tell
you, when then tell you and
on what items they tell you

When you pay with cash, you retain what little freedom we have left. No one controls what you buy or where you buy it. To the store, you are an anonymous customer.

When you use your card or phone in the reader at the checkout, you cause an entry to be made in the global database where, in addition to your name, all the products you have purchased, their quantity, information about the location of the store and the date and time of purchase are listed. On the basis of this data, the introduction of a social credit system based on the Chinese model is now only a matter for the authorities to decide.

This is what €1 looks like after all taxes have been deducted.

What this 80%, which flows into the state's coffers in the form of taxes, is spent on is decided by a government, also elected by you, without asking your opinion. In Germany, for example, the government can boast of an important investment: the construction of cycle paths in Peru. Sure, this is an important project, but not necessarily when pensioners in what used to be the richest country in Europe are forced to search for bottles in garbage cans to survive the hard times.

Today the same situation again, where I am ashamed of our rich Germany.
Our parents and grandparents have to rummage through dumpsters to survive.

882. “Victims” of censorship

Vienna 03/09/2025

Two months ago, Facebook (Meta) chief Mark Zuckerberg announced the [end of censorship](#) on its subsidiary social media platforms Facebook, WhatsApp and Instagram after a conversation with Donald Trump at Mar-a-Lago. Admittedly, he didn't mention the details of Joe Biden's torture to stop protecting “hate speech” – as he labeled views that diverged from the prevailing globalist narrative – and took the only legitimate pro-government route to censorship. Torture probably existed too, but not in the form of hand-wringing. Some may remember the hours-long [Facebook outage](#) in October 2021.

This form of pressure on Mark Zuckerberg was not necessary because he fought so valiantly for freedom of expression, but rather for economic reasons, because he did not want to expose his companies to the costs of implementing qualified fact-checkers – i.e. algorithms that authoritatively determine who “violates the norms” of the social networking platform. Valuable tips from whistleblowers about violations of sacred censorship laws were also taken into account when removing unacceptable content.

“Your post violates our standards.

I have received such reports many times after publishing my blog posts on Facebook.

Shortly before the US presidential elections in October 2024, Facebook deleted the account of the popular German-language independent TV channel Auf1.tv. To this day, I have searched in vain on Facebook for any sign or reinstatement of the account of this TV channel, whose only sin is to preach against censorship.

My blog is also on the blacklist, so access to my Facebook posts is severely restricted (shadow banning). Many users confirm the difficulty of finding my blog on FB.

Reading Mark Zuckerberg's biography, it is easy to come to the conclusion that the creator of the social platform (which he stole) is an antisocial person.

After the aforementioned announcement of a change in censorship tactics, his greatest success in this area was the removal of tampons from the men's room in the Meta office. [Source](#). The deep state will certainly not recover from this blow!

Mark Zuckerberg, Facebook founder and CEO of Meta, is currently portraying himself as a victim of the cruel censorship campaign during Covid-19. Can his innocent-looking face be lying? After all, with Meta, Zuckerberg is a strategic partner of the WEF, has earned billions from the coronavirus crisis and is working on a very dangerous future for us all. In this program, Kla.TV looks behind the facade and reveals some of Zuckerberg's significant entanglements. [Source](#).

[Source.](#)

From March 18, 2020 to October 13, 2020 – Zuckerberg's wealth also increased by 46.5 billion dollars during the initial phase of the coronavirus. **Zuckerberg, who is a strategic partner of the WEF with his company Meta, must have known exactly what was coming even before the plandemic began. This includes the harsh censorship he is complaining about today.**

If you have not breached the community standards for one month....

883. Say thank you, small man!

Vienna 03/10/2025

Confabulation in politics is nothing new. Mass confabulation by politicians from different parties is a relatively new phenomenon. Not so long ago – five years ago – virtually all parties unanimously declared an invisible virus to be the greatest threat to the world. Any criticism of this approach resulted in the critic being ostracized as a conspiracy theorist, conspirator, etc. We still remember this vividly, because this means of defamation was abused to such an extent that it was widely regarded as a compliment to the critics. This was all the more true as it became clear over time that the vast majority of critical sentences had a solid basis.

The threat made up like a corona has also changed and has been called Putin for the past three years – at least in the West. What has not changed are the methods of the operation. Obvious lies according to a Goebbelsian strategy are repeated on television, and a large part of the uncritical population swallows this propaganda like the lockdown nonsense.

If you wear a mask like a polite sheep, vaccinated yourself for a donut or a trip, poured out your hate on those who tried to warn you, and now you look back and must feel very stupid, right? Every time you look at yourself in the mirror for the rest of your life, remember this – you are a pathetic COWARD.

Perhaps this appeal from the European Union appeals to you?

Dear European citizens,

We are pleased to inform you that the European Union has made a decision for you. Once again. Don't worry about voting or expressing your opinion – we've already taken care of everything.

The biggest threat to our planet? Your bottle caps. We'll be changing their design from tomorrow. Estimated cost of the operation? Just a few billion euros. Why have money when you can have debt?

We've come to the conclusion that it's much more fun to get into debt. We make you take out loans for things you don't need. Creative finance is our favorite hobby. We love shopping with your money. We spend it without your permission and buy tons of unnecessary things that no one asked for.

Is your car still running? What a shame! We've decided you need to replace it because it's polluting the environment. Your house? Sorry, but you'll have to completely rebuild it. We've decided it needs to be "something" – preferably yesterday. The cost? That's your problem.

In the member states, we decide who gets to stand for election. Is that clear?

And now the icing on the cake: we have decided that you must go into debt to "arm" yourself against an enemy we have invented. Remember: democracy is overrated. Let Brussels decide what's best for you – from the shape of your zucchini to your economic future.

Have a nice day! [Source.](#)

Well, yes, but why the bizarre title of today's article? It comes from a discussion on Platform X that was sparked by noted warmonger Radek Sikorski. The whole discussion was described in yesterday's article on Gateway Pundit: [‘SAY THANK YOU’: Secretary Rubio and Elon Musk Put Polish Defense Minister in His Place After Fake Controversy Over Starlink Usage by Ukraine.](#)

In an unprecedented exchange on the social media platform X, US Secretary of State Marco Rubio and DOGE CEO (and X owner) Elon Musk sharply rebuked warmongering Polish Minister Radoslaw Sikorski over Ukraine's use of Musk's Starlink terminals.

884. Another mass psychosis

Vienna 03/12/2025

In yesterday's article [Back to mass psychosis](#) – ([source](#)) on the Austrian platform Tkp.at, we read:

Belgian psychologist Mattias Desmet attracted worldwide attention during the Covid pandemic with his “mass formation theory”. He provided a theoretical basis for how it was possible for society to slip into a mass psychosis, which obviously declared completely irrational things to be the ultima ratio and literally persecuted critics as in the days of witch-burning. Desmet now sees a slide back into the mass formation of collective psychosis.

The similarities between the World War and the threat posed by the coronavirus and the war in Ukraine are so clear that we cannot speak of coincidental, historically unconnected events.

The same methods to stir up unfounded fears in the population.

Why were even those who were terrified by the viral threat five years ago unwilling to accept other invented pandemics such as monkeypox? Because the limit of fear had already been reached. A saturation effect had set in, and adding new medical reasons to be even more scared did not have the expected effect. Instead of panic, the idea of monkeypox triggered gales of laughter.

According to the German Minister of Health:
Vaccinated people have a smoother third world war!

The situation is different when the danger of a war beyond Ukraine's borders is propagated to the West. There is still room for irrational fear here – if you put aside the previous panic.

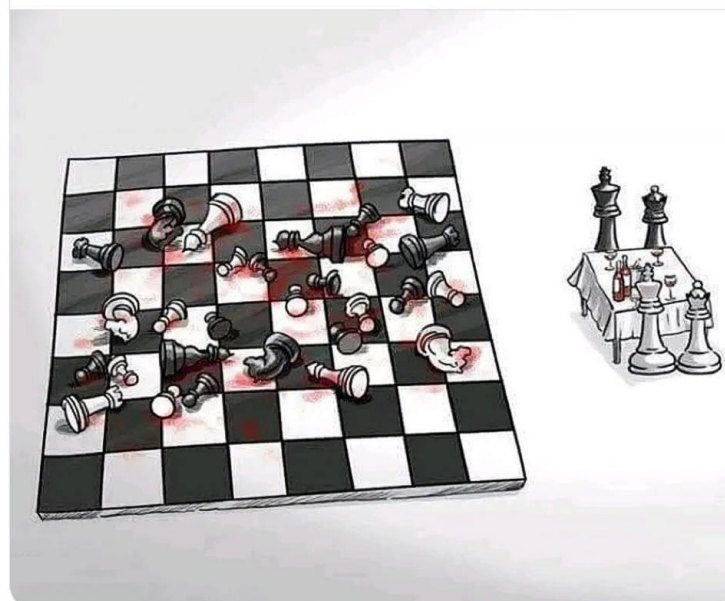

And so every 100 years... brainwashing..., reset... familiar climate.

The worst-case scenario for the Eurocrats would be peace in Ukraine without the participation of European “representatives”. But since they are so adamantly defending the war as if it were about Europe’s “independence”, they exclude themselves from participating in these talks. No, they are not fools, they are pawns moved by panicked globalists.

The reality of war

Game over for the admirers of the United States of Europe – a single state called Europe. A state without history, without culture and without strong, united nations. It is a concept that was doomed to failure from the outset. We are witnessing the last nails being hammered into the coffin of a politically united Europe with a harsh, unrelenting voice the size of a radish.

We're all going to die because of global warming: and more money goes to the green economy.
We will all die because of COVID: and more money goes to the pharmaceutical companies.
We're all going to die because of the Russian invasion: and more money goes to the defense industry.

They think we're stupid, and many of us really have become so....
Simone Pillon.

Cheer up – the ship called Europe will not sink after all! Unless we sink it ourselves.

There are studies that show that we are not going down.

885. Europe – the cradle of democracy

Vienna 03/13/2025

There is no doubt that ancient Greece bequeathed us democracy. We hear voices criticizing Greek democracy along the lines of: What kind of democracy is it where slaves and women were not allowed to vote? What an excellent grasp of ancient history! I would add another counter-argument of mine: What kind of democracy is it if they were elected without ID cards? It's as if the internet should have been used back then to make it easier to count (i.e. manipulate) voters' votes

May the critics of democracy come up with a better solution to tame the human vices of politicians. Take such a constitutional monarchy modeled on ancient Rome. I already have a proposal for the office of European Emperor: Ursula Caligula 2. The problem of the oppression of women has already been solved. The second advantage is that instead of donkeys, we would have a smarter animal – the horse – in parliament.

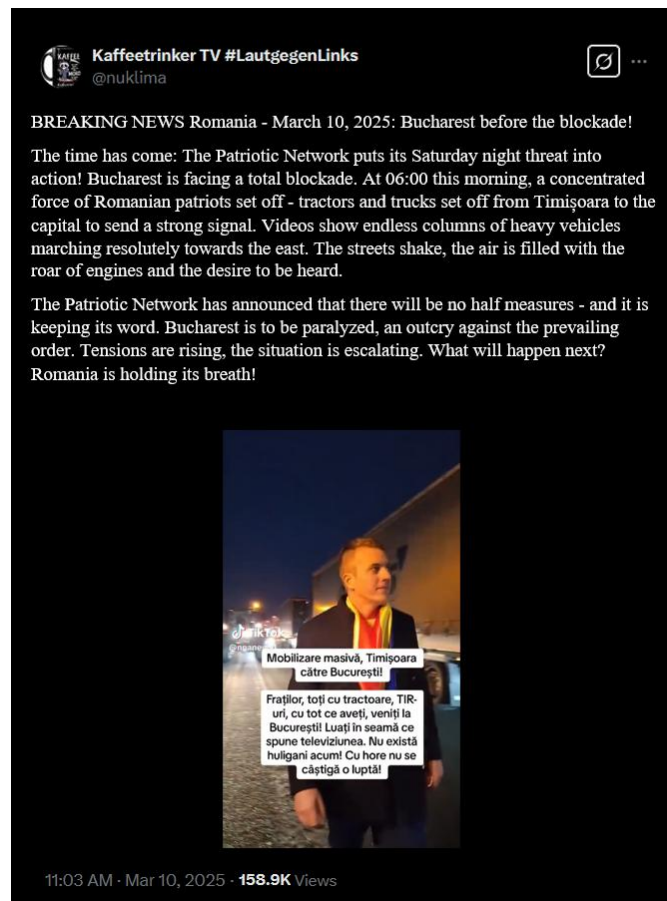

Caligula on his favorite horse Incitatus.
According to the book "I Claudius" by Robert Graves, Caligula made the horse a senator.

Ursula Caligula 2 has shown us what a real democracy should look like. The people vote, the monsters agree. If the people are too immature to vote for “our” candidate – as in most countries – then we make a correction. In what way? We had an example in Romania in December. One Orban is too much for Ursula Caligula anyway! Can we do that? Yes! You just have to maintain ‘real’ democracy. This is the latest version of a constantly evolving democracy. There was people democracy, parliamentary democracy, direct democracy and others, and now there is real democracy.

The topic of defending democracy was taken up by Austria’s Report24 in an article on Tuesday: [The EU’s anti-democratic coup in Romania is a warning to all member states. Source.](#)

“Europe is now a dictatorship, Romania is under tyranny!” – was Calin Georgescu’s comment on the EU’s unprecedented interference in the Romanian elections. The annulment of the election and the arrest of the election winner was followed by his exclusion from the new elections: The EU is “now quite openly assuming the right to intervene in electoral processes and the formation of governments and to exert influence on individual politicians in order to correct undesirable results”, denounces FPÖ leader Herbert Kickl. His demand: the right to free elections must be restored immediately – and not just for the Romanian population.

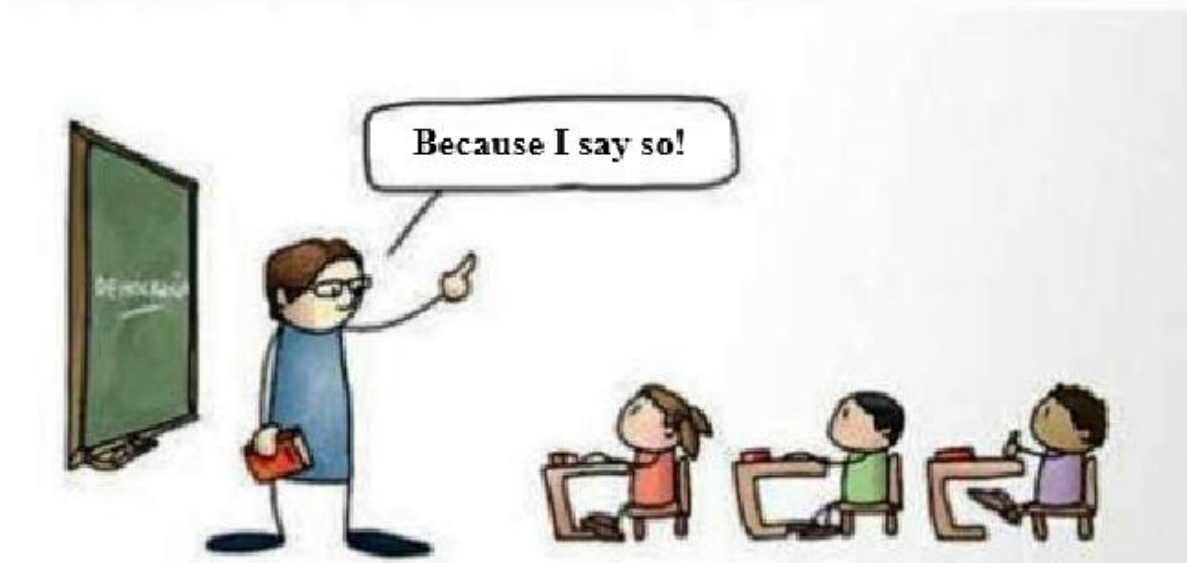

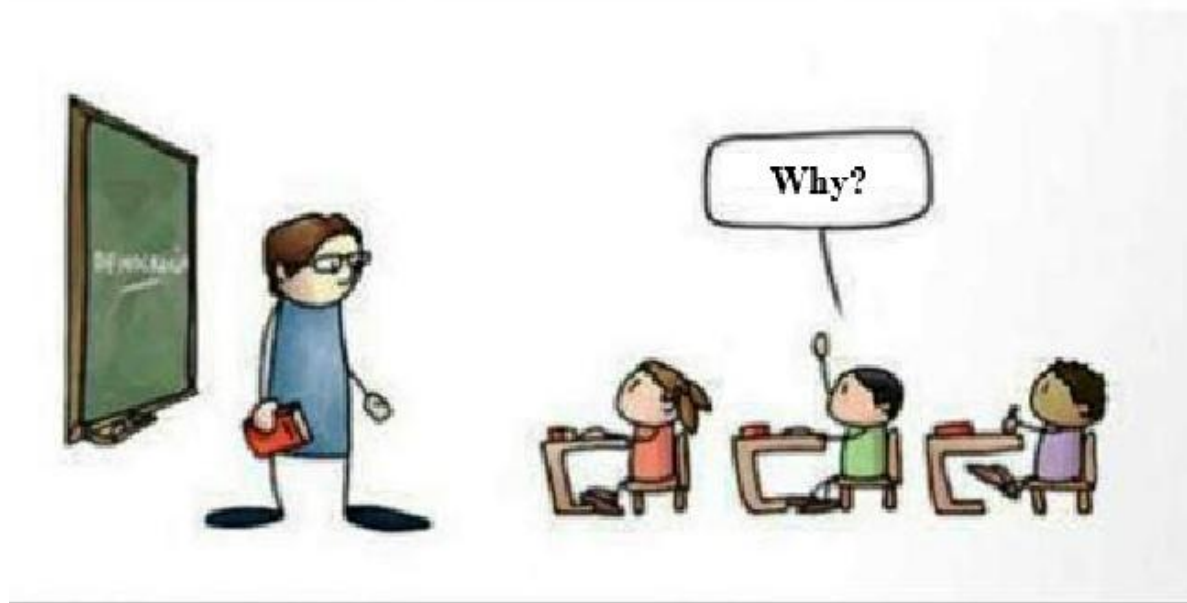

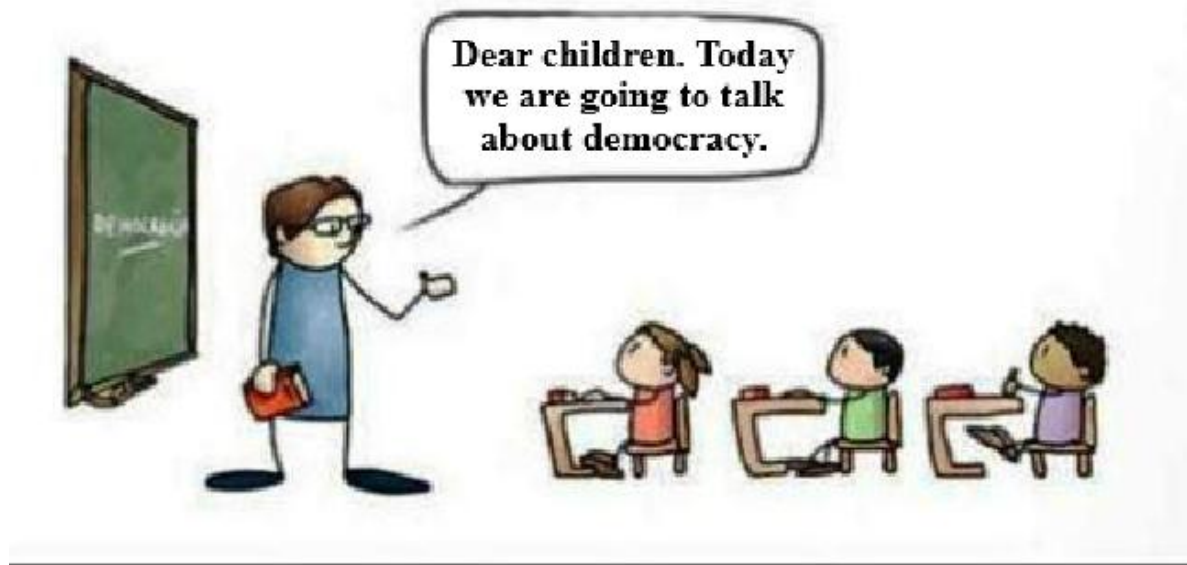

Romania is fighting against EU despotism. Thousands of people have taken to the streets in Bucharest to protest against this “democracy”.

The crowd in Bucharest chants “traitor” in front of the Constitutional Court after the Romanian Constitutional Court rejected Georgescu’s appeal.
Romania’s most popular politician will not be able to run in the presidential elections in May 2025.
AUR party leader (AUR supported the independent Georgescu) George Simion called an emergency meeting of the party leadership to discuss further measures;
Most likely, AUR will nominate its candidate in the coming days, who, if registered, should automatically be the contender for victory.

The

886. Hidden reality

Vienna 03/14/2025

Donald Trump has declared a tariff war on the world! Such and similar misinformation is provided by our truthful television. Occasionally you find pearls in the mainstream that contradict the general consumer education agenda of the mass media. The Frankfurter Allgemeine Zeitung (FAZ) reported in its article, hidden behind a fee barrier, on a comparison of the tariffs of the USA and the European representation of communo-fascism, abbreviated to the EU.

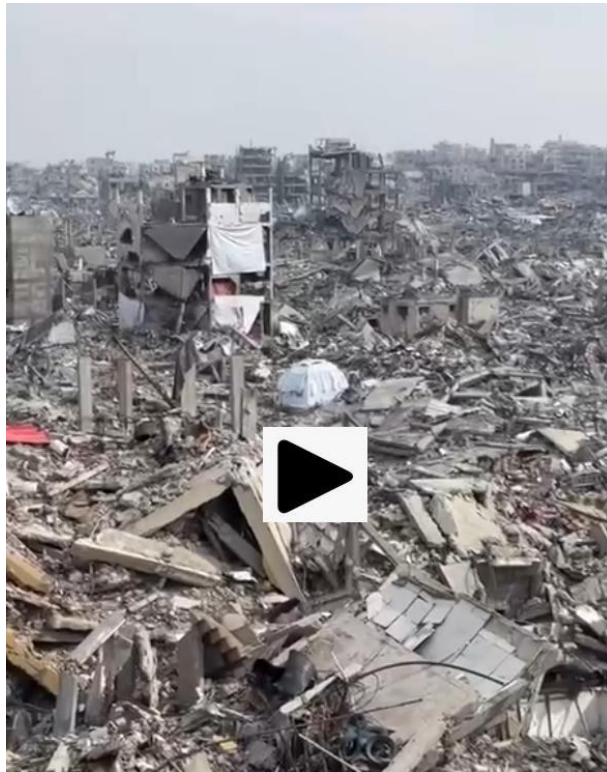

Red bars – the duty imposed for the US by the EU.

Blue bars – the duty imposed for the EU by the US.

[Source.](#)

How bad this Trump is! He will not be fooled any longer. He is replacing the existing 10% tariffs with a 25% tariff! Or should I, as a European, ignore such inconvenient statistics like the ones on TV? After all, it is not to Europe's advantage to make such comparisons. So let's lie to ourselves and others and be the "good" bearers of Western values.

Likewise, we are on the good side when we accept images of the destruction of the Palestinian people as a result of the fight against terrorists.

If you still believe at this point that the IDF is only hunting Hamas fighters, just go and take a reminder shot.

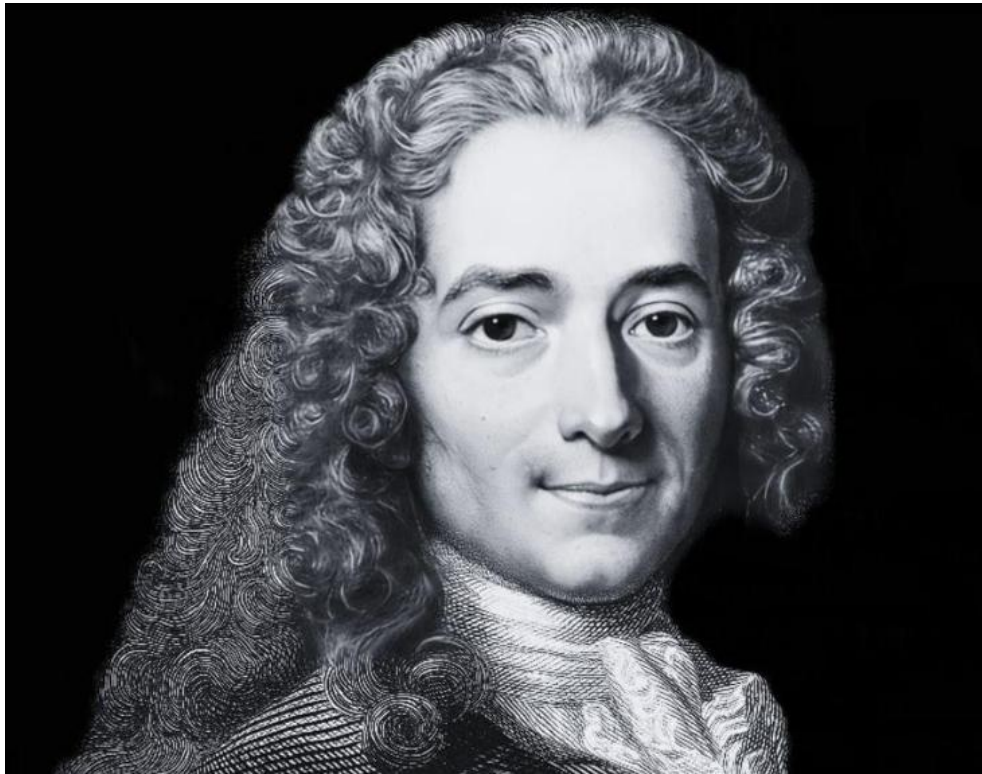

Source: [Telegram 03/13/2025 11:49.](#)

Closely related to censorship – i.e. combating disinformation by promoting disinformation – is the frequently used tactic of avoiding stress with the ostrich method:

At a time when fear is spreading on a massive scale, it is not easy to keep your wits about you. There are four golden points you can rely on to stay sane:

- Do not watch television;
- Don't listen to the news on the radio;
- Do not read hypocritical newspapers;
- If you find that your online source is causing anxiety, switch to another one.

Those who can convince you to believe in absurdities can also convince you to commit atrocities.

It's a good idea to take time to focus on a neutral topic, listen to music and talk to loved ones without bringing up political issues.

887. Customs is evil

Ostrzeszów/Poland 03/16/2025

Can you imagine a world without taxes? Not so long ago, and not behind seven mountains, seven forests, that was the case. Back then, customs duties were the main source of revenue for states. Income tax in its original form was to replace customs duties and only be levied on the rich. Everyone liked the idea, except the rich.

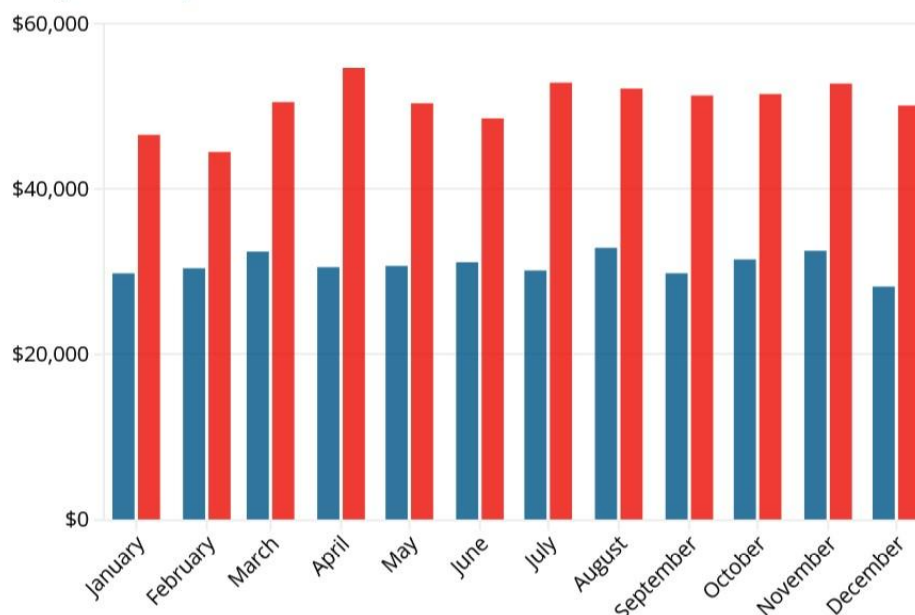

In a [previous article](#), I gave a comparison of US and EU tariffs on certain goods. Today you can see how high the tariffs were between the EU and the US in 2024.

U.S. trade in goods with European Union, 2024

(In millions of U.S. dollars)

■ Exports ■ Imports

[Source.](#)

No country gets richer through a tariff war. Tariffs to protect their own market drive up the prices of foreign goods. The economic ping-pong game has begun. Of course I don't support the tariff war. It's like a child's fight – he started it!

You see the analogy with the war propaganda: Putin attacked Ukraine for no reason and the current tariff propaganda: Trump imposes tariffs on the rest of the world for no reason? Both are based on fact, and both are based on lies. They are spread by the same people who claimed that the crown-shaped virus attacked all of humanity for no reason, while the flu was simply on vacation.

Last

years' flu season.

People often ask why I get things mixed up. Plandemia with the war in Ukraine, with the tariff war, the scams of modern medicine, the planned migration of peoples, the poisoning of people with food, water and air (poison plumes in the sky) and climate hysteria to boot. These are all elements of the same anti-human strategy of the would-be owners of our planet.

Of course you can criticize Trump's methods – they are indeed too often radical. But can you treat well-organized crooks with kid gloves? For me, the most important thing is to fight the globalists of Davos, the Deep State or Freemasonry. It doesn't matter what we call them, the important thing is that we fight them and have the president of a world power on our side.

Look in the mirror. You will see the one man who can change your life.

888. Human rights defenders

Ostrzeszów/Poland 03/17/2025

In June 2022, I wrote about the [sensational reports by Ukrainian human rights lawyer](#) Lyudmila Denisova. She described her erotic fantasies of mass rape. The Western media reported unchecked on these imaginary rapes of civilians by Russians. When the lies could no longer be maintained, the Ukrainian parliament dismissed Ms. Denisova from her post as ombudswoman.

Not for fun, the "United Nations Declaration of Human Rights of December 10, 1948" states: "Everyone has the right to work, to free choice of employment, to just and favorable conditions of work and to protection against unemployment."

The right to fair and satisfactory remuneration was completely ignored by the Ugandan Human Rights Ombudsman in the UK. Read yesterday's article in Report24: [UN judge with human rights training convicted of modern slavery](#). [Source](#).

In a sensational case, 49-year-old Ugandan judge Lydia Mugambe was found guilty of modern slavery in the UK. The conviction casts a shocking light on the discrepancy between her professional position as a UN judge and human rights expert and her personal behavior. Is this the much-vaunted "cultural enrichment"?

I must admit that I was pleasantly surprised by the proper use of the rule of law in a country where you go to jail for praying near an abortion clinic. Abuse of power is everywhere, whether you support the party of the perpetrators or not. On a related note, I have another conspiracy theory for you:

Ever wondered how both the left and right wings belong to the same bird?

Think about this before you devalue someone from a camp other than your own. You can find more information on this topic in the article: Left, right – what's the difference? The division into several political directions is intended to make it easier to find your way through the labyrinth of political stances. At the same time, it makes it much more difficult to understand that there is no such thing as a purely left-wing or right-wing stance. Most politicians defend their own party's agenda not out of conviction, but for the sake of their career. Leftists have as much in common with the left as Joseph Stalin had with democracy. National Socialism, on the other hand, has as much in common with the right wing as General Pinochet has with the rule of law.

Let us return to the subject of the defenders of human rights being defended by degenerates who trample on these rights. We are dealing here with an Orwellian distortion of reality. War is peace. Freedom is slavery. Ignorance is strength. Under these conditions, human rights become a crime against humanity. Especially when they are defended by such judges.

889. Panic in the henhouse

Ostrzeszów/Poland 03/18/2025

Five years ago, we were surprised by the first global lockdown. Democracy before was what it was – today we remember with tears in our eyes open public discussions with many participants and many views on every topic. Now we have a front of global unity, at least as far as the views propagated by the media are concerned.

The inventors of the latest pandemic have gone chicken. Not only are they slaughtering millions of chickens to drive up egg prices, but they also want to let smaller poultry farmers off the hook and control food production.

Globalization.

Wolf carried a few times, and wolf got carried too. Fear – the most important tool of the globalists – has suddenly become its own curse. Of course, it's not fear of a virus, Putin or the climate. They invented those themselves, so they're not afraid of that nonsense. They are obsessed with the fear of losing control of the world. That was their overriding goal, and now they have their backs to the wall and can only rob us of billions by sowing visions of a menacing Putin out for the blood of Europeans.

What kind of globalism is it that is limited to only a small part of our globe? Europe, Australia, Canada and a few smaller Asian countries all seem to be regions of the world dependent on the global clique. And it was so good! The painstakingly devised plan for world conquest has turned out to be a utopia. An expensive utopia.

Today, this global clique resembles frightened chickens jumping around headless in the henhouse. This is best illustrated by the behavior of the members of the European Commission, who are frightened by the vision of peace in Ukraine. How can that be! We have sent so many weapons and so much money to support these mutual murders of random people? And the oppressive sanctions against Russia. They should finish off this colossus on feet of clay! Clay feet, as it turns out, is the EU itself.

During the bombing of Syria – in 2011 – by democratic Europe and the US, not one of the hundreds of French missiles that were fired hit their target. And now France is offering Europe a nuclear umbrella, with 500 similar missiles equipped with nuclear warheads! By comparison, Russia has more than 6,000 such missiles, and the accuracy of Russian missiles has been dramatically demonstrated by the Ukrainians and allied military advisers.

The creation of a European army is a wonderful, albeit long overdue, idea. It is a process that takes time. We will see in ten years' time what effect it has when it is realized. I don't think the anti-Putin

panic will last that long. Besides, this is not about creating an army, but about plundering Europe. Special assets – that's what the European Union has called the 800 billion euro loan. I would suggest going to the bank and applying for a special fund – let's see how high the interest on this debt will be.

Another failure of the globalists is emerging. It turns out that most of the more than 8,000 pardons Biden used to pardon criminals were signed by a computer. Take a look at a comparison of the signatures on four of them:

Court will decide on the compatibility of these pardons with US law.
And again, the chickens, including Anthony Fauci, are in a panic!

Ostrzeszów/Poland 03/19/2025

It is no longer a theory. It's not even a conspiracy. We already officially know that we are poisoning our atmosphere. No, it's not cows spewing gases from their intestines that are poisoning our air. It's airplanes spraying toxic fumes. Depopulation underway? Not at all – the already burning planet is being cooled by chemical fumes in the sky as planned.

The newly released report, titled "[Contrails Research Roadmap 2025](#)," lays out plans for "routine, system-wide contrail management" by 2050. Multiple federal government agencies have just admitted that planes have been spraying lingering chemicals into the sky that alter the weather. The bombshell admission was revealed in a new report published by the Federal Aviation Administration (FAA), the National Aeronautics and Space Administration (NASA), and the National Oceanic and Atmospheric Administration (NOAA). Ostrzeszów/Poland 03/20/2025

The most recent was a two-month-old boy who died one day after receiving HIB, rotavirus and pneumococcal vaccines. The child, who died on January 23, 2024, became suddenly ill 30 minutes after the injections. Asystole (cardiac arrest) occurred in the hospital 59 minutes after vaccination. An excerpt from today's article on tkp.at: [Number of deaths among vaccinated children increases.](#)
[Source.](#)

CDC could try to force parents to vaccinate their children. The health authorities will not draw any consequences from the vaccination – on the contrary, they will intimidate the parents of the deceased child with the consequences of spreading “misinformation” if they want to report on the tragic story in the independent media. It is not the medical profession or the relevant authorities, but the parents who are responsible for the life of their child. Whether they are aware of this responsibility or not.

Compulsory vaccination in Europe.

[Source.](#)

Who should fight for the life and health of the child if not the parents? Perhaps you are still relying on the good will of the Ministry of Health, the medical associations and the health inspectorate? The will is there, but is it good? The era of the great hypocritical corona has shown us how they can be relied upon. These officials, like politicians, are beholden to globalist forces and represent the interests of Davos in your country. The following movie, of course, shows the tendencies of the authorities with exaggeration, but is it so unrealistic?

“Voluntary” vaccination.

Boosta will be happy to drive you to the vaccination center.

So what can we do? In the next elections, vote for the politicians that the globalists don't want to accept. All the others are approved by them because they are their people. Think about it, which one of them is the salt in the eyes of the officials who worship the Green Deal? You will only find one party that truly represents the interests of the people and not the globalist putschists from Davos.

892. Trump closes the Department of Education

Ostrzeszów/Poland 03/22/2025

The presidential decree signed on Thursday to dissolve the Ministry of Education is causing fierce controversy among supporters of the old policy of promoting green myths in the education system.

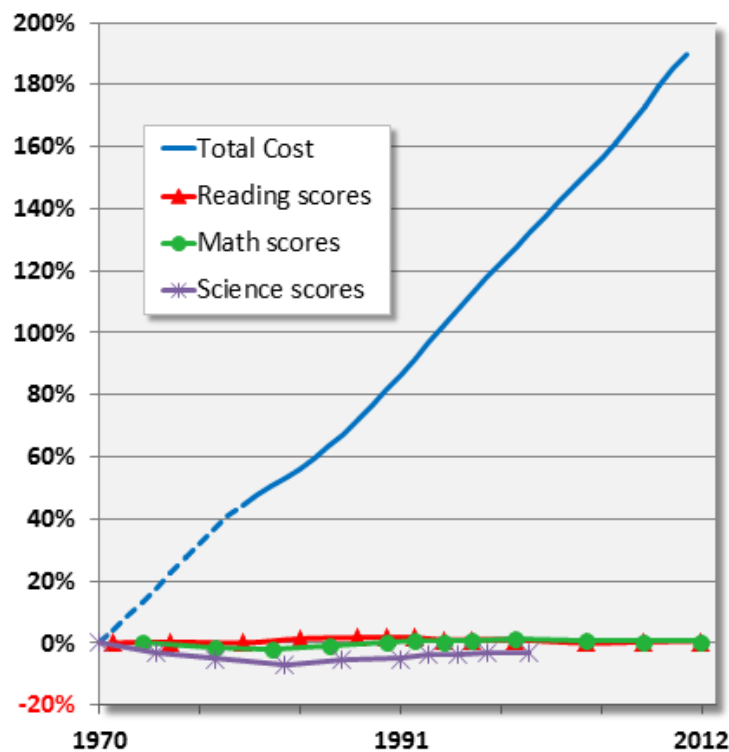

Trump signs executive order to eliminate Dept. of Education.

How so! Given that the American education system ranks near the bottom of the world's industrialized countries, the question arises as to whether the agency that regulates the education system should be shut down. Well, the department is responsible—but how does it do it? Documents show that the illiteracy rate in the United States fell from 20% to 0.6% between 1870 and 1979. [Source](#). Then Jimi Carter established the Department of Education to make education available to the poorer segments of American society.

An assumption worth supporting. However, 38 years after President Carter's decision, the illiteracy rate in the United States was higher than it had been in 1870.

Four in five U.S. adults (79 percent) have English literacy skills sufficient to complete tasks that require comparing and contrasting information, paraphrasing, or making low-level inferences—literacy skills at level 2 or above in PIAAC (OECD 2013). In contrast, one in five U.S. adults (21 percent) has difficulty completing these tasks. [Source](#).

People at the intellectual level of proponents of hundreds of genders are screaming that we should redouble our efforts and spend \$500 billion, because \$268 billion isn't enough to raise educational standards. For them, the effectiveness of investments is an incomprehensible concept. No wonder, since the world is divided between men, women, and a handful of mentally ill deviants who spread such nonsense. No, I'm not homophobic. I don't care about other people's erotic interests. As long as they don't hurt anyone.

The time will come when those who have spent years acquiring knowledge will have to apologize to those who never sought it. Wisdom will turn into arrogance, and ignorance will become the new virtue. Instead of speaking openly about the facts, reasonable people will be forced to remain silent so as not to offend those who prefer to believe convenient and commonplace lies. When the truth requires justification and stupidity becomes the voice of the majority, it is a sign that the world is headed in a dangerous direction.

In a statement today, the national president of the American Federation of Government Employees, Everett Kelley, said Trump's "directive to eliminate this small but mighty agency would destroy our education system and devastate future generations of students." [Source](#). This is the argument of the supposedly educated. They lack the courage to investigate the activities of this American office. Its primary task was to provide financial assistance to needy students. Trump has transferred these activities to the Treasury Department.

893. Wave of terror in the USA

Ostrzeszów/Poland 03/24/2025

Molotov cocktails, gunshots, burning cybertrucks: attacks on Tesla vehicles and facilities are on the rise. The US government now classifies this as terrorism and wants to crack down on it. We can read in the article [Terror against Tesla: Trump counterattacks! \(source\)](#) on compact-online.de.

One may, like me, dislike electric-powered vehicles. However, this is not a reason to attack anything that has anything to do with Tesla. The real reason is fear – a tool eagerly used by globalists. This time, that fear has caught up with them over the activities of DOGE – an organization led by Elon Musk to combat corruption and waste of public money.

The recent wave of attacks on Tesla facilities has reached a disturbing dimension. While the FBI has already launched investigations into several violent incidents against Tesla service centers, showrooms and charging stations, the George Soros-funded organization Indivisible is apparently planning a coordinated protest campaign against the American company. His well-coordinated team and his majority in both chambers give him power and opportunities that he did not have back then.

The threat of deportation – even of American citizens who have become terrorists – to the world's toughest prison in El Salvador is capable of deterring even the toughest opponents.

There is no danger of a repeat of the 2020 riots. This time, the Trump government has the means to keep the streets of American cities calm.

How is it that such lawlessness is being spread in Brazil in the name of the law? Mr. Lula da Silva, who was sentenced to 26 years in prison for corruption, was released before the last elections due to a decision by the public prosecutor's office because of "procedural errors". I refer all interested parties to two articles: [Brazil after the "elections"](#) and [The truth about Brazil](#). After the United Kingdom, Canada and the European Commission – but that's not a country – Brazil is the most pro-globalization country.

In Europe, more precisely in Austria, the Covoid vaccination was introduced three years ago. This led to the largest protest rallies against health terrorism in Austrian history. The law came about thanks to an overwhelming majority in parliament and was never enforced. In Brazil, the protests were violently suppressed and now the cruel terror against Brazilians is spreading.

"During the pandemic, a separate program was set up to administer the COVID-19 vaccine outside of our national program. This year, we are integrating this vaccine into the national vaccination program," explained Ethel Maciel, Secretary of Health and Environmental Surveillance at the Ministry of Health. Quoted from an article published in November 2023 on [agenciabrasil.ebc.com.br](#). [Source.](#)

The parents of a one-year-old child who refused to have their daughter vaccinated against Covid-19 have been fined R\$ 20,000 [Brazilian real] by a court in Jaguaruna. The verdict was handed down last Wednesday (28/08/2024) in a civil case brought by the 1st District Public Prosecutor's Office. The verdict states that the parents committed a criminal offense by not vaccinating the child based on their personal beliefs. The child should have received the first dose at six months, the second at seven months and the third at nine months. [Source.](#)

895. Just a small stitch

Ostrzeszów/Poland 03/26/2025

Does it hurt? That's what a child always asks. It asks the parents, the nurses, the doctors. And the answer shows what our attitude to the child is. Unfortunately, the answer is usually: "No, it will only be a small stitch, nothing like that". Because we can either lie to the child or tell the truth. I think telling children the truth in an age-appropriate and understandable way always pays off.

Wasn't everyone treated like a child when an untested product was advertised on TV to prevent a made-up disease? It was only tested for effective genocide. An effective genocide is one where not all the guinea pigs die immediately. Then news of the fatal consequences would spread quickly and the effectiveness of such an elixir would drop to zero.

For this reason, more than four years after the "vaccination campaign", the deaths are still taking their toll. A young Australian rugby referee. Was he vaccinated against the most modern disease in the world? A purely rhetorical question.

Being stabbed with a needle or a knife is the result of the globalists' "philanthropic" policy. Millions of deaths in the fight against pseudo-disease are obviously not enough when the goal is to keep only 500 million slaves alive.

It is much easier to convince yourself that you are a hero ...

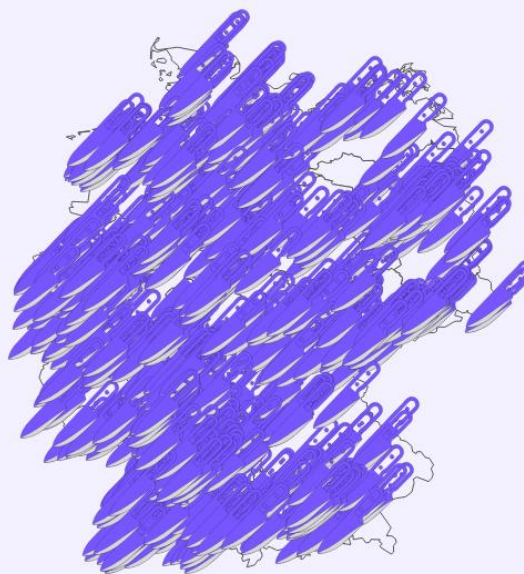

... than to realize that you were involved in one of the biggest scams in history.

Another version of Nadelstich is dedicated to the German website messerinzidenz.de/. This project is based on a comprehensive collection and aggregation of police press releases from across Germany relating to incidents involving knives or other stabbing weapons.

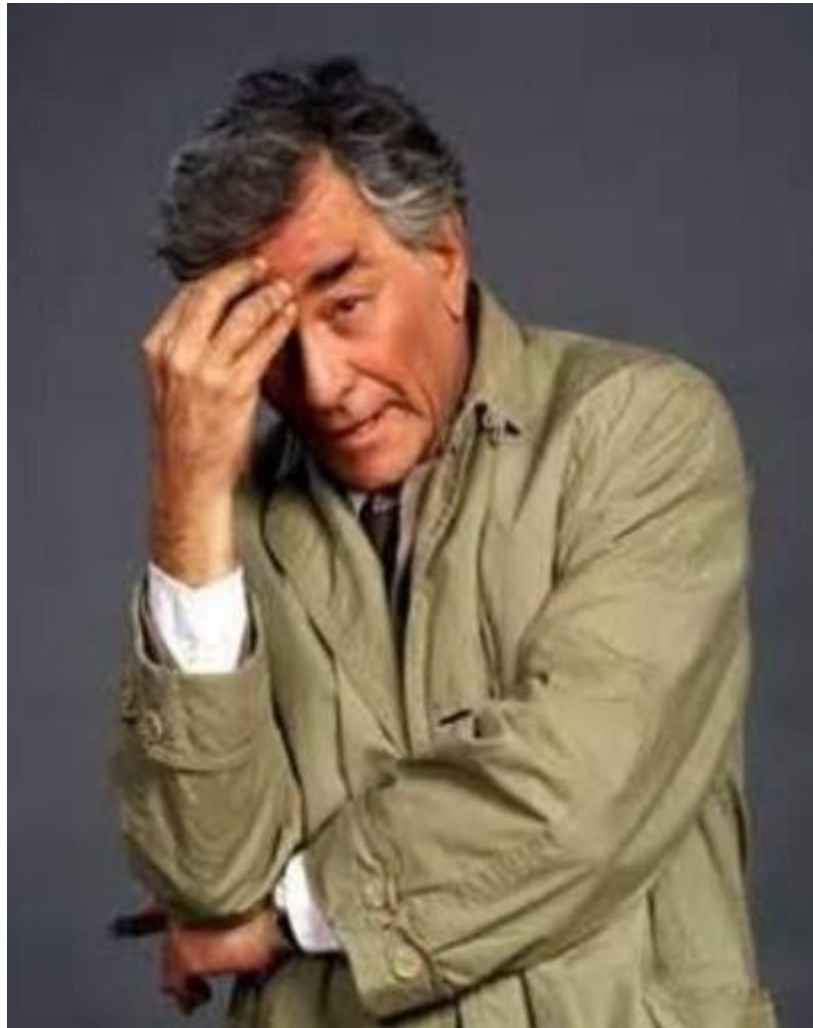

This week, 33 incidents of attacks with sharp blades were recorded in Germany on Monday and Tuesday. Since the beginning of the year (84 days) there have been 950.

Vom 01.01.2025 bis 26.03.2025 wurden mindestens **950** Delikte gemeldet

From Jan. 1, 2025 to March 26, 2025, at least 950 white gun torts were registered.

Psychological warfare requires sowing panic. After the Corona, the heat-scorched planet and the war in Ukraine, the source of fear is knives in the hands of refugees.

Last question: where will refugees and social tourists actually flee to when Germany goes to war?

896. There is no cure for flu

Ostrzeszów/Poland 03/27/2025

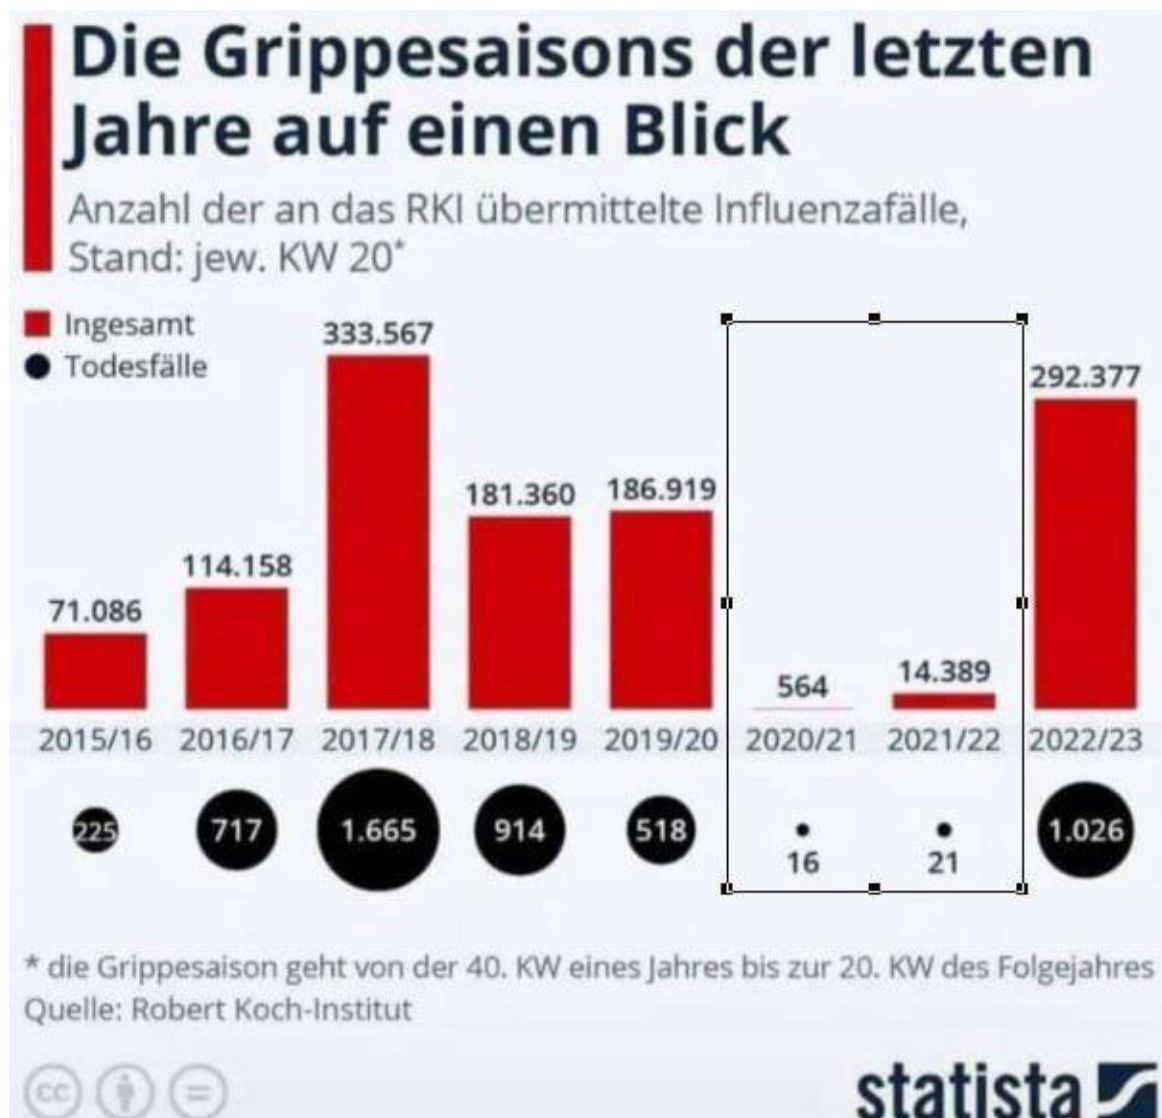

There is and cannot be a cure for the flu, because the flu is a cure. It is the body's response to its poisoning. Dr. Herbert M. Shelton said. He was born on Sept. 6, 1895, in Texas. Dr. Shelton believes that the flu is not a disease, but the most powerful natural way to restore health. Source: "Fasting Can Save Your Life" by Herbert M. Shelton.

Dr Herbert Macgolin Shelton.

Fighting the flu is like attacking an ambulance that came to help after a serious accident. The statistics record deaths from flu. They show people who were diagnosed with flu symptoms and who were mostly treated. Today, treatment is only about fighting the symptoms of the illness, not its causes.

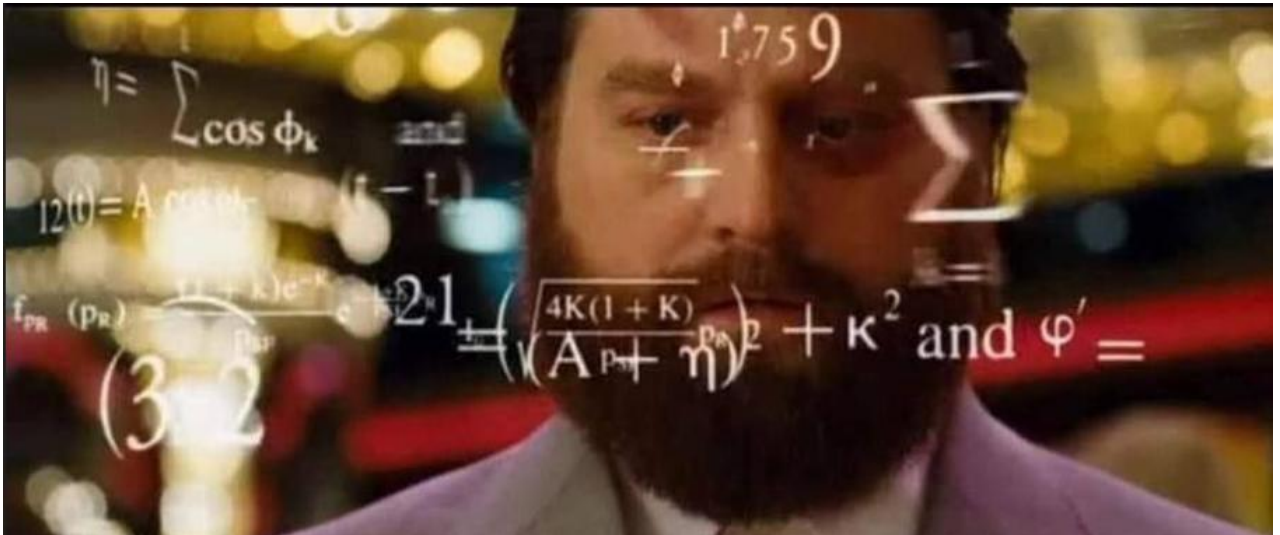

In a previous article, I mentioned this statistic:

A review of the last few
flu season in Germany.

In the 2020/2021 and 2021/2022 seasons, flu has virtually retreated and made way for a more modern disease. To date, no one has been able to scientifically prove how flu spreads. The touted droplet method has no validity in clinical trials. It's clear to all of us that being around flu sufferers can lead to infection. The problem is that not everyone gets infected. There are many theories about this. I'm for those who say that people who are less likely to get infected are less likely to be poisoned by drugs, food and air.

897. The stars are fading

Vienna 03/29/2025

The stars on the euro banknotes are fading.

The issue of Poland joining the eurozone has always been a polarizing topic in the public debate in Poland. On the one hand, according to the treaties, we must join the euro, but on the other hand, it is not clear when this should happen. No specific date has been set.

For years, the Polish political class has practiced procrastination in this regard: since we don't have to adopt the euro now, we should do everything we can to adopt it as late as possible. This is due to the fact that the idea of introducing the euro has never met with much approval in Polish society. A survey conducted by the Ariadna National Research Panel shows that support for Poland joining the euro is currently at a record low and continues to fall. Today it stands at 26 percent, although in January of this year it was just under 31 percent according to the Eurobarometer. I am quoting from the [report published on Tuesday by the WEI](#) (Warsaw Enterprise Institute) on the introduction of the euro in Poland.

100 PLN – Samples.

For me personally, the introduction of the European currency would have one advantage: if I came to Poland every month, I wouldn't have to worry about the exchange rate. This is also the view of many Polish entrepreneurs. However, this is the only argument, and if a referendum were announced in Poland on replacing the zloty with the European currency, I would vote to keep the Polish zloty.

[Poland reportedly has more gold reserves than the United Kingdom](#) – 420 tons in November 2024. Since there is no Fort Knox in Poland, a considerable part of Polish gold is stored at the Federal Reserve Bank (FED) in New York and the Bank of London in England. [Source](#). This means that Poland holds most of its gold in the form of a certificate that entitles it to take some or all of the deposited stock in the future. Venezuela found itself in a similar situation when the [Bank of London refused to release the gold](#) because the bankers there did not like the elected – just or unjust – President Nicolas Maduro.

According to the Polish Minister of Finance, Poland's gold reserves are held in the country.
He did not say in which country.

I would like to point out that Poland will elect a new president in a few weeks. What will happen to Polish gold in England if a candidate wins who is not promoted by the globalists? Poland will continue to hold a gold certificate ... An even worse fate has befallen Libya, which is said to have [held 144 tons of gold](#) 14 years ago. After a bloody war instigated by NATO, the gold disappeared, Gaddafi was murdered and chaos still reigns in Libya today. This is how so-called Western values are defended, which, as you can see, are backed by gold.

898. Five years of war against humanity

Vienna 03/30/2025

Five years ago, I wrote [my first article in this blog](#). It was the time of effective scaremongering about an invented virus. Why invented? Because there is still no evidence of viruses as the cause of disease. So I still believe that the theory of a virus made in a Chinese lab (with American money) was invented to draw our attention to “evil” China. Again, I must add that I consider the Chinese authorities to be a major factor in the war against humanity. I do not blame the Chinese in any way. Do we have any influence on the decisions of our governments?

When you realize that the two most profitable businesses are war and disease, it is easy to understand what is happening here.

If you read my first article, linked above, I'm sure you'll realize that I considered the claim that a group of people want to take over the world to be a conspiracy theory. Despite the fact that I haven't watched TV for a quarter of a century – for once, when I'm at someone's house and the TV is blaring, I have no way of escaping – the only correct way of thinking, which has been subliminally conveyed for decades, has also provoked the expected reaction from me. None of us need be ashamed of this. What we need to be ashamed of is when we stubbornly insist on misconceptions and refuse to admit that we are wrong.

With the return of retro fashion, I hope that common sense and intelligence become socially acceptable again ...

It was the plandemic that made me a journalist. I have an international journalist's card. My ENA ID number is 17289, and I never thought of going into journalism before. It was the hypocrisy of the media and their one-sided reporting and interpretation of events and their silence about important facts that influenced my decision to report on current world events that affect us all. I have chosen to do this work for free, without advertising or sponsorship from readers. I am not against financial support for independent media. I myself support my 'competitors' as much as possible with donations, especially the brave ones who report even if the content is not 100% in line with their beliefs.

Sheep are afraid of wolves all their lives, and the shepherd eats them.

The first phase of the war was a pandemic. It is estimated that over 25 million people died and 200 million were seriously injured.

The second phase of the war – global warming – the number of victims of environmental hysteria is unknown.

Third phase of the war – mass migration – i.e. planned illegal migration to destabilize the richer countries. There are deaths every day.

Fourth phase of the war – war in Ukraine – estimated number of victims 1.5 million people and 20 million maimed.

Fifth phase ...

Some sheep only wake up when their wool is already on fire!!!

According to the globalists' theory, there are still too many of us. When they have reduced the number of people in the world to 500 million, they will retire to a well-deserved rest.

Reasons for wars – briefly and emphatically.

899. President Eisenhower

Vienna 03/31/2025

Dwight David Eisenhower (1890-1969) – American officer, Commander-in-Chief of the Allied Forces, twice elected President of the United States after the war. He was nicknamed “Ike”. [Source](#). He was President of the United States from 1953 to 1961 and was succeeded by John F. Kennedy, who was assassinated in November 1963.

Eisenhower's final speech for the presidency.

I found [this speech at the end of the presidency](#) on Eisenhower's website. Why did I find the late US President's speech important after 64 years?

In the councils of government, we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the **military-industrial complex**. The potential for the disastrous rise of misplaced power exists and will persist.

We must never let the weight of this combination endanger our liberties or democratic processes. We should take nothing for granted. Only an alert and knowledgeable citizenry can compel the proper meshing of the huge industrial and military machinery of defense with our peaceful methods and goals, so that security and liberty may prosper together.

As President of the United States, he knew very well what he was talking about, a threat so obvious today that at the time was only seen by those close to the presidential administration. Two months into Eisenhower's presidency, the “sunshine of nations”, a certain Stalin, died. This made it possible to initiate a thaw between the United States and the USSR.

This thaw was not so easy, considering the US role in the overthrow of the democratically elected pro-Moscow Iranian President Mohammad Mossadegh in August 1953. Today we would hear that this was necessary in defense of democracy. In reality, it was in defense of the interests of American and British oil companies. Does this not remind us of the situation in Romania, which began four

months ago? Although the Romanian oil fields do not play a major role, the seizure of power by anti-war forces in a country bordering Ukraine was decisive.

The shooting down of a [US Lockheed U-2 spy plane](#) over the USSR in May 1960 and the arrest of the US Air Force pilot by Russian services also severely cooled the not exactly warm US-Soviet relations.

Sometimes you have to be great to take back your own words, put your ego aside, overcome pride and admit your mistakes.

This is not a sign of weakness, but an expression of maturity and personal growth.

I think readers will be interested in the person of John Foster Dulles, Secretary of State in the Eisenhower administration.

After the Wall Street Crash of 1929, Dulles's previous practice brokering and documenting international loans ended. After 1931 Germany stopped making some of its scheduled payments. In 1934 Germany unilaterally stopped payments on private debts of the sort that Dulles was handling. After the Nazi Party came to power, Dulles expressed sympathies for Adolf Hitler, requiring his legal staff in Berlin to sign "**Heil Hitler**" on all of Sullivan & Cromwell's outgoing mail; fearful of the optics, Sullivan & Cromwell's junior partners forced Dulles to cut all business ties with Germany in 1935. Nonetheless, Dulles and his wife continued to visit Germany until 1939. He was prominent in the religious peace movement and an isolationist, but the junior partners were led by his brother Allen, so he reluctantly acceded to their wishes. [Source.](#)

The Wikipedia articles on Dulles are also available in Polish and German. The [German article](#) presents Dulles as an opponent of Hitler, while the [Polish article](#) completely ignores this topic.

Eisenhower took part in the Normandy invasion during the Second World War. In December 1944, he was promoted to the rank of General of the US Army.

900. The story of a lost war

Vienna 04/01/2025

This is probably the first time that mainstream media such as the New York Times have written about the US-led war against Russia. At the expense of Ukraine, of course. I read with interest a long article about how the US generals have organized every step in this war. Well, yes, several steps that Ukraine took without asking permission from an ally. The article was of course not free of propaganda in the sense of “Russia is weak”. Apparently you have to be weak to win a war against the US. [Source.](#)

On a spring morning two months after Vladimir Putin’s invading armies marched into Ukraine, a convoy of unmarked cars slid up to a Kyiv street corner and collected two middle-aged men in civilian clothes. Leaving the city, the convoy — manned by British commandos, out of uniform but heavily armed — traveled 400 miles west to the Polish border. The crossing was seamless, on diplomatic passports. Farther on, they came to the Rzeszów-Jasionka Airport, where an idling C-130 cargo plane waited.

It sounds like a crime novel – it is the story of the USA building a front against Russia. We learn many interesting details about the disputes and conflicts of interest between the allies. We won’t learn anything about the Ukrainian Nazis, but that would be asking too much of the New York Times.

This is not the New World Order.
This is the Nazi World Order.

Time and again, the Biden administration authorized clandestine operations it had previously prohibited. American military advisers were dispatched to Kyiv and later allowed to travel closer to the fighting. Military and C.I.A. officers in Wiesbaden helped plan and support a campaign of Ukrainian strikes in Russian-annexed Crimea. Finally, the military and then the C.I.A. received the green light to enable pinpoint strikes deep inside Russia itself. In some ways, Ukraine was, on a wider canvas, a rematch in a long history of U.S.-Russia proxy wars — Vietnam in the 1960s, Afghanistan in the 1980s, Syria three decades later.

Do not be afraid...
I will defend you...
I am a soldier.

How does the fairy tale of the evil Putin, who once decided to attack innocent Ukraine because he had slept badly, fit into this context? How does the [false flag operation in Bucha](#), where Azov troops massacred civilians in April 2022 after Putin's troops had withdrawn, look, just to blame the crime on the Russians?

You promised to support Ukraine against Russia, now you are giving money and missiles!

901. How polio was “eradicated”?

Vienna 04/02/2025

If someone likes it, they can call me an anti-vaccinationist. Pigeonholing me doesn't change anything, except that it makes such a manipulator feel better. It would be closer to the truth to say that I am against fraud, especially in medicine.

If you're unvaccinated, you resisted global propaganda worth over 100 BILLION DOLLARS.

The fact that you withstood such intense pressure shows how strong you are, making you a rare bread in a time when that kind of backbone is nearly extinct.

Be proud of yourself.

Jan 16, 2025 Kash Patel

Everything you've been told is a lie—especially when it comes to polio. Dr. Suzanne Humphries reveals what really made all those polio cases disappear after the vaccine was introduced. Article published on Thursday on vigilantfox.com: [Joe Rogan Guest Completely Shatters the Vaccine Narrative.](#)

The real change that happened, according to Humphries, wasn't the vaccine's impact—**it was the definition.** “Polio is called different things today,” Humphries explained. “Whereas back in the 1940s, 1950s, the criteria for diagnosing polio were completely different to the year that the vaccine was introduced. The playing field, the goalposts—everything was changed... they were able to show a complete cascading drop of paralytic polio simply because of the way **they changed the definitions of what polio is and what could cause it.**”

The flu vaccination has been around for 78 years and we still have the flu....

There are probably still some people who are surprised by the deceptive methods used in medicine, but most of them still don't know about it. They don't find out about it from television, the press or the radio. Why is that? Because the pharmaceutical industry has the greatest influence on the media through its corporate takeovers or its dominance of the advertising market for so-called medicines.

Pharmaceutical companies do everything ... no, not for our health – for our money.

You can watch Dr. Humphries' interview with Joe Rogan on YouTube in the article quoted at the end. You say: two and a half hours for an interview? Sure, it's better to spend that time with serials....

But since you are reading this article, you know that there are more important things in the world than bread and games. Dr. Humphries debunks yet another myth of vaccine genocide propaganda. If you are outraged by such an attitude to the wisdom of vaccination, which you have always believed to be effective, then consider where your beliefs have led you. Ask your friends how their bodies reacted after another flu vaccination? Most will answer that they came down with the flu immediately after the vaccination. These are the answers I get most often when I ask about this. Some are already prepared for the flu immediately after the vaccination – so you can plan your absence from work well.

Take a look at what the fear of viruses can lead to.

5 years after the biggest psychological operation in human history

Most Vaccinees act as if nothing has happened.

They want to forget their cowardice and their absolute obedience to the control system that wanted to enslave and kill them.

Today they are all smiles without muzzles, hoping that we will forget and forgive them.

There will be no forgiveness and no normalcy until those responsible are severely punished.

902. Let's get infected!

Vienna 04/03/2025

What will the new world order look like? Not even its creators know. Most of us long for the old, not-so-ideal “order” in which politicians tried to hide the fact that they were stealing from us and sometimes even had to justify themselves for unfulfilled election promises.

Do not fulfill your election promises.
You can use them again at the next election.

The whole thing began spectacularly five years ago with a successful pandemic, and the globalists would like to repeat this scenario. That's why we keep hearing about new deadly pandemics. “Don't go near a monkey or it will infect you with smallpox! Killing chickens under the pretext of a new flu has driven up the price of eggs, but unfortunately that's it. Why unfortunately? Because they want it so badly! So today I'm going to present the idea of a new pandemic that I found on Telegram. [Source 01.04.2025. 15:53.](#)

Let's not be fooled by the date of April Fools' Day! This pandemic is real, each of us has probably contracted this disease more than once, unless we are completely humorless, but such people don't read this blog.

Text displayed at the end of the video:
Laughter is infectious, rejuvenates, international, unites and is healthy.
You too can laugh again. We'll help you along the way.

BREAKING NEWS: New virus is spreading rapidly!

Scientists have discovered a new virus that has already spread to large parts of the world: SRAS-VOC1! The disease it causes, DIVOC-25, leads to uncontrolled fits of laughter and extreme facial expressions. Those affected report sudden fits of laughter that occur even at the most inappropriate moments – whether in meetings, at weddings or even at funerals. Particularly dangerous: the virus is transmitted simply by listening to or looking at an infected person!

SYMPTOMS:

- ◆ Twitching of the corners of the mouth, followed by a broad grin
- ◆ Sudden, uncontrolled fits of laughter
- ◆ Strong training of the abdominal muscles through constant laughter
- ◆ Danger of losing your own seriousness forever

Special risk groups:

- ◆ People with a sense of humor
- ◆ People who regularly watch public television
- ◆ People who use public transport

THE DANGER IS REAL!

Virologists warn: If SRAS-VOC1 continues to spread so rapidly, a strict curfew will be imposed by Easter at the latest! Experts recommend neither watching funny videos nor having conversations with people who are already affected by laughing fits. Memes and jokes are particularly dangerous – they could further fuel the pandemic!

FIRST MEASURES AGAINST DIVOC-25:

- ◆ Don't tell any more jokes
- ◆ Avoid the media
- ◆ Strictly suppress laughter – if necessary with serious tax forms or news about politics

Attention! Some particularly severe cases already report a chronic zest for life! If this condition persists, there is a risk of complete immunity to bad moods.

WHAT TO DO?

The Ministry of Health advises: Watch politicians make speeches. Spread the word quickly! Only if everyone is informed can we together prevent the world from bursting into laughter!

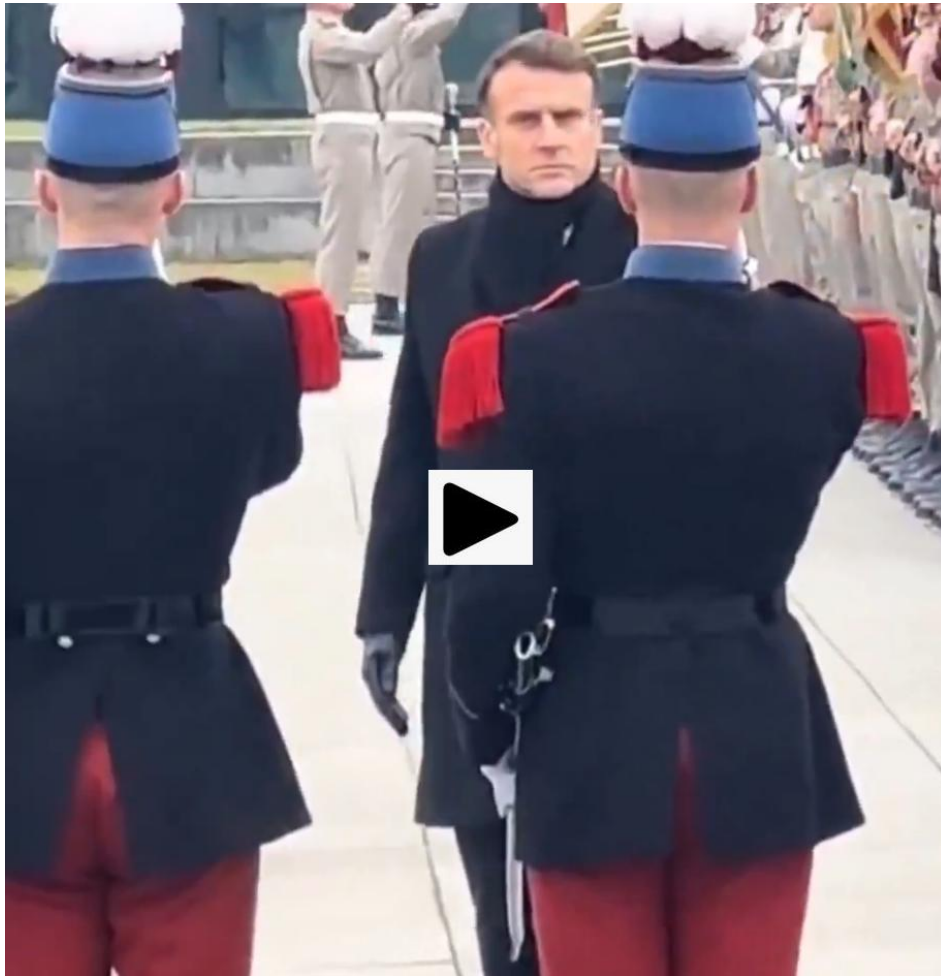

Stay concerned – and above all serious!

Watch the video above for an example of how quickly you can get infected!!!

I also suggest changing the name of the pseudoscience from virology to laughtology. Laughter is a weapon far more dangerous than intercontinental ballistic missiles. The use of laughter undoes years of efforts to put us under stress through fear. It improves health in spite of the tremendous efforts of medicine to ensure that we never get rid of diseases. It makes us parry with laughter at the sight of a politician on TV promising everything the voters want.

Tragicomedies shown on television are the best way to make people who are still thinking laugh.

The most difficult aspect of military life is certainly the need to remain serious in the face of such idiots.

903. Autonomous weapons

Vienna 04/05/2025

Autonomous weapons decide and act independently with the help of artificial intelligence, without human intervention. Although they are still under development they are holding the world community in suspense. What exactly are these and what is the problem? [Source.](#)

[Source.](#)

Countries such as the USA, China and Israel are currently developing lethal autonomous weapons that use artificial intelligence to select targets. Such weapons can be used not only in war. They can be used in civil unrest and demonstrations to calm the mood and eliminate uncomfortable political opponents.

In an article published two years ago on Interesting Engineering: [US ‘develops’ AI-powered facial recognition tech for military robot drones](#) it reads:

The contract between the Department of Defense and RealNetworks is worth \$800,000 and allows drones to fly autonomously with little to no human assistance, while the software uses machine learning (ML) techniques to identify faces. According to RealNetworks, the technology may potentially be utilized for perimeter security, domestic search operations, and rescue missions.

It is true that this technology can be used for good and useful purposes. How it really will be depends only on the intentions of the contract sponsor.

A programmed killing machine will recognize the victim’s face and carry out the punishment. It will murder a “terrorist” – after all, anyone can become one – or a similar person. This is not murder, but collateral damage. My definition of a terrorist: a person who stands in the way of the government’s current goals.

For more than three decades, I have been involved primarily in the development of computer programs, including some that were very difficult and where most colleagues gave up because of the complexity of the project. I assure you that it is impossible to create a program that is 100% error-free. Even if a machine programs itself, it does so on the basis of software created by humans. There are sophisticated software testing systems, but even these do not offer a complete guarantee of error-free software.

It's not easy for a programmer's child.
Dad, why does the sun rise in the east and set in the west?
Does that work? Then don't change it!

904. Gene mRNA injections

Vienna 04/06/2025

We live in a time when we have to find a dentist we can trust not to smuggle in the now fashionable mRNA along with anesthetics or other substances to treat our teeth. These gene injections are introduced into every traditional vaccine. If you ask an “expert” if he can name even a single vaccine that protects against infection, you might get the impression you’re looking at a politician: He squirms like a chick and can’t name a single example, even though the number of vaccines is constantly increasing.

Fortunately, some people are born with a spiritual immune system that sooner or later rejects the illusory worldview fed to them from birth through social conditioning. They begin to sense that something is wrong and seek answers.

Knowledge and anomalous external experiences show them a side of reality that others do not see, and so begins their journey to awakening.

Each step on this journey is made by following the heart, not the crowd, and by choosing knowledge over the veils of ignorance.

Henri Bergson.

Countless conventional vaccinations are currently being developed into mRNA vaccinations around the world. This Kla-TV research summarizes this technology’s extensively documented potential for damage: gene alteration, turbo cancer, fatalities and inflammations of all kinds. Due to this development, every person will soon be given an mRNA-gene vaccine as an injection! Even in Africa, production cities are being purposely funded for the mRNA-gene jabs! Which goals are being pursued through this? Shall the pretext of health and safety be used in the future to massively harm the global population? Who is behind this? [Source.](#)

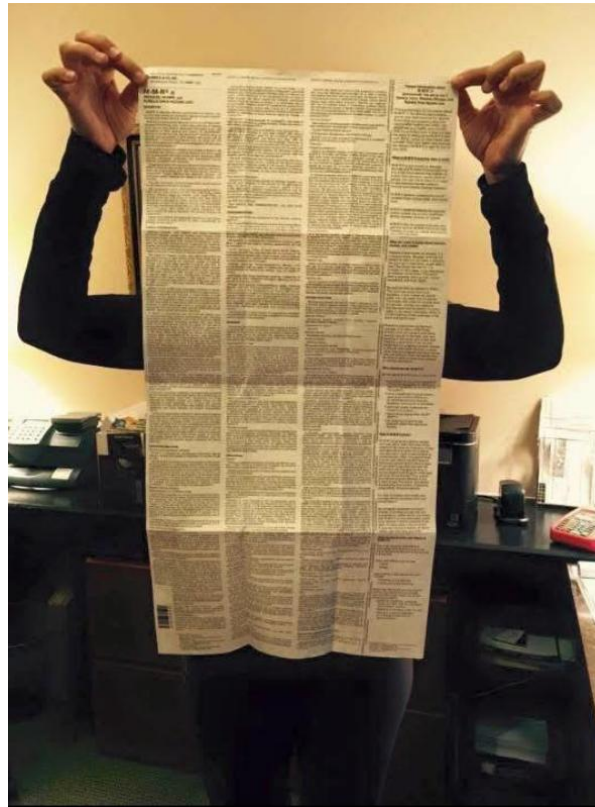

[Source.](#)

The mRNA catastrophe is still being suppressed from the consciousness of a large proportion of medical scientists. It is extremely difficult to leave the cult because it has taken over the existential aspects of scientists' lives. Work, social contacts and recognition are elements without which survival in today's often hypocritical world of science is hardly possible. On Thursday, Unreported Truth published [an anonymous letter from a leading medical researcher](#). It gives an insight into the abysses of the scientific establishment.

Author of the article [Alex Berenson](#) is a former New York Times reporter and the author of 13 novels, three non-fiction books, and the Unreported Truths booklets. His newest book, PANDEMIA, on the coronavirus and our response to it, was published in November 2021. [Source.](#)

... there's still a deep level of denial in much of the scientific community around what really happened with the Covid mRNA vaccines. The risks, the rushed approvals, the long-term unknowns—none of it gets real airtime. There's too much at stake for too many people. Careers, funding, reputations. It's easier to dismiss critics than to engage honestly.

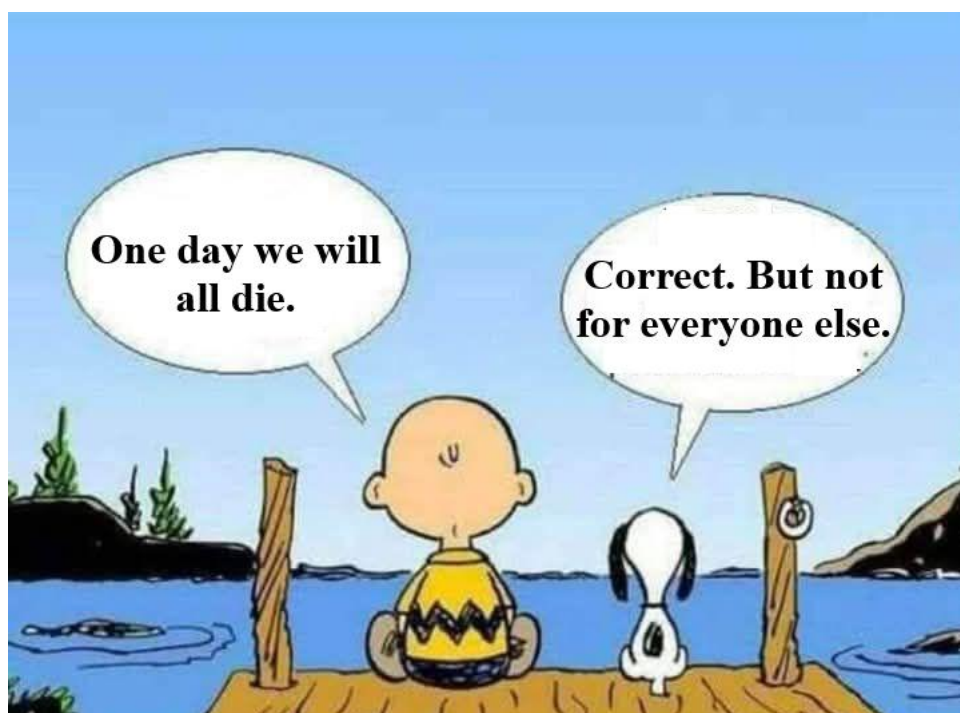

There's no acknowledgment of the limitations of LNPs [lipid nanoparticles, which encase the mRNA and deliver it to cells] (e.g., poor tissue specificity, inflammatory responses, or variability between patients), nor a clear explanation of how they plan to overcome these for cancer therapies.

This package insert for the MMR vaccine is given to doctors. It lists precautions, contraindications and side effects (in small print) – for doctors only... Parents receive a small detachable section with NONE of this information!

905. The worst thing is where you are

Vienna 04/07/2025

There is an opinion circulating on the internet that we distinguish between three types of lies: the usual bullshit, the brazen lie and the news from the sewer media. There must be something to it, because the latter are once again threatening that it is hotter in the country where this news is published by them than anywhere else in the world.

If it weren't for the new US president's temptations to take over their country, Greenlanders would probably have read in the press that nowhere in the world is as hot as in the Greenlandic capital Nuuk.

The scare game continues and leads to panic without any justification. Yesterday an article appeared on Report24: [Media scaremongering – The climate is allegedly warming faster in every location than anywhere else. Source.](#)

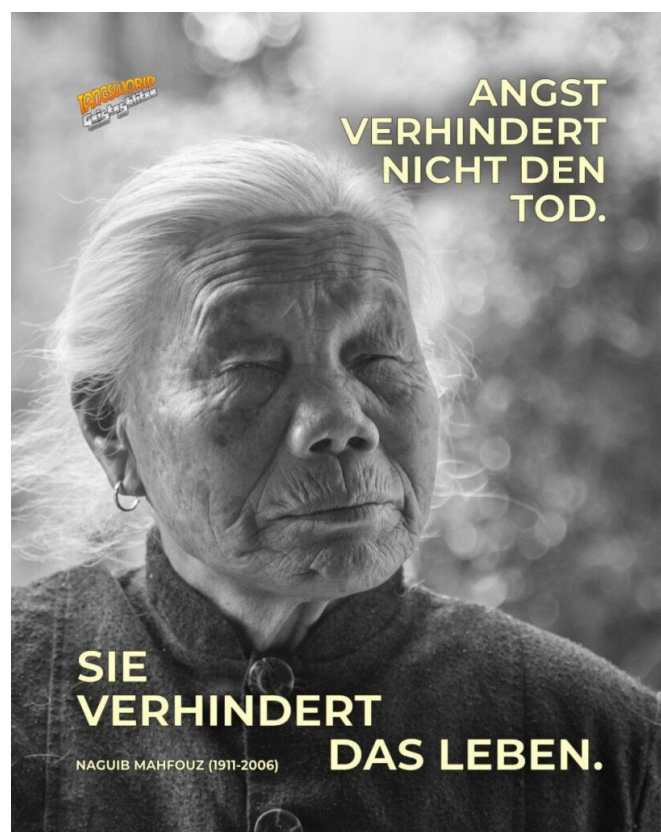

You may have seen media reports recently that the climate in Germany is “warming faster” than in the rest of the world. But don't worry, such crazy scare stories are being spread around the world. But if the climate is supposedly warming faster in every single place around the globe than anywhere else on our planet – how is that supposed to work? The media companies are becoming more and more transparent in their crude propaganda.

The drowning man reaches for the razor blade. As the Covid conqueror Vladimir Putin loses more and more of his Western media terror, you have to keep scaring people with what you can, because they must be afraid of something! Fear makes the subjects compliant. They accept new policies that enslave societies simply because they are afraid of invented threats. The propagators of fear obviously have a solution to the problem they have created: pay more taxes to lower the earth's temperature.

Fear does not prevent death.
It prevents life.
Egyptian writer Naguib Mahfouz (1911 – 2006).

People usually realize that they are being lied to. And that's probably why they fight those who shake their ossified views. After all, it was so nice – I was always right, so it's better to leave it as it was. And the world? What do I care about the world? If it collapses, then so be it, I feel comfortable in my world, which is built on the "knowledge" of television. Down with the truth of the conspiracy theorists! Mine is better! That's how I see the lemmings' philosophy of life.

What's Greta's take on this when, after thirty years, climate change still hasn't materialized?

But the climate is changing. Under the influence of the ever-tightening noose of slavery, more and more people are beginning to yearn for their lost freedom. The changes taking place in the world affect each and every one of us. It doesn't matter whether we accept them or not. The only thing that can stop the enslavement of people is mass but peaceful resistance. If we stop acting decisively and peacefully and start committing violence, we give them an argument to use violence against us.

We should not rely on the humanity of the people who want to depopulate our planet. If they had the opportunity to send an army onto the streets, soldiers or robots, they would have done so long ago. It's just a question of cold calculation, which is more profitable for them. Their tactic is to achieve their goal with minimal means.

906. Health as a weapon

Vienna 04/08/2025

Was medicine introduced centuries ago to protect people from disease? Most of us would assume so. Dr. Gerd Reuther, a German specialist in radiology, takes the opposite view. He became known to a wider audience through his radical criticism of medicine, which he published most notably in the Spiegel bestseller *Der betrogene Patient*. He believes that the invention of medicine served to improve the control of the privileged elite over the common people.

In an interview with Report24 published Thursday, [Gerd Reuther on vaccinations: Big business without scientific and medical evidence? \(source\)](#), Dr. Reuther talks about, among other things, the lack of solid research confirming the desirability and effectiveness of vaccinations.

A central concern of the discussion was the return to the body's self-healing powers. Dr. Reuther argued that many illnesses heal without medical intervention and that medication is only necessary in exceptional cases. He referred to studies according to which only a fraction of medical treatments actually bring demonstrable benefits, while a significant proportion are even harmful.

What do 15-minute cities have to do with medicine? Three months ago, Dr. Reuther also spoke to the editor-in-chief of Report24 about the history and role of medicine in managing society. The freedom of movement that we have come to know over the last few decades, that we can not only move freely in any direction at any time and even simply get on a means of transport and move to other continents, has not existed for a long time.

There is also the well-known incident with the composer Johann Sebastian Bach, who once moved away from his Duchy of Weimar. And he was simply put in a hole for four weeks and his wife didn't know where he actually was or whether he would come back.

Dr. Reuther also commented on leprosy. In the Middle Ages, it was decided in Europe to isolate leprosy sufferers from their surroundings. Islands in rivers or walled areas were designated for quarantine purposes. Strangely enough, there was no such custom in Asia, for example, and no difference in the spread of the disease was observed.

907. Did Bobby Jr. betray us?

Vienna 04/09/2025

When Robert F. Kennedy Jr. was confirmed as U.S. Secretary of Health and Human Services – in our case, simply Secretary of Health and Human Services – in mid-February, most of us breathed a sigh of relief. At last, the most competent man would deal with the problems created by Rockefeller medicine and the allied food manufacturing mafia. It was obvious that he had to compromise with Big Pharma. Otherwise he wouldn't have gotten through a US Senate committee so easily.

The pharma mafia decides on the curricula of future doctors, on the approval of all scientific publications in prestigious medical journals such as The Lancet or Nature, dominates most of the media and is its main advertising sponsor, and above all it is one of the biggest lobbyists in both chambers of the US parliament. Such a powerful, syndicalist-structured consortium has enormous persuasive power. Not only on the basis of dollars.

The secret to happiness and health is to ignore everything the state and pharmaceutical mafia says.

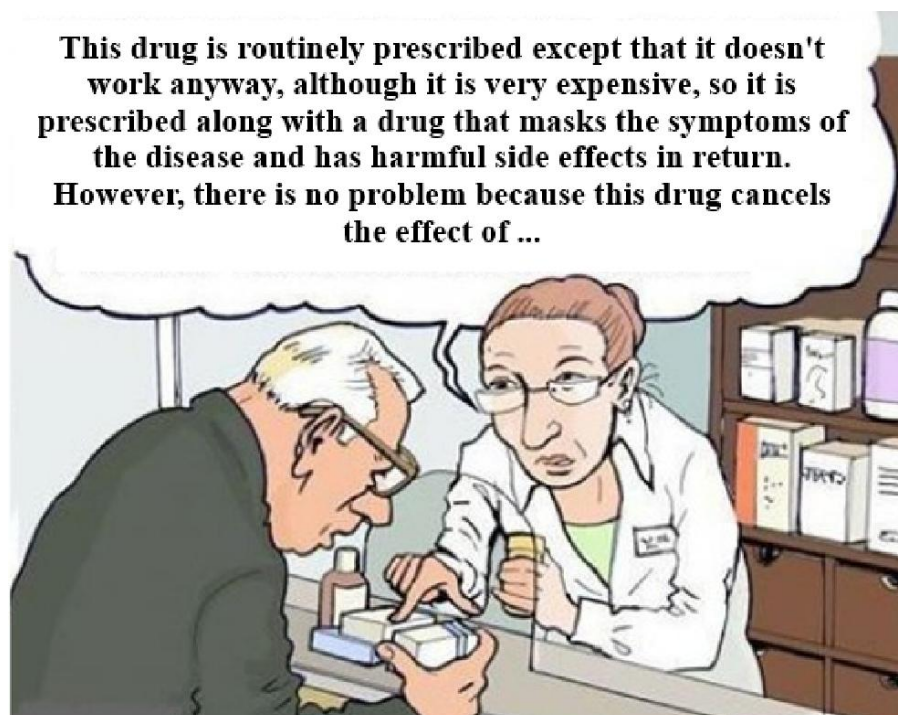

In an article published Friday on slightlyoffensive.com, [Everyone wonders why MAHA isn't talking about the Covid-19 vaccine?](#) we read:

Kennedy has long been one of the most vocal critics of the Covid vaccine. From the outset, he condemned them, even authoring a book that exposed what he described as deep corruption and deception within the pharmaceutical industry. But now, following his confirmation, that issue has all but vanished from the agenda. Covid was once the heart of his platform—now it's as if it never happened.

“Vaccines Are The Perfect Poison – That’s Why Eugenacists Like Bill Gates Loves Them” LIVE Exclusive With Ex-PHARMA Executive Sasha Latypova

I don’t believe Kennedy betrayed his principles. Some believe, as in the video above, that the only explanation for his stance is the blackmail he faced. I would rather guess collusion and agreements. We probably all remember Donald Trump’s boast that he saved millions of lives because the miraculous covid vaccine came on the market during his time in office. Although he hasn’t repeated these rants recently, he has never admitted that he was misled by Fauci and his cronies. It would only be fair to admit that he was wrong. That is what morality would demand. However, I will surprise readers by saying that we as voters are the main culprits in this situation.

The 1988 Bundestag election is often cited as an example of why politicians have to lie. This is of course a gross oversimplification, but one of the decisive factors why Helmut Kohl lost the election was that he broke his own maxim: **The truth is such a precious commodity that it must be used particularly sparingly in an election campaign.** [Source.](#) While his opponent denied any possibility of a tax increase during the election campaign, Helmut Kohl’s team admitted that they wanted to increase VAT. Even his statement that he wanted to lift the legal restrictions on eavesdropping after the election did not win him the support of the electorate.

So do we decide whether we prefer the truth or nice fairy tales told during the election campaign? If the former, then we should value those who tell us the truth.

The priorities are a different matter. Trump has set himself the goal of destroying the Deep State and is doing so with great energy. As a good strategist, he does not want to fight several enemies at the same time. In my opinion, however, the pharma mafia is very much a part of the Deep State, but it's better to leave such a powerful enemy for an after-dinner snack. The rule of divide and rule works not only with subjects, but also with a powerful enemy.

Nor is it the case that Kennedy has completely given up the fight against the vaccine mafia. You can read about this in an article on vigilantfox.com titled: [RFK Jr. Drops Stunning Vaccine Announcement.](#)

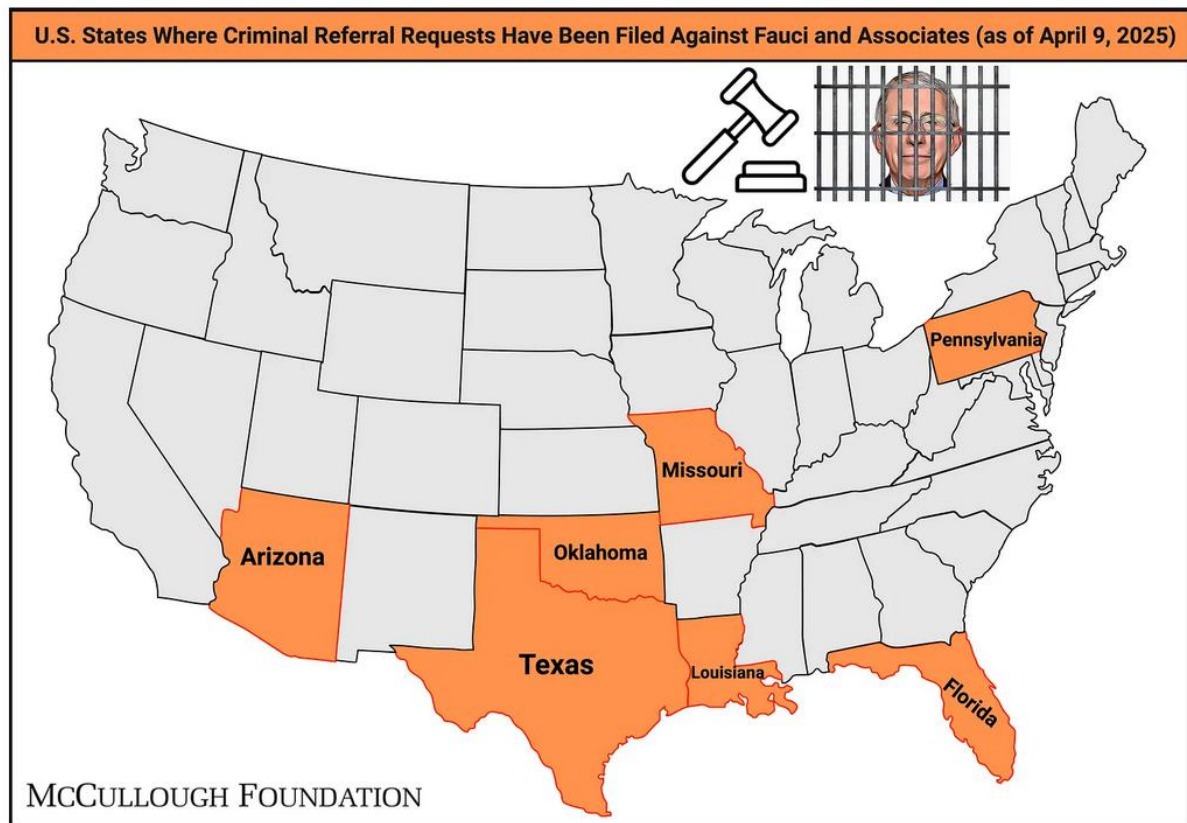

The beginning and end of life looks similar.

909. Suicides without reason

Vienna 04/13/2025

Vaccines should be memorialized, not guillotined! That's what the followers of the sacred vaccine commonly referred to as "Vaccines" believe. I am sure that after this introduction, they will spare themselves any further reading. Why should they bother with the evidence that they are being deceived?

The Italian website lacrunadellago.net published an article on Tuesday: [Neurological disorders of vaccinees and those absurd suicides without explanation. Source.](#)

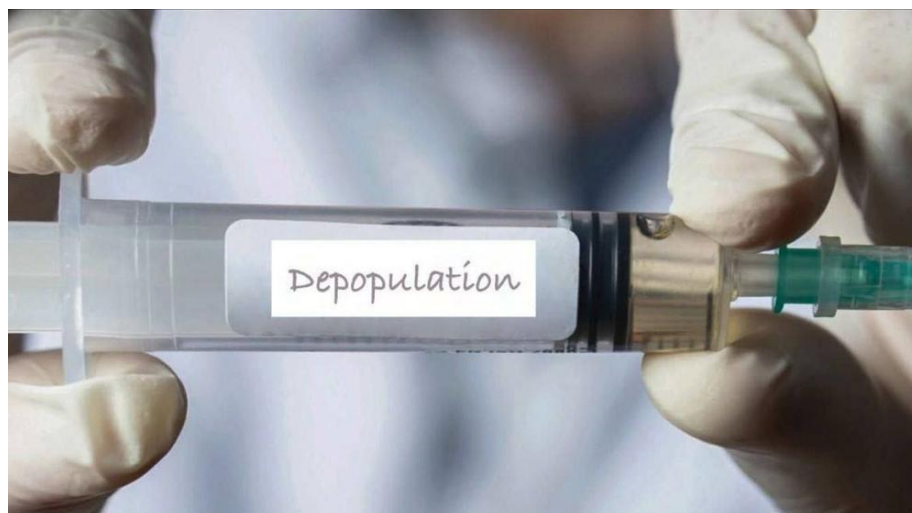

Another case that caused a sensation and seemed to confirm the very close relationship between vaccinations and neurological diseases was that of the ten nurses at a Boston hospital who all developed brain tumors, and, according to the People's Voice website, all received the vaccine. Virtually similar situation for three firefighters in Arezzo who developed three glioblastomas, but the unions and the media instead of highlighting the numbers of vaccine recipients who are dying from neural diseases, prefer, of course, to gloss over and try to blame the suits of the three men, who unfortunately died.

The numbers today are even more alarming, and there are some cases in Italy of strange and absurd suicides that deserve to be examined closely such as that of Matteo Caucci, a 29-year-old young man from Ancona. Matteo worked in Bologna, where he apparently led a normal life. His father, Luigi, a craftsman, had picked him up in his own car on Feb. 10 in the Bologna capital to take him home to the Marche region.

Arriving at kilometer 27 on the A14, however, Matteo felt an intestinal distress and asked his father to pull over for a moment to try to seek some relief.

Suddenly, something unpredictable and absurd happens. Instead of staying in the emergency lane, waiting for the illness to pass, Matteo picks up and starts running toward the highway where he is dramatically run over by two trucks.

The case of a man who once again stopped his car on the hard shoulder on the A14 on Sunday, February 1, and then made the same crazy gesture as Matthew.

Did our mRNA vaccines cause cancer in you?
If so, we have mRNA vaccines as a solution.

Pay for our mRNA vaccines so they can kill you! This is the slogan of a somewhat hidden advertising campaign for the new vaccines. And people are doing just that. It doesn't matter whether the victim pays out of their own pocket or via the membership fees of the financial pyramid called social security.

910. The British role in Ukraine

Vienna 04/14/2025

On Friday, an article appeared in the British daily newspaper The Time: [The untold story of the crucial role of British military chiefs in Ukraine](#). Unofficially, everyone knew there were British officers there. This time The Times has published the story of the Ukrainian “counter-offensive” with many interesting details.

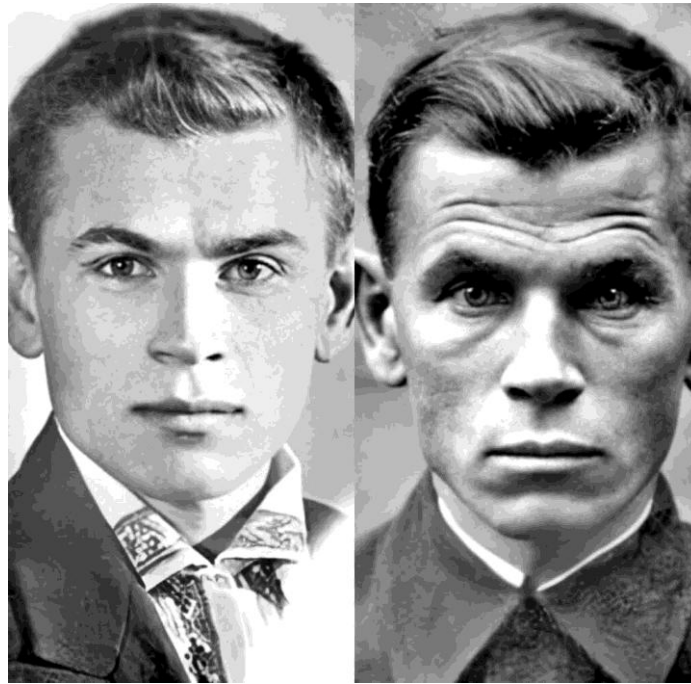

While Britain’s unwavering support for its eastern European ally has been no secret, the extent of its involvement and influence — last-minute dashes to Kyiv, help forging battle plans and collecting vital intelligence on the Russians — has remained largely hidden.

Until now. Behind closed doors, the Ukrainians refer to Britain’s military chiefs as the “brains” of the “anti-Putin” coalition, made up of America, the UK and dozens of other like-minded nations. Known for having the derring-do to deploy troops inside the country when no one else would, the UK’s role in the war has gone deeper than many observers may think.

80% of Ukrainians support Zelenskiy and want to fight to victory.
The remaining 20% live in Ukraine.

Wars are used to reduce the human population. This is in addition to the enormous profits of the bankers and arms corporations. It is also a source of constant fear among people who, without it, would start looking for the perpetrators of plandemics, climate hysteria, unnecessary wars or an organized invasion of refugees in Europe and the US. We must be afraid, otherwise we are a danger to the proponents of global depopulation.

The face of the soldier after four years of war, 1941-1945.

Politicians are not there to follow common sense. They are there to follow the instructions of their sponsors and careerists. In most cases, we are dealing with puppets who are controlled by strings like in a puppet show. Hence the impression that they are complete idiots. They are mere middle men who only see the end of their own noses and only know how to count the banknotes that are handed to them in envelopes under their office desks.

Bestial attack on the former British Prime Minister.

The attack was carried out even though the Prime Minister's child was present!

Is it the karma that comes back? But no, this bouquet was controlled directly from the Kremlin!

911. Big Brother is watching

Ostrzeszów/Poland 04/16/2025

A quarter of a century ago, I was working on a [project to analyze film footage for research purposes](#). The aim of the project was to improve road safety. The result of my work could in no way be used to control or covertly monitor people. Today, much more advanced technology is used to collect information about the movements of virtually everyone in public places.

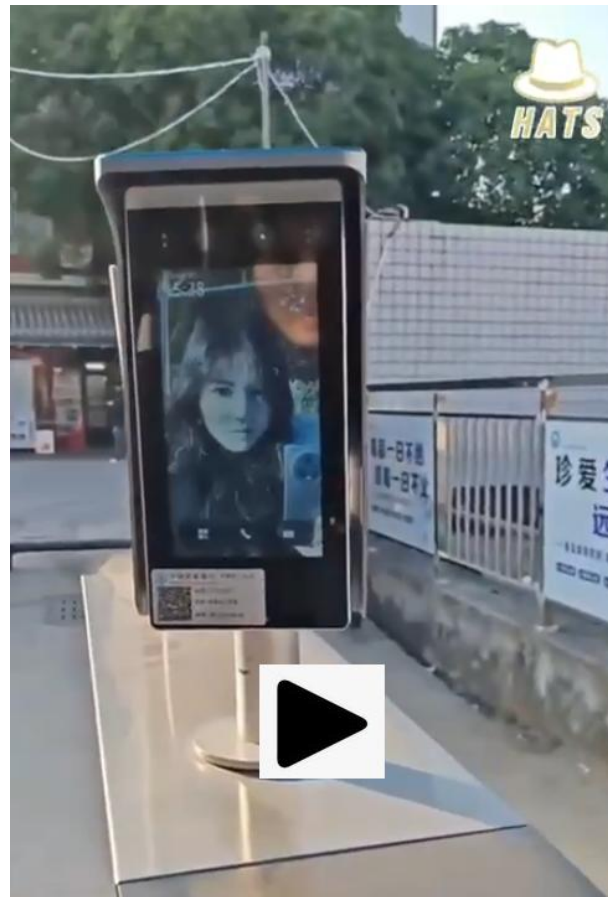

Voters are being deliberately...
...kept in poverty
...absorbed by soccer
...lied to by the media
...kept in ignorance

Because such people are easier to control.

An interesting article appeared yesterday on UncutNews.ch: [From boarding pass to bio-ID: Airports become the front line of the surveillance state](#). [Source](#).

It starts with a smile. Not the fake smile you wear at family gatherings, but the forced expression you put on at the airport scanner. Congratulations: Your face is now your boarding pass, your passport, your national identity card, and, if things continue as they are, probably your tax return. The biometric revolution is here, and it's wearing the sleek, sterile uniform of "efficiency."

I already presented this film in an article in January, in which the effects of the technical shortcomings of the dystopian control of societies are shown:

In China, citizens need a biometric digital ID (which is checked using facial recognition cameras) to leave their residential area.

This girl keeps failing the face check, so she can't leave her zone.

Source: [Telegram 01/17/2025 09:33 a.m.](#)

The problem of Orwellian control by Big Brother has many other negative aspects. The UncutNews.ch article did not mention the possibility of identity theft by replacing a person's profile on the servers with their own image. However, this could lead to the perpetrator being discovered quickly. Another, safer form for fraudsters is to use a mask with the victim's attributes.

This idea is not so new. In the Fantomas films – French-Italian crime comedies from 60 years ago – the title character often used latex masks that looked just like their victims. Today, such a mask can be created using a 3D printer and facial identification data stolen from a server.

912. Pole, Hungarian two nephews

Ostrzeszów/Poland 04/17/2025

Lengyel, magyar két jó barát – Polish, Hungarian, two nephews. Our shared history of Poland and Hungary proves that these two nations have always fought for values such as freedom, self-determination and national sovereignty. Personally, I feel a special bond with Hungary.

I came to Budapest for the first time in the summer of 1974 and immediately felt affection for this country. It was something special. The historical atmosphere of the Hungarian capital with its architectural elements from the time of the Austro-Hungarian monarchy, the sympathetic reactions of the Hungarians and the feeling of freedom in a country that, like Poland, was dependent on membership of the Warsaw Pact during the Cold War. None of this prevented the Hungarians from developing their version of freedom, which corresponded to the difficult situation of the time.

During the Second World War, Hungary was officially an ally of Germany. Nevertheless, they supported the Poles during the Warsaw Uprising in the summer of 1944:

The Hungarians didn't give a damn about the Germans' orders – they supplied the fighting Warsaw with weapons, rescued wounded insurgents and helped them evacuate. Some of them were shot by the Germans for helping the Poles. Had it not been for the order from Budapest, the Hungarians would probably have joined the insurgents.

János Tischler

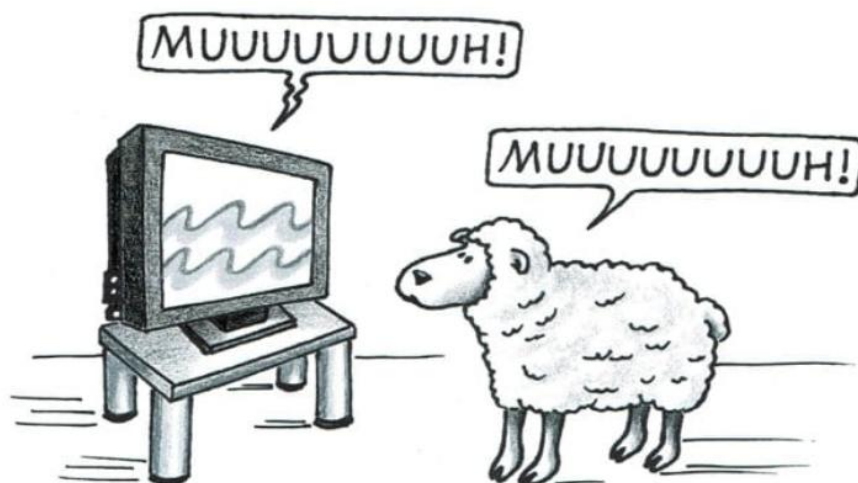

Sándor Szakály. [Source.](#)

In the summer of 1989, on the occasion of the symbolic funeral of Imre Nagy, the most prominent victim of the USSR's invasion of Hungary in 1956, an unknown 26-year-old man gave a fiery speech in front of several hundred thousand Hungarians on Heroes' Square in Budapest, in which he called for free elections and the withdrawal of the Soviet troops stationed there since 1956 from Hungary, which was still communist at the time.

This young man was Viktor Orban, who had studied law at the renowned E. Wycluzor University in Budapest. [Source](#). Viktor Orban has not only made headlines in Hungary. In 1993, he was invited by Klaus Schwab to the first globalist politicians' training course in Davos, where he sat on the bench with Angela Merkel, Tony Blair and Nicolas Sarkozy. George Soros has also financially supported the activities of Orban's Fidesz party.

There are no politicians who meet all our expectations, nor will there ever be. Many of you have probably been outraged by Orban's attitude towards Israeli Prime Minister Netanyahu. I, too, am not in favor of tolerating a war criminal in the political salons. I do not know the reasons why Viktor Orban made such a decision. This serious grievance is not reason enough for me to condemn the Hungarian prime minister. I do not know the reasons why he acted as he did.

Virtually all European nations, with the exception of Slovakia, have reason to envy Hungary for having a charismatic politician fighting for the well-understood interests of his own people. Of course, the Russophobic victims of TV propaganda – as pictured above – are unable to understand the real aspects of the ongoing war in Ukraine. They can't, because they don't even allow themselves to think that the ever-repeated story about the evil Putin is a made-up fairy tale by NATO propaganda specialists.

If someone tells me that Russia is pursuing an aggressive policy, I will show them that.

Of course there is Kremlin propaganda. The only remedy against one-sided brainwashing is common sense. And why? Because all propaganda is based on emotions, which are fueled by the propaganda itself.

Yesterday, an article was published on the tkp.at platform: [Hungary: Constitutional amendment to protect national values and sovereignty. Source.](#)

The Hungarian National Assembly passed the 15th constitutional amendment to the Fundamental Law on Monday, adopting a number of new provisions with a strong majority of 140 votes in favor and 21 against.

The amendments to the Basic Law include several important points: the clarification that a person is either male or female; the prohibition of the production, use, distribution and advertising of drugs; the possibility of suspending the citizenship of dual nationals who pose a threat to public order or Hungarian national security; and the confirmation of the right to pay in cash. The changes also represent an attempt by Hungary to hedge its bets against the power claims of EU headquarters.

These are sad times when the constitution has to replace the biology textbook.

913. Death penalty without sentence

Ostrzesów/Poland 04/18/2025

An intervention by MPs Grzegorz Braun and Roman Fritz in a hospital in Oleśnica/Poland has finally brought the problem of illegal abortions in the state hospital to the attention of the public and has become public information. The event took place on Wednesday, April 16. It involved a case of homicide by injection of potassium chloride into the heart of a baby in its ninth month of pregnancy in the womb. The case has been under investigation by the public prosecutor's office in Olesnica for six months.

Dr. Jagielska carried out the intervention to kill the child and claimed that it was a matter of worldview.

Potassium chloride is one of the three ingredients in the injections used to carry out the death penalty in the USA. You can find out more about this in the article: [Capital punishment – what's really in the lethal injections?](#) [Source.](#)

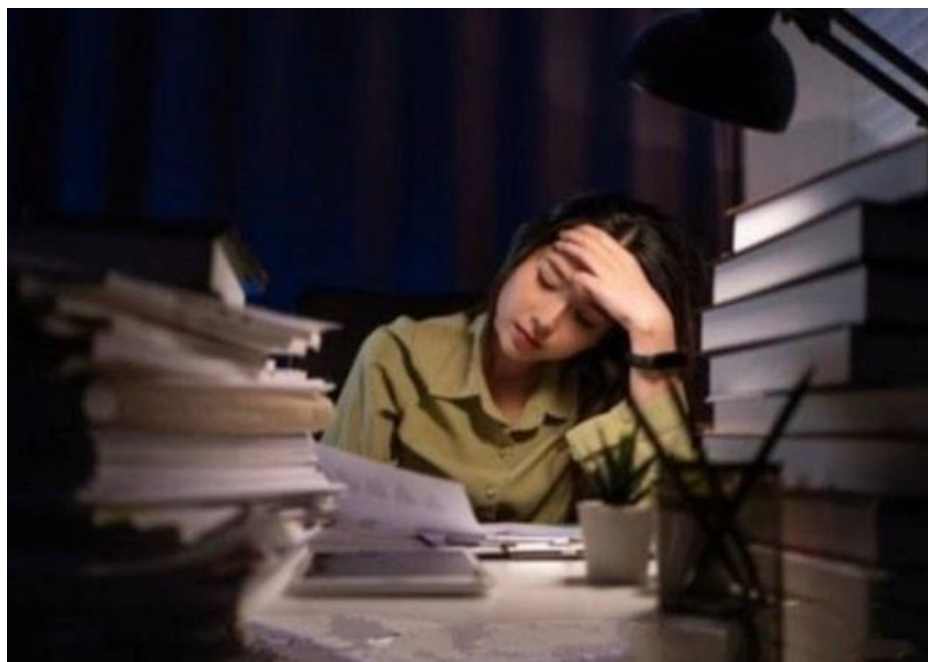

Complete footage of the MP intervention in Olesnica hospital.
Video in Polish. [English subtitles](#) can be switched on.

In a situation where wounded soldiers in Ukraine serve as camps for organ harvesting, where one person hates another just because they have a different opinion, it is no wonder that a doctor from Oleśnica also sees nothing wrong with killing a child with a potassium chloride injection directly into the heart. She probably doesn't consider it a human being, just as the Israeli criminals treat the Palestinians they murder as sub-human.

This is not the first time a legal loophole has been exploited to end a child's life. In an article published over two years ago: Mass Killing of Unborn Children with a Psychiatrist's Certificate ([source](#)), it said:

Federa [Foundation for Women and Family Planning] is already openly calling on psychiatrists to issue certificates for abortions based on the mother's mental health. Unfortunately, there are already hospitals in Poland that perform abortions on so-called psychiatric grounds. In the district hospital complex in Olesnica, 23 such abortions have already been performed [10/03/2022], often on children in the second trimester, 6 of them with at least 20 weeks of pregnancy.

Felk – the child murdered in Olesnica – was suspected of having congenital brittle bones. This is a serious health problem, but it does not prevent a person from living. I personally know a woman who was refused medication 25 years ago by a well-known hospital professor on the grounds that she only had a few months to live and that the expensive medication would be better used for people with a better chance of survival. This woman was cured with the help of another doctor and is still alive today. She decided not to visit the professor because she feared that an elderly person's heart might not survive an encounter with someone he considered close to death a quarter of a century ago. The diagnoses that doctors make of unborn children must be viewed in the same way.

914. RFK Jr. fights against the mafia

Ostrzeszów/Poland 04/20/2025

We have become accustomed to Donald Trump with the speed with which he has taken up the fight against the Deep State. He issues his executive orders with the speed of a machine gun. Recently, Trump suffered a major defeat before the US Supreme Court. The Supreme Court ruling banned the deportation of illegal immigrants without a court hearing. The Supreme Court did not consider the imposed state of emergency to be a sufficient reason for mass deportations. [Source](#). After this ruling, it will be very difficult to deport 25 million people in a short period of time.

I believe that the Supreme Court justices were aided in this decision by the president himself, who had students protesting the Israeli genocide in Gaza deported. Trump's undeniable success, on the other hand, is that he has stopped the flow of new refugees across the US border.

I must admit that I would have expected a similarly radical approach from a longtime activist in the fight against BigPharma, the drug cartels that are called drug companies for the sake of camouflage. However, Robert F. Kennedy Jr. proved to have more foresight and chose to act less impulsively than his boss in the White House.

Interview with HHS Secretary Robert F. Kennedy Jr. on FoxNews Wednesday.

Robert F. Kennedy Jr. said autism is a preventable disease and the United States needs to stop denying the epidemic. We can read this in yesterday's article on Report24.news: [The autism epidemic: RFK Jr. demands answers and questions science. Source.](#)

*"We're going to look at mold, the age of the parents, food and food additives, pesticides, toxic exposures, medications. **We will investigate vaccines.** We're going to investigate everything."* Although Kennedy does not explicitly claim that vaccines cause autism, his inclusion of vaccines in the list shows his willingness to explore this controversial area as well. He emphasized that he is approaching the matter "agnostically" – that is, without preconceived conclusions, with an open mind.

This is definitely a more effective way to normalize a medicine that has been [manipulated by the oil tycoons for over 100 years](#). The announced scientific research will lead to concrete results, provided that the mafia that is poisoning humanity with so-called medicines does not succeed in convincing the researchers that they have a better offer.

915. Theories of modern medicine

Ostrzeszów/Poland 04/21/2025

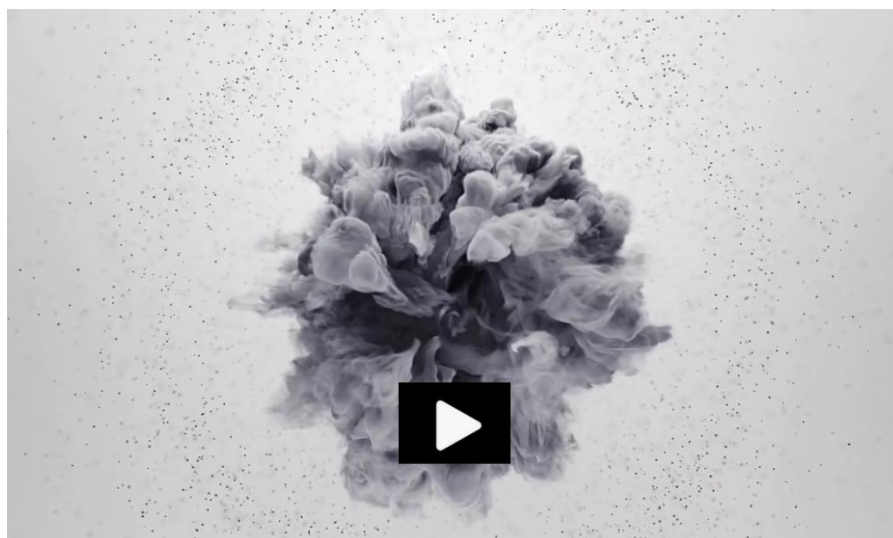

Marvin Haberland, the spokesman for Next Level, explains in an interview with Kla.TV, that virus research has not yet been able to provide scientific proof of the virus. On top of this, the existence of contagion could not be proven scientifically. Countless contagion tests failed miserably. In spite of this medicine and pharmaceutical researchers claim to know all the facts. [Source.](#)

[Source.](#)

I have addressed the issue of the lack of scientific evidence for the existence of viruses several times on this blog, including in this article: [Is Virology a Science?](#)

If you are shocked – which is only natural – by the claim that there is no scientific basis for the assertion that viruses are the cause of disease, I recommend you watch the beginner's video that explains in simple terms why the virus-pathogen myth is a myth.

[Source.](#)

Even when it comes to the controversial question of how infectious diseases are transmitted, none of the theories put forward have been scientifically confirmed. In the article on the Spanish flu, I presented a comprehensive document on one of the many attempts by researchers to prove unsuccessfully how the disease is transmitted. An explanation along the lines of “droplet infection” is an attempt that proves nothing, as toxins also enter with the droplets, which can also cause illness.

Long Covid is a post-vaccination disease.

Why do the publications claim that the virus is a pathogen? After all, there is no evidence for this. Instead, there is something like the Goebels effect – a lie is repeated until it becomes a widely held belief. Science is not a democracy – the truth is not chosen by the majority. A theory must be confirmed by solid research. Only by verifying repeatable phenomena can a theory be recognized as scientific fact. Not because it is taught in medical schools – where we find many myths, such as the well-documented cholesterol lie – but only in the course of research according to scientific rules does a theory become a recognized explanation of a phenomenon.

Cholesterol is a powerful antioxidant;
Cholesterol heals inflammation;
Cholesterol heals damage to the arteries;
Cholesterol is needed for hormones;
Cholesterol is needed for serotonin production.

So why should we lower its levels?

The scientific work used in virology does not comply with the cited rules. I therefore claim that virology is not a science.

916. Another dose

Ostrzeszów/Poland 04/23/2025

No, I don't mean another dose of the bliss elixir. Today there will be another dose of scientific research showing what these injections really are. The prestigious University of California, San Francisco UCSF, on Wednesday released the results of its latest study, Late Effects of SARS-CoV-2 in the Population: Risk Factors of Vaccination. [Source.](#)

The study has not yet been reviewed by other researchers. A preprint is a preliminary version of a manuscript that has not yet been peer-reviewed by a journal. An article by Steve Todd Kirsch, an American engineer, inventor of the optical computer mouse and founder of the Vaccine Safety Research Foundation (vacsafety.org), was published on Saturday, titled: [UCSF study shows 6x more likely to be hospitalized from a COVID shot than a COVID infection.](#)

Most are not interested in accounting for the pandemic because most participated in it.

Not everyone likes to deal with statistics. Let me just remind you how politicians misused RR five years ago to scare people about a pandemic. Statistics is a part of math and as an exact science is not responsible for the misinterpretation of manipulated test results of misapplied PCR tests.

Another scientific study published yesterday on nature.com found that 45.3% of deaths recorded as "COVID-19 deaths" in Greek hospitals during the Omicron wave had no clinically detectable link to COVID-19. [Source.](#)

This targeted scaremongering is now referred to by many scientists and critics as a coordinated psychological operation (PSYOP) – a deliberate manipulation strategy to secure public approval for draconian measures. From an article on Uncutnews.ch describing the study presented on nature.com. [Source.](#)

**The biggest lie in the history of mankind
was to convince healthy people that they
were ill even though they had no
symptoms.**

The politicians who have sold out to the globalists unleashed a politically motivated pandemic of fear five years ago, fear of a disease that was practically invented worldwide for this purpose.

One of the pillars of democracy, the judiciary, is ignoring the obvious evidence of a planned crime. The [documents of the hearing protocols](#) published in Germany by the state institute RKI – which at the time recommended lockdowns, masks and all manifestations of health dictatorship – clearly prove that political forces are behind the plandemic. Although the German courts relied mainly on the recommendations of this institute in their judgments against rebellious doctors and scientists, cases of evidence of manipulation of these recommendations by politicians are completely ignored.

As long as this corrupt, political system of puppet authorities does not change, we will continue to have to deal with this kind of “justice”.

917. Clown in the salons

Ostrzeszów/Poland 04/24/2025

The latest trick of the Kiev peddler should come as no surprise to anyone. The Ukrainian president has been trapped in his own stupidity for months. Probably because Ukraine has not yet entered into any alliances with Anglo-Saxon politicians, he does not know how much their promises are worth. They are worth it as long as they need something from the Ukrainians.

Zelensky based his power as president on paramilitary fascist militias such as the Azov troops. The Ukrainian Nazis' stance on peace with Russia is easy to guess. They will not allow him to give Russia anything, even though it has already conquered large parts of the eastern and southern regions of Ukraine.

If we add to this the power circles of Western Europe who have sold out to globalists whose only goal is to weaken and sit out Donald Trump's presidency in the US, we get a complete picture of why this unnecessary war has lasted so long. Unnecessary? There are exceptions: Globalists and those who benefit from the profits of the arms industry. There is another group – the Russophobes who greedily pounce on all the media lies about evil Russia and "heroic" Ukraine.

Last night an article appeared on Pundit Gateway: [‘THE MAN WITH NO CARDS TO PLAY’: Americans, Russians and Even Ukrainians TORCH Zelensky for Grandstanding in the Face of a Catastrophe.](#)

Prodded by the Euro-Globalists like UK's Keir Starmer and France's Emmanuel Macron, and cheered by the world's USAID-media, Ukrainian leader Volodymyr Zelensky keeps undercutting the peace process with his grandstanding, making all kinds of demands that he will never get.

In the meantime, the Ukrainian Duma has extended martial law for a further 90 days.

The Verkhovna Rada has decided by an overwhelming majority to extend martial law in Ukraine for a further 90 days from May 9. Alexei Goncharenko was the only member of parliament to vote against. He had previously accused the government of

- Failing to keep promises on service time limits:
- De facto keeping soldiers on “indefinite deployments”:
- Continuing to carry out arbitrary mobilization measures (by busification):
- Failing to reform the conscription system.

NATO's experiment to weaken Russia has been a complete failure. Russia not only won the war militarily, but also emerged from it stronger both militarily and economically. Russia's rapprochement with China is the West's greatest geopolitical failure since the end of the Second World War.

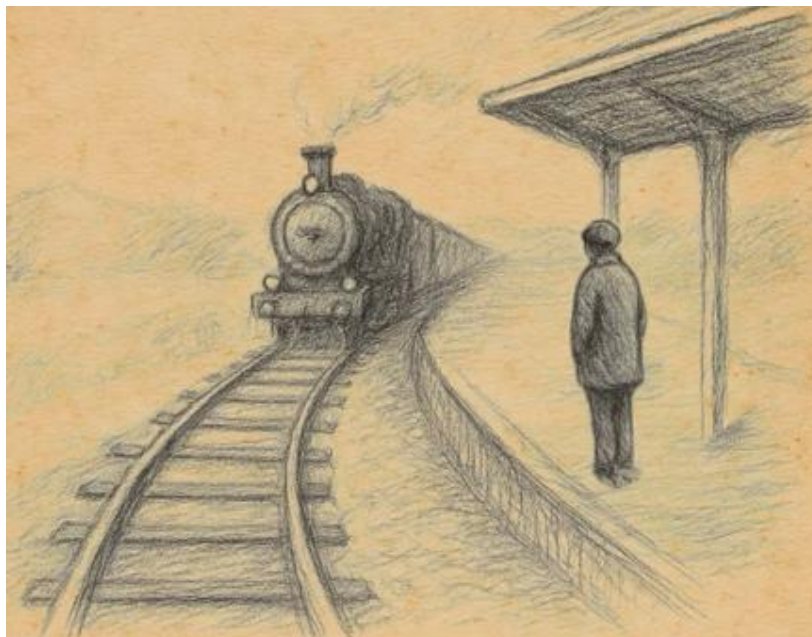

918. WHO: More vaccinations, more deaths

Ostrzeszów/Poland 04/25/2025

A new [study](#) published in the *International Journal of Risk & Safety in Medicine* finally shakes up the official narrative about COVID-19. Based on official **WHO data**, it reveals a shocking trend. Quote from the article published today on UncutNews.ch: [Explosive WHO data shows that COVID-19 deaths skyrocketed worldwide after mass vaccination. Source.](#)

Japanese legend says:

If you got on another train by mistake, get off at the next station.
The longer you delay, the more expensive it will be to return.

WHO data shows that COVID-19 deaths skyrocketed worldwide following mass vaccination, with the highest death rates in the most heavily vaccinated populations.

They persecuted the unvaccinated, insulted those who spoke at the time about the harmfulness of the elixir of happiness. To this day, the trolls, in order not to discuss the given facts, attack the people who proclaim these facts. Also, these studies based on WHO data are being silenced in the media because they don't fit into the cover-up tactics of the crimes that mainstream journalists are complicit in.

In mid-April, the WHO announced a supposed success: the conclusion of the pandemic treaty. A week later – and with far less public attention – it announced massive job cuts. The controversial UN specialized agency will make “significant” redundancies after the USA withdrew from the world body. An excerpt from today's article on tkp.at The WHO is broke. [Source.](#)

919. Santa Claus for adults!

Vienna 04/27/2025

The title of today's article is not mine. It was the term used in Bart Sibrel's interview in the movie presented in this article.

Bart Sibrel is an award winning filmmaker, writer, and investigative journalist, who has been producing television programs, documentaries, music videos, TV commercials, and stage plays for over forty years, starting at the age of eighteen, hosting his own television talk show. [Source.](#)

I have already written several articles about the “soft moon landing”. Today I am bringing up the subject again because a new video has appeared on KLa.tv describing one of the biggest lies in the post-war history of our planet. There were quite a few of these lies. The provocation in the Gulf of Tonkin mentioned in this film, which served as a pretext for the Vietnam War, the “Al-Qaeda” attack on the WTC, the 2003 Iraq War with “irrefutable” evidence of weapons of mass destruction in Hussein's hands, the swine, bird and Covid flu pandemics. The list could go on.

You will say that I am biased against the USA. Not so – I'm biased against the Deep State, which has its tentacles all over the world and uses “top secret” services based in the US. The average American has as much in common with these criminal policies as the average European citizen has with the Green Deal, the EU's pro-war policies or the penchant for putting plastic corks on plastic bottles. If Europeans support these destructive actions, it is only because they are heavily manipulated by the pro-EU, i.e. global mainstream media.

53 years of technological progress and we still haven't been back to the moon?! This mind-blowing interview with film-maker and author Bart Sibrel might help you understand why. His extensive research on NASA and the first moon-landing including testimonies of eye-witnesses show results most of the population might not know about until now. Watch and share this interview with everyone you know! For knowledge is power! [Source.](#)

As explained in this interview, the performance of computers in 1969 was less than a thousandth of that of an average smartphone. Nevertheless, no one has “flown” to the moon since 1972. This can be explained by the fact that the USA achieved its goal and took control of space, which at the time was undisputedly dominated by the USSR. One can, but it is as if no more expeditions to explore new lands had been undertaken after the discovery of America by Christopher Columbus in 1492.

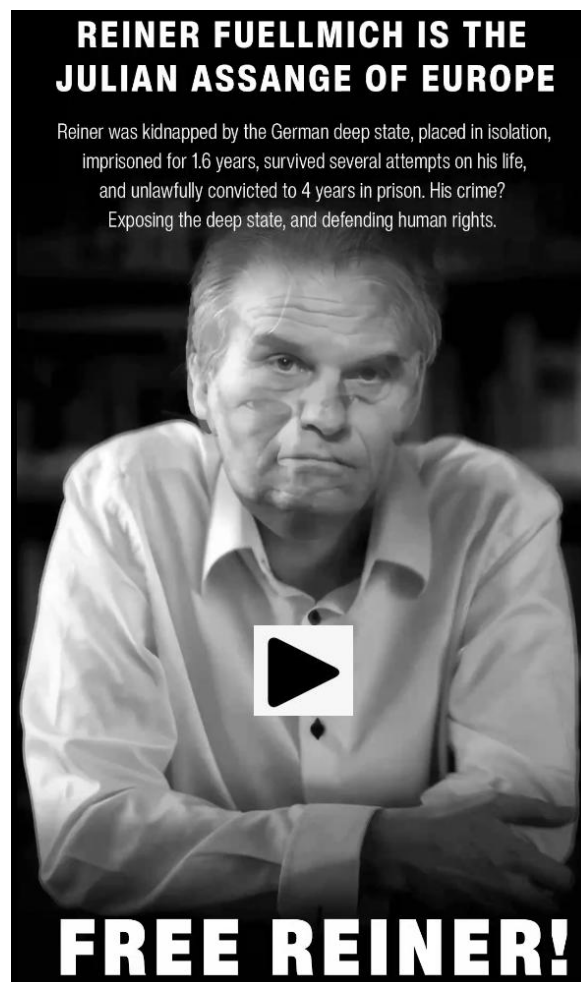

920. Pursuit of Dr. Reiner Fuellmich

Vienna 04/28/2025

On Thursday, the Göttingen Regional Court sentenced lawyer Dr. Reiner Fuellmich to three years and nine months in prison for alleged embezzlement of donations. Fuellmich was one of the first to uncover the gigantic coronavirus fraud in more than 120 meetings of the coronavirus committee from July 2020. The RKI file that has now been published confirms the findings of Fuellmich's committee. German judiciary condemns whistleblower and continues to cover up coronavirus-related crimes?

A year and a half ago, the German secret service abducted Dr. Reiner Fuellmich from the German consulate in Mexico and brought him to Frankfurt am Main, where he was immediately arrested and imprisoned in the Rosdorf high-security prison in Göttingen. I wrote about this in the article [Neo-Nazis on steroids.](#)

We must not forget the people who had the courage to say no to hypocritical policies aimed at genocide. What we need is sustained peaceful resistance against lawlessness in the name of the law. The fight for Julian Assange's freedom was successful. I am convinced that Dr. Reiner Fuellmich will also be released under pressure from other courageous people who have not yet been imprisoned by the authorities. In Germany, murderers are released from prison because they are poor persecuted refugees who are fighting for survival in Europe with a knife.

Peace demonstration in Reutlingen
Reiner is also remembered here! A very nice gesture.

3 years 9 months in prison for Füllmich

He does not owe his long prison sentence to a criminal offense, but to his resistance against an overreaching and misguided corona policy. The trial and sentence are a disgrace to the rule of law.

Background: Because emotions are running high, I am providing some information that is not generally known.

1. Füllmich reduced the company's assets at the expense of the other shareholders. They reported him because they feared paying their own taxes on profits to which they no longer had access;
2. The offense of embezzlement is much broader than laypersons believe and applies to mere endangerment. Füllmich borrowed 650,000 euros from his colleague Templin and provided a land charge as security. However, the loan of 700,000 euros that he paid out to himself was unsecured and therefore at risk. He never paid it back;
3. A first offender would have been given a suspended prison sentence of two years. The verdict is not final, a second trial for breach of trust is still pending;
4. The draconian sentence, the excessively long pre-trial detention and, above all, the theatrical treatment as a violent offender with handcuffs and shackles clearly show that this was a political trial with the aim of deterring as many people as possible from criticizing the government;
5. Almost all known opponents of lockdowns and compulsory vaccination have been criminalized since 2020;
6. Sneering comments against the shameful verdict mostly come from born followers who used to tattle on classmates and would have marched with Adolf even earlier.

To those who believe they can get away with it by ducking out and keeping their mouths shut, especially lawyers and journalists, I say:

Don't rely on someone else always taking the rap for you. If you continue to remain silent and don't fight back, you will wake up in a dictatorship one day.

921. Can we live without electricity?

Vienna 04/30/2025

The answer to the question posed in the title is simple and clear: yes, we can. After all, generations of our ancestors proved this, people who lived until the second half of the nineteenth century without knowing or experiencing the benefits of electricity. A more meaningful question would be: Can we switch to such a life?

Monday's hours-long power cuts in Portugal, Spain, southern France and even Greenland have shown that a power cut, which usually occurs unexpectedly, causes colossal chaos in people's lives. It's not just people accidentally trapped in an elevator between floors. It's also train passengers and car drivers stuck in traffic jams because the traffic lights are switched off. The absence of the internet, which is very painful for anyone who wants to find out about what is actually happening and how long it will last, has hit the majority of anonymous Internetiker ☺ right in the head, dividing them into two groups which, like the Iron Curtain of old, represent a division between those lucky enough to have electricity and the comfort it brings and those who are affected. A division that depends on geographical location.

When the longed-for power gradually came on after many hours, a witch hunt began in the media to find the causes of the gigantic blackout. The natural culprits, as always in such situations, are global warming or Putin. For the particularly inquisitive: both together.

The most frequently proposed explanation for the cause of the blackout.

It was reported in some more independent media that the cause of the tragedy, as in the days of the “One True Disease”, was not the climatic turbulence but all the means used in the form of photocells to generate electricity and wind turbines to kill birds. No one on TV mentioned that Spain had a [56% “clean energy” share of the country’s total electricity generation in December](#). In my opinion, the most plausible explanation for the cause of this blackout comes from physicist Björn Peters.

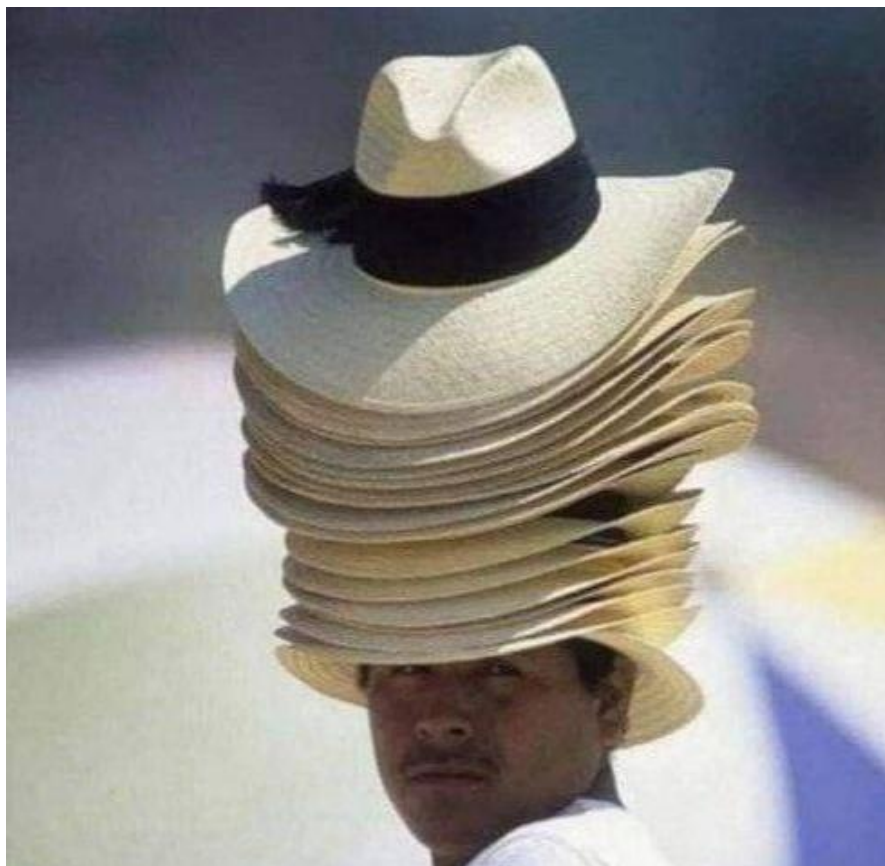

He works on weather-dependent electricity, solar and wind energy technologies and energy storage. Dr. Peters has unique expertise in the economic evaluation of investments in energy markets. With countless lectures and economic publications on the gaps in the current energy transition policy, Dr. Peters has developed a political strategy of “ecological realism” that can enable an environmentally friendly supply of raw materials, energy and food in Germany. [Source](#).

“There appears to have been a disruption of the grid in France, as Spain had to dispose of high surplus solar power that suddenly could no longer be picked up.”

Energy economist Björn Peters.

Wind and solar power is technically and economically unsustainable, as the blackout in Spain on April 28, 2025 shows. However, wind farms in particular cause far more and, above all, more long-term damage than any other energy source in use. Quote from today's article on tkp.at [Wind turbines damage the environment, people, animals and plants more than any other energy source. Source.](#)
